RECEIVED DOCKETING DIV
2016 JUN 13 PM 2:27
PUCCO

Our family is strongly opposed to all pipeline routes proposed!

We cannot understand the need to route a huge extremely high pressure pipe carrying natural gas through dense housing and business areas. And to route them very close to schools is unthinkable!

An explosion caused by a large leak of gas in a pipe of this size at the proposed pressure would cause devastation of immense proportion. The number of deaths could be in the hundreds!

There are too few pipes of this size and pressure carrying natural gas to say the technology is proven. Add to this the population density and the risk of a broken pipe through faulty pipeline or a natural disaster like an earthquake and you have a formula for a risk that is totally unacceptable!

Please use some common sense and decline to approve all of the proposed alternatives! You will sleep better at night!

Sincerely,

William E. Hopp
