Case No. 15-1830-EL-AIR

I strongly oppose Dayton Power & Light's proposed increase by more than three times to the customer charge.

Dayton Power & Light is literally punishing their customers for trying to reduce their usage.

They should instead be trying to increase renewable energy and encourage energy efficient programs.

Sincerely,

Nancy S. Hall

DEAR POCO,

I AM WRITING IN REFERENCE TO DPA+L
ATTEMPTING TO IMPOSE A MASSIVE RATE
INCREASE. I AM CERTAIN THAT THERE ARE
FAR BETTER ALTERNATIVES TO OUR ENERGY
NEEDS THAN A 200% INCREASE IMPOSED ON
CONSUMERS. IT SHOULD BE OBVIOUS THAT
RENEWABLE ENERGY + EFFICIENCY PROGRAMS
NEED TO BE IMPROVED + ENCOURAGED.
PLEASE HOLD THE ENERGY SUPPLIERS ACCOUNT-
ABLE FOR THEIR COSTS + NOT HOLD CONSUMERS
HOSTAGE TO UNFAIR PRICE HIKES.

SINCERELY,

PATRICK + MICHELLE KEESE
+

CASE # 15-1830-ELAIR FAMILY

1040 UMBREIT CT
MIAMISBURG, OH 45342

Dear PUCO,

I would like to take this opportunity to let you know that I am opposed to Dayton Power & Light's plan to increase their customer charge by more than 300%. Instead, I would like to see DP&L increase their renewable energy and energy efficiency programs. We have personally replaced incandescent lamps in our home with CFL, Halogen and LED bulbs where ever possible, in an effort to reduce our carbon footprint and personal energy costs. As a result, I would like to see DP&L recognize and assist customers in this type of effort, instead of charging consumers more for the reductions in usage and expense they are trying to achieve.

Please reference case number 15-1830-EL-AIR for more information.

Thank you for your time and consideration.

A handwritten signature in black ink, appearing to read "Charles Beverly". The signature is fluid and cursive, with a long, sweeping tail on the last letter.

RE: Case # 15-1830-EL-AIR

Dear Sirs & Madams,

We the citizens of the State of Ohio request you to demand DP&L (Dayton Power & Light), increase their efforts immediately to make energy more effecient. They need to increase their renewable energy and do whatever is in their power to make our state a better place to live for our children & grandchildren.

We also ask you not support their ridiculous request to more than double their customer service charges.

1 of 2

It's time Ohio sets an example
to the rest of America.

Best Regards.

Case Number: 15-1830-EL-AIR

Dear PUCO Commission members,

I am writing this letter in opposition to "Dayton Power and Light's" proposal to ask for an increase that will more than double their current "Customer Service Charge". This request would increase their Customer Service Charge an astronomical 223%. This increase will be the equivalent of receiving an additional monthly bill and will severely impact low income customers. This will in effect remove the incentive to conserve energy and will discourage customers from purchasing items such as LED bulbs and more energy efficient appliances.

I would prefer to see DP & L increase their renewable energy and energy efficiency programs versus punishing customers who are attempting to reduce their use of electricity.

Thank you.

Dear PUCO:

I'm apposed to Dayton Power & Light's plan to more than double their customer service charge, case number 15-1830-EL-AIR.

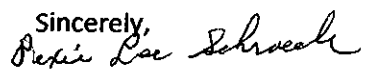

I feel it is time that DP&L learned how to manage their business without ever time they run into a problem their first action is to raise one of their rates. Years back the utilities decided that it would work out for all the Utility Companies to supply the grid and the local company would tack care of the delivering the power.

Since then every time I turn around DP&L wants to raise one item or another, I'm sorry but I have too live on a fixed budget (without any raises) so why can't they.

I realize that the weather has been hurting them, but if they for one thing learn how to control who has to pay for the damage to their property would be a big strive forward. I look out my front window and see 100 foot high trees sitting within fifty foot or less from the power lines. It's not going to help trimming the branches on the side of tree facing the lines if that tree falls.

This is one of many places that they need to use the law and let the property owner trim the top out off the tree at a high that if the tree is blown down by high wind it won't fall on lines.

This is only one example that would save them money and customers would not be loosing electric during storms or where trees are by the roadway that is involved due to accidents.

Sincerely,

Dixie Lee Schroeder

D. P. & L. should be encouraging energy efficiency, not punishing customers who reduce their use.

Jim Smithers
708 Loop St
Miamisburg, OH
45342

Dear Public Energy Commission,

Just as we see dramatic technological advancements and medical discoveries we recognize we are way behind the times with our energy. Coal is becoming a thing of the past and Ohio needs to invest in the future. Increasing customer charges by more than 3 times to save a sinking ship is irresponsible. I want to see DP&L increase their renewable energy and energy efficiency program. DP&L should be encouraging energy efficiency, not punishing customers who reduce their use. Renewable energy can help Ohio reduce its carbon footprint and serve as a model for other states doing their part to combat climate change. Thank you for doing your part in helping Ohioans stand up to DP&L's irresponsible proposal.

