RE: case# 15-1830-EL-AIR

My name is Christopher Burnett, I live at 3095 Ranchfield Drive, in Beavercreek Ohio. I am opposed to DP&L's plan to more than double their customer's service charge. DP&L along with the other power companies are simply the last a few monopolies. If these companies could spend their already gargantuan profits on more efficient and renewable means of power production and distribution, they could ~~also~~ increase revenue in ways that would leave the customer untouched (primarily in the monetary department). It seems that companies such as DP&L consistently ask for more from their customers. (\$) The only "more", that DP&L offers its customers is charges, charges, and more charges.

that in savings. More people will waste energy again, since their bill will be higher no matter what the customers try to do to control costs.

No more flat fees! You are hurting so many people and families. Show you care for your customers and change your policy of passing the buck. You earn profits. Use those!

In all sincerity,

Dayton Power and Light:

Aug. 18, 2016

We already have had it with fees that are fixed on our bills. The reasons they are put on our energy bills boggles the mind.

Energy is an ever-changing field, and as so many companies aren't prepared for that, they think they just pass their own expenses onto their customers. Sure, you just will add more of the ridiculous, made-up fees onto us. Think again.

I'm outraged to know that even though we try to save energy, our bills are not reflecting

Dear PUCO,

I am writing to you about my concern about DP&L plan to raise our power charge by more than three times, I think this is totally ridiculous.

DP&L obviously doesn't want to be accountable for their own bad business decision and pass it on to people who don't even have the opportunity to pick another utility company.

Instead of punishing people for using less energy, they should be encouraging energy efficiency.

One way to accomplish this is to increase their renewable energy and energy efficiency programs, not charge fixed rates.

Thank you for your consideration.  
The case number is 15-1830-EL-AIR.

Sincerely,  
n'Neal

DP&L Protest

DP&L over the past few years has increased parents and fees. They have increased by 223% instead of US (the people) paying \$4.25 we have now been charged \$13.73 a month which raised the annual fee to \$164.76 instead of paying the original \$51. This has upset, startled and hurt US financially. Because some of us may not be able to afford this. We are tired of the lies and constant fee increase. We protest.

Public Utilities Commission,

I am opposed to Dayton Power and Light's plan to increase the customer charge by more than three times. I am a long standing customer and want to see DP&L increase their renewable energy and energy efficiency programs. We have to think about the future and how we can have sustainable energy sources to protect our Earth. DP&L should be encouraging energy efficiency. With this increase you will be punishing your customers who already do everything they can to reduce their energy uses.

Columbus, OH 43215

Dear Public Utilities Commission of Ohio:

I was co-founder of Wright State Eco-Raiders and our purpose was to spread awareness and promote the initiative to recycle and conserve energy and water. I additionally graduated from Wright State University with a Bachelors in Biology.

It has come to my attention that PUCO is trying to increase the cost of our bills to support the inefficient infrastructure of coal power plants. Not only do I disagree with the continuation to utilize the old power plants, I disagree with the use and burning of coal power.

Unfortunately, we cannot continue to utilize coal power. There is sufficient evidence to suggest that the use of coal power among other things is leading us to climate change. September along with the past 15 months have set new hottest month records. The oceans are acidifying due to the increase of carbon in the atmosphere leading to the largest coral bleaching event to the Great Barrier Reef ever. Our predecessors set up our infrastructure to rely on coal power and gasoline. Now we must rectify the wrongs they have committed. We must turn our attention to building infrastructure that will support renewable energy and energy efficient programs. If we pass the torch to our children and our childrens' children they will not have a world that we live in today, additionally we cannot expect them to make a change that we were unwilling to make. By 2050 most of the crops that we grow right now, will not be able to produce fruit to support our populations. Many species of plants and animals are beginning to die off due to hotter temperatures. If we do not do anything now, we will not have a future for our children.

So I implore you, PUCO, make the initiative to be the leader in a change for a better future. Be what we need you to be, be what the world needs you to be for the future of all.

