COMPLAINT DESCRIPTION:

Board members, I ask you to consider the population that you are serving in Hamilton County regarding the location and placement of the new pipeline and expansion of the current. A rural area with less population would allow you the access that you need without endangering our communities. As a life-long resident of Madeira, I do not want to fear for the safety of my family with the insecurities that are brought on by your motions. I understand that Duke has reduced the size of the pipeline in the original plans, however, it is still unsafe. The safety of the population of these residential areas should be considered as a priority well above expansion. Please consider this your neighborhood while you go through the motions of this application. There is far too much traffic with far too many areas of damage in all of these proposed routes. Residential homes and large areas of businesses such as shopping malls and medical centers could be affected by the placement and possible safety hazards of this plan. I am employed in Evendale as a diagnostic medical sonographer and do not wish for the safety of my patients to be affected by your plans. It is not worth the possibilities of disaster. Thank you, Caitlyn Buckley
Madeira resident Evendale employee
