Subject: Case #16-0253-GA-BTX

As a resident of Blue Ash, we strongly oppose all routes proposed by Duke Energy to install shallow and massive 30 inch gas pipes with extremely high pressure through congested communities of hard working class families including elementary schools, UC Blue Ash community college campus, playgrounds, homes, parks, churches, and office buildings. There is a history of explosions and leaks with recently installed pipes that killed and injured hundreds of men, women and children.

Please do something "right" for the citizens of Ohio who are doing their best to provide a safe, decent life and make a positive contribution in this country. Why do they have to be afraid of a ticking time bomb under their feet?

Please say "NO" to Duke Energy's Disastrous Proposal.

Thank you for heartfelt consideration for the citizens of Ohio in regards to this matter.

Karen and Leonard Lind