DP&L newest increase is presented under the guise of an electric 'security plan,' protecting customers from volatility in the markets.

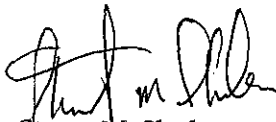

DP&L has a current electric security plan, but it expires at the end of May 2017.

It's not really surprising that they filed for their next one already.

The other three major Ohio power providers — First Energy, American Electric Power and Duke — have sought rate increases as "security" against market conditions and environmental rules.

I'm opposed to Dayton Power & Light plan to increase the customer charge by more than three times.

DP&L and all other providers should increase their renewable energy and energy efficiency programs. There are a myriad of alternative energy sources that can be more developed.

Dear PUCO,

I am writing to let you know that I am opposed to Dayton Power & Light's plan to increase our charges, once again and would like to see them look at other means in order to keep our costs down.

These charges have a tremendous impact on the consumers, and DP&L needs to look at increasing their renewable energy and energy efficiency programs.

People are struggling in this economy, and adding the additional costs will only make it seem that DP&L only has their own profits to increase at the risk of it's consumers.

Dear PUCO

Case # 15-1830-EL-AIR

I am opposed to the increase of
D.P.L. raising prices that they
charge for delivery.

I feel they have the responsibility
to furnish our product with out
this huge price increase.

The customers pay a large
amount and that could cover
all increases of products that
D.P.L. (you) furnish.

Dear Puco,

Regarding case number 15-1830-EL-AIR I am writing to let you know that I am opposed to Dayton Power & Light's plan to more than double their customer service charge. Instead of punishing customers who reduce their use, they should be encouraging energy efficiency and increase their renewable energy & energy efficiency. Raising rates directly affects families that are already struggling to get by. These new rates are similar to adding an extra electric bill a year. Although an extra \$164.75 a year might not be noticed by many my concern is for the families already going hungry because they can barely afford to get by. I understand that there are costs to running business my request is that we make sure that there aren't other options that helps everyone win.

Sincerely,

A struggling college student

Dear POLO,

On regards to case # 15-1830-EL-AIR,
I am opposed to DP&L's plan to increase
their rates.

DP&L should be exploring renewable
energy sources and passing those savings
on to its customers.

Thank you

Sincerely

Rebecca Pine

Dear PUCO,

Please do not allow DP+L to raise their customer service charge. It is unfair to those on fixed incomes who try to keep their bill down by conserving electricity, but are stuck with a high fixed charge.

You should be encouraging people to reduce energy usage not allowing DP+L to charge fixed fees regardless of energy used.

You should also encourage DP+L to increase renewable energy.

Dear Sir/Madam,

I am writing this letter in opposition to the increase by DP&L. I would like DP&L to increase their, energy efficient programs and not impose the increase on customers who try to save their energy. Thanks for your consideration in this matter & taking times to read this letter.

Sincerely,
Bristen D Loh

To Whom It Concerns,

We are writing in support of Ohio Citizen Action and on behalf of our environment. We want to see DP & L increase their renewable energy and energy efficiency programs. DP&L should be encouraging energy efficiency, not punishing customers who reduce their use. We are also opposed to Dayton Power and Light's plan to more than double their customer service charge. We should not have to pay for lazy, short sighted company policy that could be easily countered by wise investments in renewable resources. We hope you see reason, reach into your own pockets, and find the funds you are seeking to change your company for the benefit of your valuable customers.

Sincerely,

Kira and Adam Settingsgaard

I understand That The Dayton Power and Light Co. wants to increase my energy rates by 223%. This is outrageous for an electric company to increase the costs by that much. Many folks are on fixed incomes and can not afford That kind of an increase.

Why, in 2016, are we not looking @ other forms of renewable energy or energy efficiency programs.

It is sad when people have to make decisions about whether to eat or take their medication now we are going to have to put having the lights on, in the mix because DP&L doesn't want to change the way they do things.

Case Number 15-1830-EL-AIR

To whom it may concern:

I am opposed to Dayton Power and Light's plan to more than double their customer service charges:

A 200+% increase is more than absurd. It is the rape of the customers during this economical strain the country is currently in.

I would rather see them increase that Renewable energy and more energy efficiency programs.

DP & L should be encouraging energy efficiency not punishing customer , and driving us to seek other energy companies.

Please do not allow this process to (take advantage of the people) "BIG" business. DP & L doesn't need to pay the multi-million dollars of BONUS' to their company officers.

Thank You,

Bobbie Slicer
