Subject: 16-0253-GA-BTX

I live in a beautiful neighborhood, surrounded by forests, creeks, deer, birds and all kinds of critters. I revel in the clean air and the green and the beautiful nature sounds.. which may be severely impacted by a 720 psi pipe transporting natural gas whose construction will severely impact our communities, our children, nature, our wild animals, our health.. not to mention the danger of explosion of such a pipe which by Duke's admission HAS NEVER being built before to that pressure.... Are we sweeping the explosion on the 28th April near Pittsburgh under the carpet? And that was only a 400 [pipe, but it scorched about 40 acres and the streets were on fire.. just by pure luck people were not killed, like in San Bruno CA about six years ago. Why are we playing with people's life to allow a greedy company to destroy our lives? I don't mind paying more for gas for my bill if Duke decides to change the route of the pipeline (MIND YOU, for their two million customers in TX and LA, not for here) and puts it far far away in isolated parts of OHIO and it incurs more costs. I will pay for it. JUST do NOT MESS WITH [PEOPLE'S LIVES!
