Re: Case # 16-253-GA-BTX

Dear Director Donlon,

I am writing (again) regarding the pressure pipelines proposed by Duke Energy.

Before I begin, I would like to thank you for not granting the request from Duke for the waiver from holding another informational meeting. I am not the only one who feels that Duke has barely managed to publicize this project and, when they have, it has been in a very surreptitious way.

The fact that they have applied for these two particular routes is very good business on their part. The shortest distance between two points is a straight line & the cheapest expenditure for them. Those routes, however, traversing such populated areas, are frightfully non-safe at the least & totally immoral of Duke to propose at best. The routes for those proposed pressure pipelines should be rural only.

Thank you for your consideration & please protect the people of this area.

Sincerely,

Jack Hazen, MD
