To WHOM IT MAY CONCERN:

I am opposed to Dayton Power and Light's plan to INCREASE the customer charge by more than 3X's...ARE YOU KIDDING ME??? THAT IS OUTRAGEOUS!

I live on a fixed income and OPPOSE this, you are driving out people that can barely survive as it is and a triple charge will put people homeless or without the proper things people need for health or living. I am very very very disappointed that you people/company are NOT encouraging energy efficiency, instead you are punishing customers who reduce their use.

To Whom It May Concern:

As a lifelong DP&L customer who tries very hard to conserve energy so that our bill stays as low as possible, I am pretty honked off at the idea that you would raise the so-called "customer charge" to \$13.73 per month.

Any efforts on our part to save money would be lost because of this, and it's not like we can shop around and just get on board with another provider. What good has it done us to make sure the appliances we have had to replace were energy efficient if we have to pay more anyway?

With climate change and renewable energy in the news on a daily basis, why hasn't DP&L been more proactive?

Sincerely disappointed,

A handwritten signature in black ink, appearing to be 'Karen Allen', written over a horizontal line.

Karen Allen

DP+L
Ref. Case #15-1830-EL-Cir

Being retired and on a fixed income, I'm apposed to Rayton Power & Light's plan to increase the Customer Charge by such a large amount.

DP+L should try and find better ways for more energy efficient programs.

This increase would hurt many people on fixed incomes & those struggling to keep their bills current.

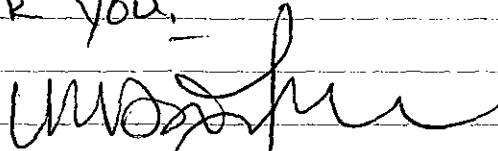

Melanie
1272 Central Park Ave
Kettering OH 45409

To Whom it may concern:

I'm writing to tell you that I am against Dayton Power & Light's plan to increase my customer charge. As a loyal customer of 5+ years, I am upset to see this increase further. There are many competitors in the area so they should be worried about client retention.

I would like to see more energy efficient programs. As a service provider, this is something you should encourage but you are infact punishing us, for conserving energy. Saving money each month is always our goal as we are on a fixed income.

