COUNTY: Hamilton

COUNTRY: USA

COMPANY_NAME: Duke Energy - Duke Central Corridor Extension Gas Pipel

CASE_NUMBER: 16-0253-GA-BTX

COMMENTS: 1. In the event of a catastrophic explosion of the pipeline, how many acres will be destroyed ? If the pipeline explodes, what is the estimate of the number of people that will be injured or killed ?

2. If the pipeline explodes and spreads, how many miles of pipeline will explode ?

3. What kind of insurance does Duke Energy have to compensate for the physical damage, injuries and deaths that will occur ? Will this insurance cover just property owners or will it cover people just passing by ?

4. How many other high pressure 30-inch pipelines in residential areas does Duke Energy have, and have any ever leaked or exploded ?

5. If the pipeline explodes near gas stations, there is likely to be greater damage to the area, so why would the pipeline be allowed near them ?

6. Why can't Duke Energy go thru the woods and farms of Indian Hill where it would be safer ? Why can't Duke Energy put the pipeline in a less densely populated county like Clermont County ? Why can't the pipeline go east of I-71 ?

7. Will an environmental study for the entire pipeline be completed ?

8. Why should we believe Duke Energy anymore than Exxon, BP, or Calif. Pacific Gas about the dangers of the pipeline exploding ?
