PUCO

August 30, 2016

15-1830-EL-AIR

Dear Commissioners:

DP&L should not be allowed to pass on the costs of their business operations while paying dividends to their shareholders. The cost of maintaining their facilities and infrastructure are their responsibilities and should not fall back on customers through exorbitant rate increases. Rubber stamping corporate subsidies and profits should not occur when PUCO is approached by utilities for rate increases.

DP&L needs to become forward looking in their investments and corporate policies by increasing their commitment to renewable energy and energy efficiency. It is counterproductive to encourage customers to become energy efficient while charging them more for less consumption.

Utility companies wanted to be independent from municipal ownership. Part of that change gives them the responsibility to run their operations in a manner that maintains their physical facilities. Profits are supposed to be surplus monies after fulfilling their responsibilities and keeping their operation in proper trim.

Thank you.

Pamela Dolence

To Whom it may concern:

Our family makes efforts to be energy conscious and efficient in both our consumption of energy and continuous efforts to recycle and be mindful of what we throw away. The promotion and use of renewable energy and energy efficiency programs are issues that align with our family's energy consciousness and should be issues that DP&L also pursues. We oppose DP&L's plan to increase customer charges at the expense of encouraging energy efficiency.

DP & L, (Case # 15-1830-EL-AIR)

In regards to the increase charge to your customers, it would be more efficient, as in other cities, to increase renewable energy.

I, as a responsible home-owner, take our resources very seriously.

In the winter, I use extra blankets, turn heat down in un-used rooms and have purchased air tight windows. In the summer, I try to conserve energy by keeping the thermostat higher so the air conditioning doesn't run all day long.

We purchased an updated furnace with "zone" heating & air to increase the efficiency & lower the cost of our bills.

Most citizens of Ohio are very aware of what it costs to own a home, keep it maintained and comfortable! With a little bit of help from the utility companies, we can continue to afford a home!

Thank you,
Joy K. Drake

Dear PUCO:

Re: case number 15-1830-EL-AIR

I am opposed to Dayton Power & Light's plan/request to increase the customer charge more than 3x today's rate. Why are they increasing the costs? Alternatively, they should be encouraging energy efficiency, not punishing us for reduced use. I also believe that they attempt to make up costs to offset the fact that other providers can use their systems. Please not allow for such an increase.

Sincerely,

TO THE PUBLIC UTILITIES COMMISSION:

I think we all know it is time to start moving towards renewable energy! I am completely opposed to Dayton Power & Light's increase of the customer charge by more than three times. This is not the ethical way of dealing with things. I want to see DP&L increase their renewable energy usage by creating programs aimed at energy efficiency. There are so many amazing approaches out there that need to be considered. I am willing to pay more money if my energy company was willing to ensure it was going towards renewable energy. We should all be pushing science & the economy towards making these decisions as soon as possible for the future of our planet and our children! We are in this together and the DP&L should be helping to push the community in the right direction. Please consider the citizens that care and work with us to create affordable renewable energy, including case number 15-1830-EL-AIR.

RE: Dayton Power & Light rate increase

Dear PUCO:

I am a DP&L customer of over 10 years, a homeowner, and environmental consultant of nearly 20 years; and I am opposed to Dayton Power & Light's (DP&L's) most recent proposal to increase their "customer charge" fee. While storms and commodity volatility have made this a challenging market for DP&L, a reduction in services combined with a rate increase is not the right answer. Additionally, DP&L should conduct their affairs as a good steward for the environment and increase alternative energy sources, not fight against them. Nor should they penalize the public for making overall reductions in energy use.

Dayton Power and Light needs to Find
other Avenues to increase their Bottom Line.
I oppose any rate hike. our economy is faltering
and people don't have extra money on hand.
This rate hike is completely unfair to DP&L
customers.

John Harbelle

3101 Ackerman Blvd.

Re: Case number 15-1830-EL-AIR

Dear Sir/Madam:

I am opposed to allowing Dayton Power and Light to increase the customer charge by more than three times the current rate! This is appalling! I work hard to earn a living and just keep food on the table. To raise my DP&L rate means less food – it just isn't right. I've taught my children and grandchildren to be conscientious with energy usage.

I want to see DP&L increase their renewable energy and energy efficiency programs, so that I, my children, and my grandchildren don't face energy crises in the future.

DP&L should be encouraging energy efficiency, not punishing customers who are doing the right thing.

Respectfully,

A handwritten signature in black ink that reads "Teresa D. Randall". The signature is fluid and cursive, with the first name "Teresa" and last name "Randall" clearly distinguishable.

Teresa D. Randall
2536 Hazelwood Ave.
Kettering, OH 45419

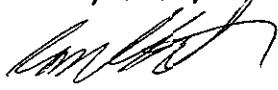

Public Utilities Commission of Ohio,

8/29/16

I am writing a letter concerning the recent proposal to increase DPL's Flat Rate surcharge. It does not seem reasonable that DP&L should be able to triple surcharges associated with flat rate customers if it is no longer a good deal for them. This would never be permissible by the company if the customer made the same demand. The vagueness of the "customer charge" and its increase needs an explanation.

If failure to innovate is indeed the cause of increasing costs beyond supply, it is time for government regulatory mechanisms to get involved, especially in a market with such limited amount of choice.

Thank you for your time,

Aaron Smith

August 29, 2016

Dear Public Utilities Commission:

I understand DP+L is wanting to raise the fixed fees on our monthly bill by approx \$9.50 per month. This should not be allowed to do that. This fixed fee means even if I cut back on my energy usage, I will still be paying this same flat fee. I think there should be incentives to customers who use less energy instead of punishing everyone for DP+L's mismanagement of our utilities over the years.

Thank you for taking the time to ~~see~~ read this and for putting a stop to DP+L's taking advantage of their customers.

Sincerely,

To Whom It May Concern;

I am writing this letter in reference to case number 15-1830-EL-AIR. I am opposed to the proposed increase in customer charges by Dayton Power & Light. I believe we pay more than enough for DP & L to provide safe and consistent power to its customers.

I believe we went through the same thing in 2008 following Hurricane Ike. DP & L asked for and was approved a rate hike to fix aging infrastructures that were affected by the hurricane. The ONLY thing they've done in the last 8 years is come through our neighborhoods and chop any tree close to power lines all to hell. Matter of fact some of my neighbors have chosen to cut their trees down instead of having them butchered by DP & L.

What is DP & L doing about using renewable resources instead of using coal to generate electricity?? Solar, Wind, and even Geothermal systems are cheaper and more efficient and do not hurt the environment. Where are the rebates for installing one of these options? They should be encouraging those customers who utilize energy efficient options rather than punishing them.

I for one will be following up with other resource, especially if this rate hike goes through. DP & L will not gain any customers, rather they will start losing them in droves.

Thank you for your time and consideration.
