COMMENTS: I am opposed to the proposed new natural gas line to run through my neighborhood of Madisonville. I also sent an email to regarding this.

The proposed line would be very near our public schools and would also entail cutting down trees.

We should be working to get off fossil fuels and not add to what we already are using

Subject: Regarding Proposed Gas Line in Madisonville

I am a resident of Madisonville, a neighborhood of Cincinnati. I heard in our community meeting you are thinking of running a gas line through our neighborhood, very close to our public schools. You will also be cutting trees to put this line in.

I am against this proposed line running through a residential neighborhood near schools and eliminating needed trees.

We should be considering alternatives to fossil fuels not re-inventing ways to keep using them. Why don't we start to seek alternatives for residents to get off natural gas and convert to wind and solar? I have already moved my electric to a wind company and would really like to find a way to not use gas.

Martinette Shelton
