Subject: Opposition to Duke pipeline

To whom it may concern,

I am a resident of Blue Ash, OH and my family's lives and our dwelling will be directly affected if the Duke's natural pipeline is approved. I will be attending the meeting that will be held in the near future, but it doesn't make sense to jeopardize any number of lives to save a few bucks to route this through densely populated areas. Why is it necessary? Why take the risk when people could be killed? In the end, Duke's proposed pipeline doesn't serve the customer in any way. I will gladly pay more for the services that are currently provided to ensure our safety. Even if they follow all the safety protocols and procedures, an accident could happen and kill many more people because it is located in a densely populated area than it would if it were located elsewhere. Would you want to jeopardize your family for the convenience of a utility company? Nobody can guarantee safety so the best solution is to AVOID populated areas. That is the utmost concern! Please do not allow this proposal to pass through our neighborhoods. How would you feel if this passed by your house? How would you feel if an explosion occurred and killed or severely injured you family or loved ones? How would you feel if you knew it could have been prevented? This is where we are at now and I ask that you please consider these concerns when evaluating this proposal.

Sincerely concerned,
Stuart and Kady Willison
Blue Ash, OH 45242
