Dear Ohio Power Siting Board,

I recently became aware that Duke Energy is proposing to install a large, high pressure natural gas transmission line through Blue Ash and other nearby communities. While I recognize the need for Duke to have adequate transmission capacity in order to supply natural gas to our communities in an efficient, reliable and safe manner, I believe it would be better (safer) to route this pipeline through areas with lower population density. Please weigh this proposal carefully to ensure the best possible routing is achieved.

Sincerely,

Dwight Pittenger
