4927.21	Complaints against telephone company.

The company has established policies and procedures designed to protect consumers, including publishing customer rights, formal complaint procedures, and policies related to privacy, slamming and network management.

The company observes strict compliance to all CPNI rules, including training for new employees, refresher training for current employees, maintaining written practices for handling CPNI and submitting

annual certifications to regulatory agencies. The CPNI manual is available for inspection at the company business office. The company uses third party verification to prevent slamming and uses a contracted service order administrator to process LNP requests within the time constraints contained in the rules. Customer billing is performed by a billing vendor that maintains software that complies with all truth in billing requirements, including the information that is required to be displayed on the customer bill. The company maintains a CALEA manual and utilizes a third party vendor to make sure that all CALEA requests are processed in accordance with applicable laws and regulations. The CALEA manual and procedures are filed with the appropriate agencies and are also maintained at the company business office.

The company's Basic Local Exchange Service Tariff, PUCO No. 4, contains BLES pricing, 9-1-1, Lifeline and IntraLATA presubscription information, terms and conditions. The tariff is available at the company business office and in the tariff section of the PUCO website <http://www.puco.ohio.gov>.

While all of the regulations apply to the regulated, voice services provided by the Company, many also apply to the provision of broadband services, such as CALEA, CPNI, truth in billing, unfair or deceptive acts or practices, emergency operations and network management. The company adheres to those standards that apply to broadband service in the same manner as it does for voice service. Some examples of regulations that do not apply to broadband are Warm Line Service, BLES requirements, directory information and toll presubscription.

Other sections of FCC Form 481 contain additional information regarding the following:

Lifeline terms and conditions - Line 1210

Emergency operations - Line 610

Vaughnsville Telephone Company (SAC 300663)  
Line 610, Functionality in Emergency Situations

Documentation of the company's processes implemented to assure compliance with certification requirements pursuant to 47 CFR §54.313(a)(6) and §54.202(a)(2).

Vaughnsville Telephone Company has an employee call-out procedure in place to mobilize its entire workforce in the event of an emergency situation. The notification process utilizes landline, cellular and internet technologies. In the event of total failure of all communications technologies, company practices include having employees report to the central office to obtain further instructions.

The central office and core network functionality is supported by 8 hours of battery reserve and a 30 KW generator set capable of running continuously for 200 hours before needing to be refueled. Network nodes containing active electronic equipment are equipped with battery backup. The company maintains a number of portable generator sets that can be deployed to network nodes in the event a power outage exceeds the battery reserve capacity.

The facility network is designed as a diverse-routed fiber optic ring, capable of instantaneously switching traffic around damaged facilities. The Company has arrangements with multiple splicing contractors for rapid deployment and restoration of fiber optic cables. Separate facilities support the PSTN and broadband network connections to other carriers. In the event that all PSTN facilities are damaged, the central office switch is capable of both TDM and IP formats, providing the ability to reroute PSTN traffic via dedicated IP facilities to other carriers.

The network is capable of managing traffic spikes caused by emergency situations. This is accomplished by maintaining properly sized trunk groups to the PSTN and by providing substantial broadband backbone bandwidth capable of carrying overflow voice traffic in addition to data traffic.

The capabilities and procedures listed above apply to the Company's voice and broadband networks since many functions are intertwined. For example, the fixed, central office generator set provides power to both the voice switching and circuit equipment as well as the DSLAMs, routers, optical terminals and other broadband equipment. The same is true for the portable generator sets that provide emergency power to the voice and broadband equipment located in the field network nodes. Personnel call-out and response is identical for situations that interrupt the voice as well as broadband network.

Vaughnsville Telephone Company (SAC 300663)  
Line 1210, Terms and Conditions for Lifeline Customers

Vaughnsville Telephone Company (SAC 300663) has established terms and conditions for Lifeline customers that incorporate the federal and state requirements as documented in its Basic Local Exchange Service Tariff PUCO No. 4, Section 5, First Revised Sheet No. 1.

*The Company shall provide Lifeline service as defined in 47 C.F.R. § 54.401 (a) on a non-discriminatory basis to all qualifying low-income customers. The Company's Lifeline service offering shall comply with all applicable federal and state laws, including, but not limited to, 47 C.F.R. Part 54, Subpart E; the FCC's Lifeline reform order (Report and Order released February 6, 2012, WC Docket No. 11-42, et. al) and any subsequent clarifying orders; Section 4927.13, Revised Code; Rule 4901:1-6-19, Ohio Administrative Code; and, the Commission's nontraditional Lifeline service order (Finding and Order adopted May 23, 2012, Case No. 10-2377-TP-COI) and any subsequent entries and/or orders.*

In 2014, the company began participating in the National Lifeline Availability Database (NLAD). This database is designed to help the company identify and resolve duplicate claims for Lifeline Program-supported service and to prevent future duplicates. All applications for Lifeline service are verified using NLAD in order to prevent duplicate service from being established.

The Lifeline discount applies to Basic Local Exchange Service (BLES) as defined by Ohio Revised Code 4927.01(A)(1). For residence customers, BLES consists of local dial tone service, flat-rate telephone exchange service, touch-tone dialing service, access to and usage of 9-1-1 services, provision of a telephone directory at no charge, listing in that directory, per call caller identification blocking services, access to telecommunications relay service and access to toll presubscription, interexchange or toll providers or both, and networks of other telephone companies. The company also provides an optional toll denial feature at no additional charge. The rate for residential BLES is \$16.00 per month as of January 1, 2016.

The company applies the Lifeline support amount as follows: first, to waive the End User Common Line EUCL Charge of \$6.50 and second, to discount the residential BLES charge with the remaining balance of the support amount, in compliance with 47 CFR §54.403(b).

Residential BLES customers may also add optional service features and subscribe to a variety of long distance calling plans offered by the company. No discount is applied to these services because the entire Lifeline support amount is exhausted after applying it to the EUCL and BLES charges.