Thank you,

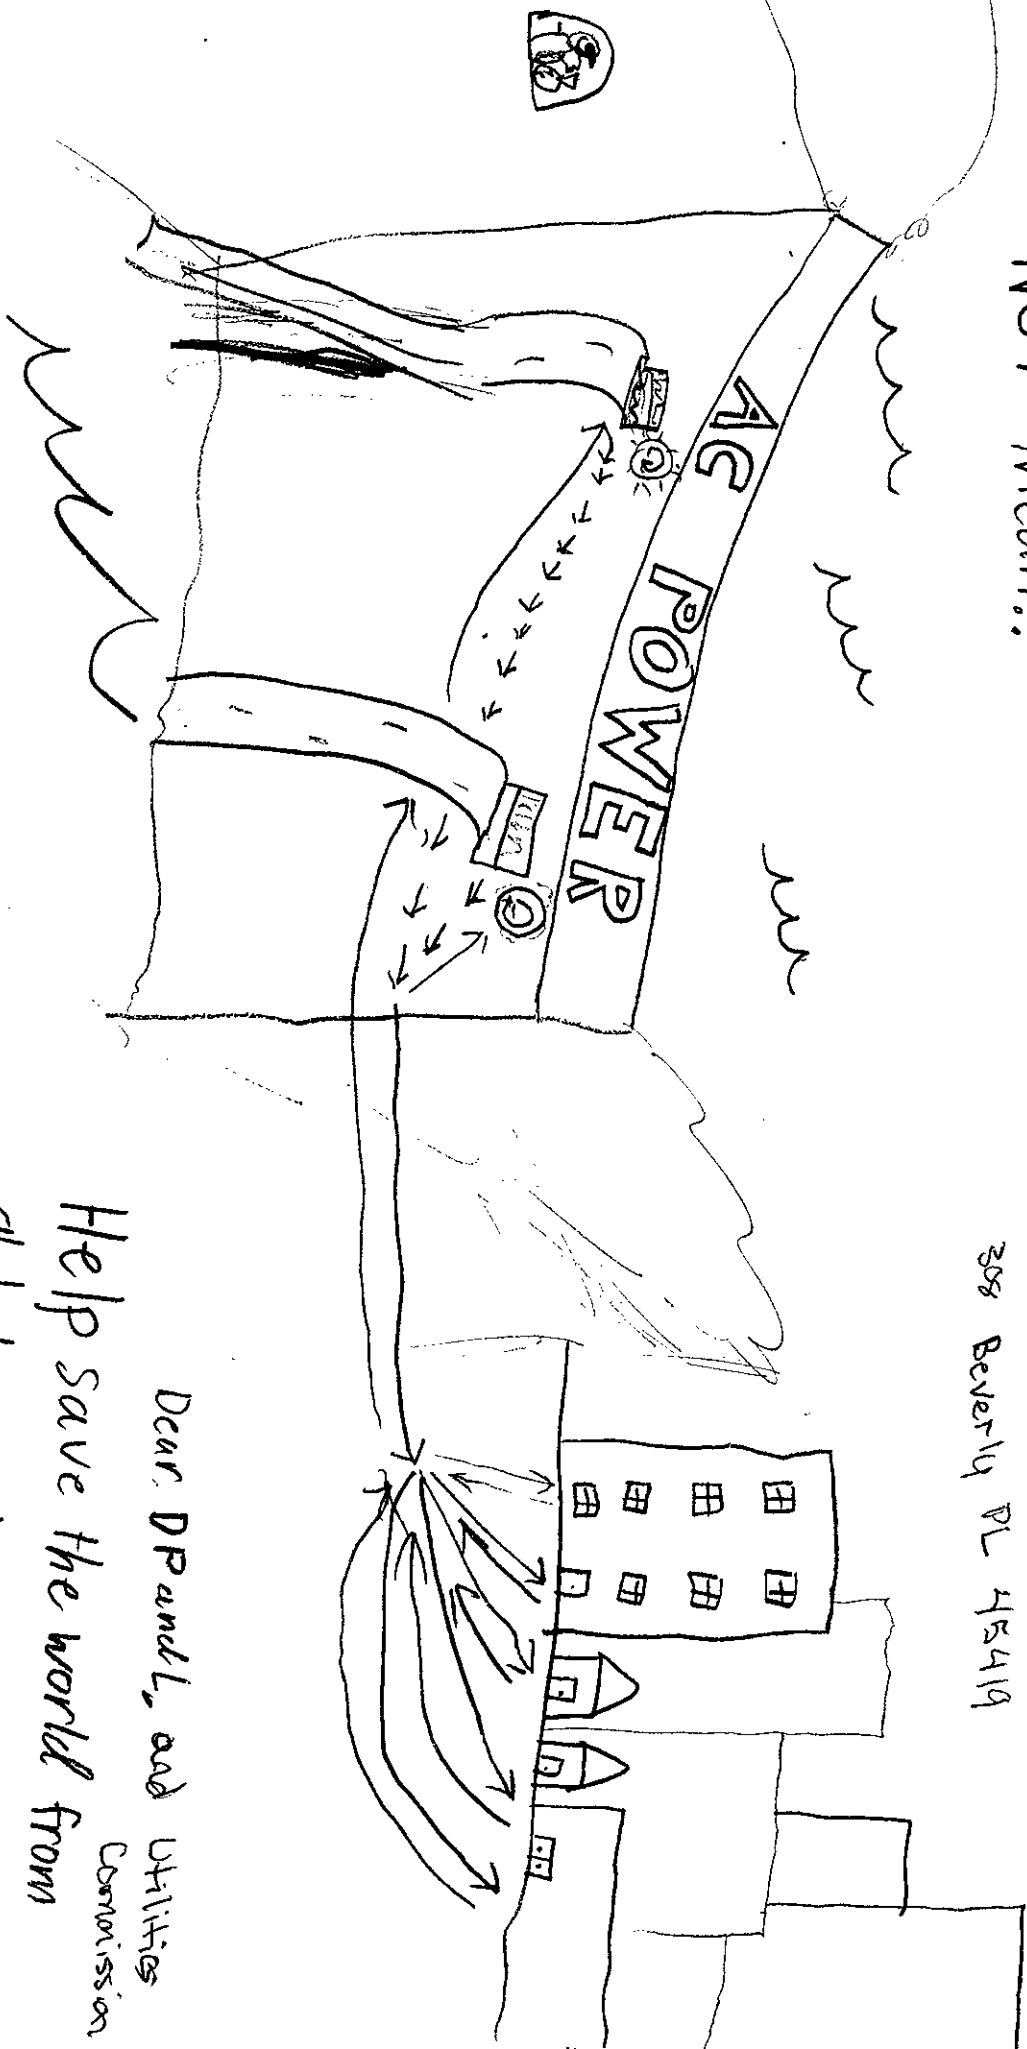

1216 Elm Dale Dr.

RE: Case # 15-1830-EL-AIR

It has recently been brought to my attention of a proposal to increase a portion of my DP&L bill. I pay for usage - which fluctuates monthly - and also pay for a delivery charge - which is totally acceptable. I have often wondered what the "customer charge" was for. So now, my understanding is, this customer charge will be triple what it is currently. So, it appears to me that I am being charged more ~~for~~ being the same customer. Has nothing to do with usage. This is like being punished for being a consumer who has no other choice other than Dayton Power and Light. I already live on an extremely tight budget and carefully monitor my utility usage. This feels like yet another attack on middle America. I feel like that utility companies should be so much more focused on more renewable sources of energy. That, I could get behind and support. Thank you for your consideration.

Deborah Gibson
1244 Melrose Ave
Kettering OH 45409

Sirs

Re # 15-1830-EL-AIR

I'm opposed to DP&L's request for
increased customer charge.

Renewables and efficiency are the future of energy.
Coal is dead and the industry is dying as it should be.
Anything else is merely postponing the end of add
energy technology and the environmental destruction
is caused.

We can all breathe a bit easier when the past
is safely behind us.

Dear P.U.C.O.,

As an Ohio Citizen I urge you
to stop D.P.+L from increasing the
current customer charge by 223%. I
am a single mom hoping to get my son
into college in the next few months. Every
dollar I can save will help that cause.

Also, I don't believe I should be
financially burdened because D.P.+L
hasn't increased its energy efficiency while
I have reduced my usage.

Please stop D.P.+L !

Thank you

Teresa Ward
2864 Crescent Blvd
Kettering OH 45409

To whom it may concern,

Your recent proposal to increase the customer charge by 223% is unnecessary. Do you want to be perceived as criminals? I do my part to conserve energy not only for environmental reasons, but also for financial reasons. By your proposed increase, how are any of your customers going to feel comfortable using your service. Don't call it a "customer charge" if I'm not agreeing to it as your customer.

DP&L should be increasing their renewable energy + efficiency programs, not punishing the customer, especially people like me who are attempting to reduce their use.

Regards.

Re: Case # 15-1930-EL-AIR

Dear Sir or Madame;

The use of renewable energy is something that is essential to the future of our state, country and planet. Our energies and resources should be focused on the research, development, implementation and growth of renewable energy. Continuing to support energy resources that are proven to be dangerous and unsustainable is more than foolish; it is wasteful, ignorant and dangerous. Our future depends on the decisions made today and making a clear stance against what companies such as DP&L are doing.

