I'm writing today to let you know of our displeasure of the idea of a high pressure pipelines in a residential area. Im a Hvac service tech by trade and I'm well aware of the dangers involved with high pressure pipelines. How could anyone think this could be a good idea unless all other options have been examined. This is a line that should be run in low populated area in the country not 100' from homes, church's, and schools.
Please stop this pipeline immediately !!
