In regards to: Case #16-0253- GA-BTX

To Members of the Ohio Power Siting Board,

I am writing to express my concerns about Duke Energy's proposed 30 inch, high pressure (~600 psi) gas transmission pipeline and to urge you to stand up for the residents of Greater Cincinnati and reject this proposal. As you know, there is a proposal for three possible routes through residential areas in Hamilton County and the City of Cincinnati. Neighborhoods affected by the proposed routes include: Amberley Village, Blue Ash, Silverton, Golf Manor, Wyoming, Sycamore Township, Pleasant Ridge, Madisonville, Madeira, Kenwood, and more. This proposal has been in the works for months, yet only recently gained broad public attention through media and grassroots communication. This gives the impression that Duke Energy wants to fast track their proposal with little opportunity for public scrutiny.

This is to certify that the images appearing are an accurate and complete reproduction of a case file document delivered in the regular course of business.