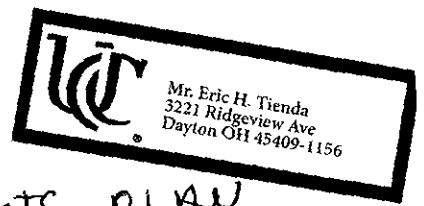

please stand with our children, their future and send a clear message that non-renewable energy sources such as coal are not worth the short term greed and profits.

Best Wishes! Much Thanks,

W Bixler

CASE # 15-1830-EL-AIR

As a DP&L customer, I'm appalled that Dayton Power and Light is trying to increase my current customer charge by more than 200%.

DP&L has an OBLIGATION to increase their use of renewable energy and more energy efficient programs but their customers do not have the responsibility of taking on the costs of their basic operations.

It's a sad sign of the times that corporations get away with murder while the typical customer is more and more frequently dealing with monopolies where there are no options but to bend to every demand that these corporations make.

I run a business myself. Whenever I have to make changes to production and manage my supplies and resources, I recognize those are basic costs of operation that I'm responsible for. Since I'm not a utility, I can't (nor would I) demand that my customers pay basic costs of operations.

Can you imagine if every business in America used this unethical approach with their customers? No wonder the rich continue to amass record amounts of wealth while people like myself and my neighbors continue to struggle from day to day.

It's up to the Public Utilities Commission of Ohio to put its foot down and remind DP&L that they are responsible for their own operating costs in running a business and that those costs shouldn't be footed by their customers.

They have an obligation to work in a way that is energy efficient. I have an obligation to pay for the actual energy that I use as their customer.

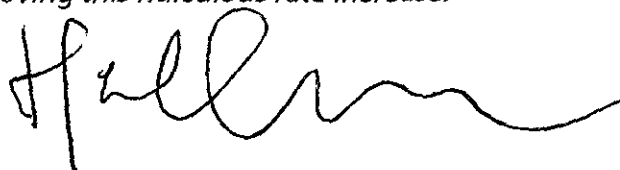

What's next? DP&L adds a mandatory surcharge to pay for the CEO's new car? Or maybe we all foot the bill for a new break room for those at the top of the corporate chain in DP&L?

To pass this cost onto their customers is reprehensible and the point of regulating these corporations is to ensure that they do NOT abuse their positions of power and continue to rake their customers over the coals any more than they already do.

DP&L customers should pay for the amount of electricity that they use. Nothing more, nothing less. That is the customer responsibility and this represents a slippery slope for random, unnecessary yet MANDATORY charges.

I hope you will see this as what it is: A public shakedown of DP&L's customers and you will do the right thing in NOT approving this ridiculous rate increase.

Sincerely,
Don Pendleton

To whom it may concern,

I've been made aware of DP&L's intension to increase my mandatory fixed fee's by an incredible amount of 200%+! As a private home owner, I can not understand the justification for such an extreme rate increase.

We adhere to methods of conserving energy in our home such to maintain as low a monthly bill as possible. This behavior should be rewarded. I'm not aware how DP&L increases their own renewable energy and energy efficiency programs. This would go a long way to making such fixed rate increases for their customers unnecessary.

Sincerely,

Daniel F. Fitch

2757 Hilton Dr.

Kettering, OH 45409

I believe that Dayton Power and Light should aggressively increase its production of renewable energy and intensify its energy efficiency programs.

I am strongly opposed to D.P.&L's proposal to triple the customer charge.

There is ample evidence that there is no way to burn coal without significantly damaging our environment. D.P.&L. and the state of Ohio have lagged behind other states in implementing clean, eco-friendly power production. We shouldn't have to pay a higher customer charge to finance their too little, too late efforts.

Gentlemen:

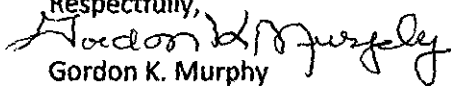

Ref. case number 15-1830-EL-AIR

I oppose Dayton Power and Light's (DP&L) proposal to increase mandatory residential fees, which they call "customer charge", by 223%. In other states, this approach has led to higher customer costs, particularly for low-use and low-income customers.

