RE: 16-0253-GA-BTX

Duke Energy wants to run a 30 inch wide, high-pressure pipeline directly through my densely populated neighborhood of Pleasant Ridge and Amberley Village in Hamilton County. There are three proposed routes, each of which encompasses schools, places of worship, shopping areas and hospitals. A dangerous high pressure gas line does not belong in a suburban area housing tens of thousands of people.

Duke Energy has not explained why it needs a pipeline that can serve 2,000,000 households when it provides service for only 500,000 customers in the tristate area of S.W. Ohio. Meetings held at different community venues have not yielded satisfactory answers from Duke representatives.

Please decline Duke Energy's request to complete this dangerous project. A different route needs to be selected based on community input.

Sincerely,  
Kathryn Clarisey
