COMMENT DESCRIPTION:

OPSB Case number 16-0253-GA-BTX. We are strongly opposing the plan to install 30-inch-high pressure pipelines through City of Cincinnati residential areas. Explosions have occurred in United States where the PSI were about half of what is being proposed in our area (720 psi) including one in San Bruno where 38 homes were destroyed, 8 people died, and 66 people injured. It is a crime to consider planning this route through our communities where experience

This is to certify that the images appearing are an accurate and complete reproduction of a case file document delivered in the regular course of business.

PUCO

has already proven that this is not safe and potentially lethal?! Please make the right decision and do not route this through Greater Cincinnati or other residential communities. Eugene and Kate Minevich, Blue Ash residents for 20 years