I would like DP&L instead to increase their renewable energy and energy efficiency programs, thus encouraging energy efficiency rather than punishing customers who reduce their use for a variety of reasons.

Thank you for considering this letter, as well as those of other citizens who oppose DP&L's proposed action.

Respectfully,

Gordon K. Murphy

To Whom It May Concern:

I'm writing to express my concern about Dayton Power and Light's plan to increase the customer charge by more than three times the current rate. This is unwarranted and unjustified, given the decreasing cost of fossil fuels – the primary source of power in this state. I would much prefer that DP&L increase their use of renewable energy and energy efficiency programs.

I strongly encourage the Public Utilities Commission to support development of renewable energy as a major industry in Ohio. This is the new green industry that will put Ohio back to work.

Thank you for your consideration.

Dear Commissioners:

I have become aware that Dayton Power & Light is petitioning the commission to raise the "customer charge" by more than three times. I am vigorously opposed to that increase and any other increase they would like to get passed.

I am involved in the commercial construction business and for the last several years, DP & L has been promoting energy efficiency.... Which is a good thing. By imposing this increase, they will punish those who have been striving to save energy.

This increase would not only hurt the individual homeowners but it would raise the cost of doing business in Ohio, further driving businesses out of state or out of business.

Regardless of federal mandates, do not pass this increase.

Thank you.

Dear PUCO Commissioners,

As an Ohio Citizen, in the DP&L service district, I urge your denial of Dayton Power & Light's plan to increase the customer charge by more than three times. DP&L's proposed charge is far greater than the other service providers in Ohio. DP&L's request is unreasonable and bad for citizens in Ohio.

Further Ohio was a leader in energy efficiency and renewable energy. The freezing of SB 221 has hurt Ohio citizens — both in terms of cost for energy, but also in terms of dirty air. The PUCO should be enabling greater use of renewable energy and strengthened energy efficiency programs.

Dear PUCO,

I am opposed to Dayton Power & Light's plan to increase the customer charge by more than three times. This increase in charges is simply not feasible, especially when we look at the number of people living in poverty in Dayton. This would undoubtedly place children in undesirable, unsuitable living conditions. These children could then perpetuate the cycle of poverty in which they live. This is simply unjust and cannot be tolerated.

I want to see DP&L increase their renewable energy and energy efficiency programs. The research and development that have been conducted over the years have given DP&L plenty of options from which to choose. It is time for DP&L to step up to the plate, consider, and adopt some of these programs that give hope and provide security to future generations. In accordance with the aforementioned, DP&L should be encouraging energy efficiency, not punishing customers who reduce their use.

Thank you for your time and contemplation of these extremely important issues. The case number being referenced is 15-1830-EL-AIR.

August 10, 2016

To the Ohio Public Utilities Commission,

This is in regards to case file # 15-1830-EL-AIR

I am writing to tell you my displeasure with the fixed rate charges that will affect my household and many other Ohio family homes. We cannot sit back and let bad business be the norm. We need clean efficient energy in Ohio.

I am opposed to the Dayton Power and Lights plan to triple my charges. Lets just add another month to the calendar! Why I am responsible for your bad business practices?

What I'd rather see is a clear plan to increase renewable energy and more energy efficient programs. Instead your answer is to increase my charges... instead of finding a real answer to our energy issues.

Why am I being charged for conserving energy in my home? Dayton Power and Light should be encouraging its customers to be more efficient with their energy use and the efficiency in which their customers use energy.

Seems to me that you would like me to just throw more money at a problem that you have no intention of fixing.

Thank you for your attention to this matter.

Holly Fischer

220 E. Dixon Ave

The Public Utilities Commission of Ohio
to Whom it may Concern,

This is a brief letter of outrage - what is this
nonsense about increasing Dayton Power & Light's
charges by more than three times - WHAT!
This may be what DP&L wants HA!

How about what we consumers want and by the
way what will be good for DP&L customers will be
right for the planet.

