COUNTY: Hamilton

COUNTRY: USA

COMPANY\_NAME: Duke Energy

CASE\_NUMBER: 16-0253-GA-BTX

COMMENTS: I am opposed to Duke's Pipeline Project! I want to share some of my concerns. First, property values will decline when this pipeline is built. Next, there are dangerous safety hazards to my family and community. The pipeline will run adjacent to where we live, work, educate, play, shop, walk, drive, and worship. Then, insurance costs will rise. Also, businesses will not move to the area and others will move out. This will result in lost tax revenues and increase our taxes. Next, there will be destruction of mature woodlands and green space and will also displace wildlife. In addition, there will be heavy construction in the area disrupting traffic for over a year. Also, ugly hazard markers will be permanently placed along the pipeline. Most importantly, there have been numerous incidents of these pipelines causing deadly explosions! Two examples include: Sissonville, West Virginia January 2015- "1 year old pipeline explodes across highway 77." Also, San Bruno California, September 2010, "30", 400 PSI pipeline. 8 people died, 66 injured, destroyed 38 homes, damaged another 70 homes. In conclusion, from 1994 through 2013, the U.S. had 855 serious incidents with gas lines, causing 319 fatalities and 1,254 injuries, with over HALF a BILLION DOLLARS in DAMAGES! PLEASE STOP the PIPELINE!

Thank you for your time.
