Regarding case number: 16-0253-GA-BTX

As a lifelong citizen of the City of Reading, Ohio, I have great concerns regarding the proposal for the pipeline to run through our city. I am wondering why the proposed pipeline going through resident areas is not more of a concern to you and your company as it certainly is to us.

I am also curious as to how you would feel if this same pipeline was being installed in your neighborhood. How do you know there was a need for this pipeline – what data was used? Are there currently issues with the pipeline now? Are there other less-populated routes available or is this the least expensive route for your company?

In my heart, this project is certainly NOT one that I can accept or approve.
