Subject: RE: OPSB case number 16-0253-GA-BTX

I am writing to express my concern regarding Duke Energy's proposed natural gas pipeline route. I am adamantly opposed to the routes for the following reasons:

- Each of the proposed routes will travel through densely populated areas.
 - There is no engineering reason why the pipeline cannot be built in a rural area where damage from an explosion or leak would be minimized.
 - There is no reason, other than Duke Energy's bottom line, that this pipeline cannot be built in a rural area.
- Please do all that you can to ensure that the proposed routes for Duke Energy's referenced pipeline is not approved. Please use your power to ensure that a new plan is required which will be safe for people and the environment.

Thank you for your time and support of this request.

Sincerely,

Elizabeth A. Adkins
