ATTENTION: TO WHOM IT MAY CONCERN

SUBJECT: Case 16-253-GA-BTX

As residents and property owners of a two family home in Sycamore Township, we would like to express our serious concerns over the proposed location of the Duke Energy Center Corridor Gas pipeline project, specifically the pink and orange routes on the paperwork presented to you. Each of these routes will go directly through single family residential neighborhoods like our own.

There are several areas of concerns including disruption of our neighborhood, including the decreased property value. These neighborhoods have much landscaping etc. which help maintain the value of our real estate market. Digging deep trenches etc. would destroy this landscaping and create a dangerous situation for us as well as other residents.

The other disruption would be the traffic and the fact that the orange route would go right through the Kenwood Towne Center parking lot. If you take a look at every other shopping center in the Cincinnati area, this is the only one with the most high end stores and great success rate, therefore the most customers. The re-routing of this traffic would be a nightmare and even a possible disruption to its success, not to mention it would destroy all the money spent recently on recently completed work by the Township.

Please reconsider the proposed routes mentioned in this letter. We are proud to be a part of the thriving community that has worked hard to make it a great place to live. Please help to not destroy it.

Sincerely,

Ben Lockard - Charlotte Lockard