I speak of an increase in their renewable energy
and energy efficiency programs

DP&L should be encouraging energy ef-
ficiency, not punishing customers who reduce
their use.

Case # 15-1830-EL-AIR

A Disappointed Customer,

Sam Townsend

112 Thurston Blvd
Dayton, Ohio

Dear Public Utilities Commission,

I'm opposed to the electric utilities like AEP and Dayton Power & Light using mandatory residential fixed fee increases to cover their poor management of our utilities. It seems like an easy fix relying on the customer to fix the poor planning and understanding of the future of energy markets.

We have worked hard as a family to instill energy conservation in our children's habits, turning off the lights when not in the room, using more energy efficient light bulbs and appliances, and talking about renewable resources. To not see the utilities reflect these ideals by punishing the customers who reduce their use and increase energy efficiency in their homes is despicable and serves as a poor example for future generations. Where is the effort of the utilities in sourcing renewable energy and increasing efficiency and to do it with sound business practices?

Concerned Dayton Power & Light Customer,

To Whom It May Concern,

Dayton Power and Light should be encouraged to increase their renewable energy and energy efficiency programs.

I am opposed to the increase in the customer charge by three hundred percent.

Thank you,
Cheryl

Dear Sirs,

CUSTOMER CHARGE INCREASE BY DPL - COMPLAINT

I think it is a disgrace that DPL intends to increase the customer charge by more than three times. Residents are already struggling to manage their finances.

DPL should be concentrating on increasing their renewable energy and energy efficiency programs, not planning to increase the use of coal-burning power plants.

Yours sincerely,

Timothy J. Benford

To Whom it May Concern: -

I am
writing this to oppose the excessive
increase in customer charge proposed
by Dayton Power & Light.

I want to see DP&L increase
their renewable energy efforts and
their energy efficiency programs
rather than continuing to put
money into sources of dirty energy
and air pollution.

Sincerely,
Alison Benford

August 10, 2016

Dear Sir/Madam,

I am writing as a concerned citizen regarding the proposed increase to DP&L's customer's bills. I am opposed to this plan to increase the customer charge by more than three times. I would like to see DP&L increase their renewable energy and energy efficiency programs. DP&L should be encouraging energy efficiency, not punishing customers who reduce their usage.

Thank you for your attention,

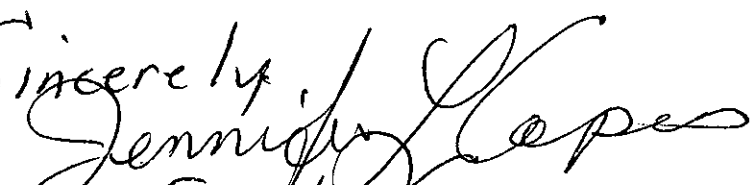

Clark Family

To whom it may concern;

I am writing to inform you that
I am strongly opposed to Dayton Power and
Light's plans to increase my customer
charge by 3 times. DP&L should increase
their renewable energy and efficiency,
not the customers charges. Customers
should not be punished for DP&L's
lack of encouragement of energy
efficient programs.

Sincerely,

Jennifer L. Copus

To Whom it may concern,

I have recently become aware of Dayton Power and Light's plan to increase their 'Customer charge' to over three times the current amount. As an environmentally conscious consumer, I try to watch our household's energy use and conserve wherever possible. It seems this rate increase would unfairly punish customers who reduce their energy consumption. It seems to me DP&L should be encouraging customers to conserve and use energy more efficiently, not the opposite.

Energy consumption and renewable energy is one of the most pressing issues today, and I would like to see DP&L seeking out and increasing their renewable energy and energy efficiency programs. Our community needs to increase our use of

renewable energy, and our Public Utilities Commission should be leading the way.

I am deeply concerned about and opposed to this customer charge increase. Please review case number 15-1830-EL-AIR and consider customer and community member opinions and concerns.

Thank you,

Orlind Z Glaser
