Dear Ohio Power Siting Board,

I attended the information meeting at the Blue Ash (golf course) Conference Center, and I have thought about the project a lot.

I am opposed to your choosing the "Central Plan" for the pipe that will run down Ridge Road. This is a heavily populated route which passes schools, community centers, churches, and other heavily-used places. In addition, you would have to cut down many old, beautiful trees and mar the landscape. You need to route the pipe through less populated areas and areas with fewer places where large numbers of people congregate. This is a real safety issue as well as an environmental one,

Sincerely,
Stephanie Kogan