Sincerely,

Re: case number 15-1830-FL-AIR

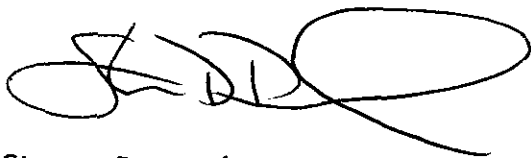

I'm opposed to Dayton Power & Light's plan to more than double their customer service charge.

I want to see DP&L increase their renewable energy and energy efficiency programs, with special emphasis on solar.

DP&L should be encouraging energy efficiency, not punishing customers who look to reduce their usage.

I want to see COMPETITION in the marketplace self-regulate these "customer (pass-through) charges" ... not law.

Changes in the energy market endear higher indirect costs for DP&L, yes, but increases in "customer charges" should never outpace inflation.

case # 15-1830-EL-AIR

Dear PUC,

I'm opposed to DP&L's plan to more than double their customer service charge. In addition, I would like for DP&L to increase their renewable energy & energy efficiency programs. This would surely slow the degeneration of our climate due to the harmful outputs of the way we use energy now. Furthermore, DP&L should be encouraging energy efficiency, & not punishing customers who reduce their use. In fact, those of us who use energy less should be rewarded & not punished.

Please note that the case number I am writing about is 15-1830-FL-Air.

A responsible citizen &  
user of energy,

JT Knowlton  
1318 Parkway Ct  
Beavercreek, OH  
45432

Dear Puco,

I'm opposed to Dayton Power + Light's plan to more than double their customer service charge. I am on a fixed income and can not afford to pay more than I am paying now. Being on disability is hard enough without extra charges from the power company. I have Multiple Sclerosis and need to have access to air conditioning when it is hot out and heat when it is cold because of my arthritis. Most of my income goes to doctor bills, hospital bills and prescriptions. If I have to pay more in service charges that means I may have to go without seeing a doctor or getting a prescription filled which I can not do with my health conditions.

I want to see DP+L increase their renewable and energy efficiency programs. As well as DP+L should be encouraging energy efficiency not ~~penalizing~~ punishing customers who reduce their use. I have been a DP+L customer for many, many years and do not want to have to change energy companies just so I don't have to pay a huge service charge but I will if I have to.

Thank You,  
Kellie Nutsen  
1300 Parkway Ct  
Beavercreek, OH 45422

Public Utilities Commission  
Case# 15-1830-EL-Air  
180 East Broad Street  
Columbus, OH 43215

Dear Public Utilities Commission:

I have been a customer of DP&L for over 50 years and have seen my electric bill increase over the years with added charges not related to my actual electric use. With added supply charges, other delivery charges and DP&L delivery charges equals a much higher total bill. Even when my air conditioner is not on and vacation away from home I see no decrease in my bill.

DP&L should increase their renewable energy and energy efficiency programs along with encouraging energy efficiency and by protecting customers who reduce their use by using energy efficient appliances and turning their thermostats down.

Thank you for your time.

Regards,

  
Phyllis Brunson  
3080 Old Heritage Way  
Beavercreek, OH 45432

Dear PUCO:

Case# 15-1830-EL-AIR

There has been a startlingly large lack of concern regarding energy saving and sustainable energy practices since the concept of Global Warming started. Over the last several decades, there has been a push from both conservative and liberal scientists to alert the world about our over use of non-renewable energy sources. As these current methods continue to run out and the costs to supply these increase as DP&L is now figuring out, the consumer is the one who pays heavily. Since there is no other widespread alternative, we are forced to take our own energy saving initiatives as well as pay for something that will not last forever.

I would like to state my full support to the cause of saving, renewing, and sustaining energy from all energy suppliers worldwide. To start, I would like to see DP&L, be the leader of this program in our state rather than an enabler in the continuation of the energy crisis.

I fully oppose raising our rates to continue the current practices rather than investing what we already pay into renewable sources.

I do not want to be punished for their inability to be the leaders in this opportunity to innovate and ask that you please continue to fight coal and other non-renewable sources of energy on my behalf.

Sincerely,

Christina Allen
