16-0253-GA-BTX

I am writing concerning Duke's proposal to run large high pressure gas pipelines thru our urban/surburban areas, including near other chemical storage areas in the Cincy area. This size of pipeline is unprecedented in populated areas and a huge safety hazard! It's not even legal in some states!

It is a huge safety hazard, disruptive to the environment and will result in loss of property values, tax revenues and business developments. There is also a huge safety concert! There have be lots of reported accidents, deaths and destruction have occurred w/ newer pipelines carrying less gas than you propose!

These pipelines belong in unpopulated areas! It is scary and very irresponsible, dangerous to even propose a pipeline like this. It is equally irresponsible for the state to consider this plan at the risk of it's citizens!

Say NO to the pipeline. NOPE CINCY!

OPSB Case #16-0253-GA-BTX
