COMMENTS: We are writing to voice our concern regarding the 30" 700psi natural gas pipeline proposed by Duke Energy. One of the three routes proposed will pass not even 25 feet from the front of our home. We attended the informational meeting in Blue Ash, Ohio on June 15th, 2016. The maps of the three proposed pipeline routes were not labeled and were not arranged in any obvious sequence. No one at Duke gave us any information regarding the pipeline's safety or necessity. We walked away feeling Duke's only reason for this meeting was to gather information from concerned residents. On June 28th, 2016 we attended a City of Reading Council Meeting and witnessed the Resolution #2016-45R Unanimous Passage, Expressing Opposition to Duke Energy's Central Corridor Pipeline Extension Project.

As residents of Reading and Hamilton County we oppose this project in its entirety. We challenge its necessity, safety, and negative impact on property values. Who in their right mind would want to live a few feet from a potential time bomb?

We question the necessity of the pipeline based on an agreement reached on June 29th, 2016 creating the North American Climate, Energy, and Environment Partnership. Leaders Justin Trudeau, Barack Obama, and President Enrique Pena Nieto announced at the North American Leaders Summit in Ottawa, Canada, a joint goal of 50% Clean Energy by 2025. This pipeline will be obsolete before it is finished, it will present a dangerous environment, and should not be installed near anyone's home.

COMMENTS: I am opposed to the pipeline. I feel it is unnecessary, unsafe and will negatively affect property values any where close to the vicinity of the pipeline. I have attended several meetings and have yet to learn of the necessity of the pipeline. I have learned the pipeline would be dangerous and has the potential to destroy and create a crater within 1500 feet of the explosion as was witnessed in California. This could destroy me, my house and a big part of my community. Just this week the U.S., Canada and Mexico agreed on a goal of 50% clean power(renewable energy source) by 2025. I feel Duke, as a responsible public utility, should be moving their efforts toward renewable energy sources rather than releasing more carbon into our atmosphere. Please do not allow this pipeline to be installed at all.
