To Whom it may concern;
Public Utilities Commission,

I am definitely opposed to
DPL's plan to increase the
consumer charge more than three
times. I would love to see DPL
increase renewable energy and
energy efficiency programs. DPL
should not punish customers
who reduce their usage by
increasing rates.

Case # 15-1830-EL-AIR

Thanks,
A. Stunt

4808 Atwood Ave, Kettering OH, 45429

To whom it may concern at Dayton Power & Light and
the Public Utilities Commission,

My name is Dayna Abrams and I am
a resident of Kettering. I enjoy living
in this community and I especially
enjoy the fact that my bills are affordable.
It has come to my attention that you
are trying to increase the customer charge
by more than three times the current
rate. I am against this charge. If you
are charging everybody a flat rate for the
energy they use, then it is not fair to
those who do not use as much energy.

Instead of charging more money, you
should be encouraging the use of
energy efficient products. I have a 9
month old daughter and I would like
for her to be able to grow up in
a cleaner world. I hope you can help
achieve that by increasing your renewable
energy and energy efficiency programs.

I hope you have a blessed day. I know
you will do what is right for your
customers.

Thank you,

Dayna Abrams

To: Public Utilities Commission
From: Sharon Kline
Date: August 2, 2016
Case Number 15-1830-EL-AIR
Subject DP&L's Increase of the "Customer Charge"

I am writing to object to the Dayton Power & Light's plan to increase the "customer charge" from \$4.25 a month to \$13.73 a month. Instead of paying \$51 a year we will be paying \$164.76 a year regardless of how much energy we use. This "customer charge" will increase by 223%. This price increase eliminates the incentive to conserve energy since it is a flat rate monthly charge. I would like to see DP&L increase their renewable energy and energy efficiency programs.

Aug., 2, 2016

Dear Public Utilities Commission,

I would love to see DP&L increase their renewable energy and energy efficiency programs.

Benefits such as taking old refrigerators away and giving cash incentives was wonderful. Giving Kits away for free with LED light bulbs, etc was much appreciated but more is needed.

I'd like to see DP&L start changing the attitude of their customers toward night lighting. The do's and don'ts.

Start taking more responsibility for the awful light pollution here in Dayton.

Please, DP&L should encourage energy efficiency and reward those who reduce their use.

Sincerely,

To Whom It May Concern,

I want to see DRTL increase their renewable energy and energy efficiency programs. DRTL should be encouraging energy efficiency, not punishing customers who reduce their use.

- Julie Ann Joser

4841 Shady Hill Ln.

Aug. 2, 2016

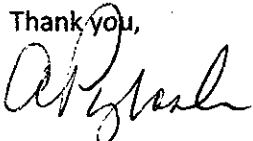

To Whom It May Concern:

I am troubled to learn that Dayton Power and Light is proposing to increase the mandatory residential fees for all residents – no matter their energy usage. During these tough economic times, most citizens are still trying to dig themselves and their households out of the damage from the recession. In fact, many of us would still consider ourselves in the plight of the recession.

No matter whether citizens have full-time employment or are living off of retirement, they are struggling to make ends-meet. Most households cannot afford to add another "bill" (which is what these costs add up to) to their budgets, let alone bail out a utility company. No one bails me out when I take a risk that doesn't pay out.

Please encourage Dayton Power & Light and other utilities companies to look for other ways to cut costs and conduct business.

Thank you,

 (Abby Pytosh)

Dear PUCO,

I was visited today by a young man sweating in the August heat requesting that a letter be written showing my dissatisfaction in DP&L plan to raise customer surcharge rates from around \$4 to nearly \$15. While I don't typically encourage this sort of door knocking, in fact we have a No Soliciting sign posted on our door, but this young man moved me enough to write this letter. He has informed me that DP&L has petitioned your commission to raise my customer surcharge over 223%! I don't know about you, but I work hard for my money, and work hard to keep my utilities under control. I oppose Dayton Power & Lights plan to increase the customer charge by more than three times. This would place an undue burden on my family, and feel that it would be a better plan to invest in inexpensive renewable power sources such as solar and wind energy, rather than continue to patch up old failing power plants at a great expense to the community and environment. It is not in the best interest of the citizens of this community, or the great state of Ohio to force these charges upon tax payers. I do not have the ability to choose who provides power to my home, but I do have the ability to speak out at this injustice.

Thank you for your time,

RE: Case # 15-1830-EL-AIR

Dear Sir or Madam,

I just learned of DP&L's intention to increase the Customer Charge three fold!!!

This is an unacceptable and ridiculous increase. Any increase in price should include a component that includes something that will increase efficiency. This flat charge should be eliminated or at least tied to conservation efforts or efficiency programs.

Please review and NOT allow DP&L to increase this Customer Charge.

Thank you.

Sincerely,

DEAR Public Utilities Commission of Ohio.

As a customer of DP&L, I oppose Dayton Power and Lights plan to increase distribution rates billed to customers or increases under the customer charge. I oppose the request of DP&L to establish three new riders: the Uncollectible Rider, allowing the company to recover the actual amount of bad debt costs instead of an estimate in base rates; the Regulatory Compliance Rider, allowing recovery of costs associated with unforeseen regulatory changes; and the Storm Cost Recovery Rider, to allow recovery of costs incurred as a result of major storms. I have faith that you and the PUCO staff will diligently evaluate the proposed rates and keep the future of Ohio and its citizens in mind while preparing the report to the commission.

Thank you

Leslie Glick

To whom it may concern:

6/2/16

Having recently heard of DP&L's plans to nearly triple customer charges to compensate for the aging and under-maintained infrastructure I felt the need to voice my frustration.

It's the responsibility of any successful company and an ability to continuously reinvest in its technologies and equipment to stay viable. Seeing as this aspect of DP&L's operations has been poorly planned, and executed I do not see it as now being the responsibility of your captive customers to bail you out. I respect the need to improve but if done properly you can do it without a complete pass thru to your customers.

Sincerely

Matt Jahn

3 August 2016

To the Public Utilities Commission,

I'm writing to let you know that I am not only appalled that DP&L is hiking up ~~prices~~ prices to cover the cost of coal plants' inefficiency, I'm frustrated and disappointed that coal plants are being used at all! It's 2016, folks. We have the technology to implement green energy plants and it is up to you to have the decency and forward-thinking to do so.

Increasing customer charges to cover the inefficiency of coal is cowardly and predatory. I would like to see a 180° turnaround from this... I would like to be proud, not ashamed of DP&L. When I hear that DP&L is sponsoring a symphony or other arts program, I don't want to feel like I have to withhold my applause because I feel that the company is backwards, pollutive, crooked, and predatory. I'd love to be able to brag about how my city is a leader in green energy use! I want to silently thank DP&L each time I turn on the lights and think, "all this from sun, wind, and water." We can do better.

You can do better and you must. I hope to hear much better news about this company in the future.

Thanks for listening,

DPSL,

As a young Student I am growing very concerned with the future of this city and its ability to provide clean, affordable energy to its residents.

Increasing prices as drastically as DPSL plans to will not only hurt your customers financially but your companies future as well. I support futuristic energy methods and ideas that may one day put your company out of business. I suggest you keep your cost of energy low and plan to evolutionize your energy production by implementing cleaner more affordable energy
