RECEIVED-DOCKETING DIV

2016 JUL 19 PM 2:55
Dear Mr. David Goodman, Director, Ohio Development
Services Agency, PUCO

As a key member of the Firing Board, please say
"NO" to Duke Energy's Disastrous pipeline proposal
on the June 3rd vote.

As residents of Blue Ash, we strongly oppose all routes
proposed by Duke Energy to install massive 30 inch gas
pipes with extremely high pressure through congested
communities of hard working families including
elementary schools, playgrounds, homes, parks, churches
and office buildings. There is a history of explosions and
leaks with recently installed pipes that killed and
injured hundreds of innocent men, women and children.
Duke Energy can not guarantee our safety.

Please do something "right" for the citizens of Ohio
who are doing their best to provide a safe and decent life
and making a positive contribution to society. Why do
they have to be afraid of a ticking time bomb under
their feet.

Please require Duke Energy to install their pipelines
in unpopulated areas.

Thank you

Sincerely,

Karen & Leonard Lind
