Subject: Don't bail out DPandL!
Date: Monday, November 21, 2016 6:57:24 PM

Dear PUCO,

I do not support Dayton Power and Light's (DPandL) attempt to increase my monthly bill to bail out aging, outdated coal plants. These plants struggle to compete against other cleaner sources of energy and are not competitive with today's market prices for electricity, while they also spew toxic pollution into our air and water.

At the same time, DPandL's request does not include any plans for the future. Inevitably, Ohio's energy sector must become cleaner and more efficient. The Company must begin prioritizing clean energy and energy efficiency projects while also developing plans to help communities where plants are retiring.

Locking Ohio customers into an outdated, dirty, and expensive energy source for a decade, with no plans for the future, is the height of fiscal, health, and environmental irresponsibility. Rather than debating a bailout of costly coal plants, DPandL should instead be sitting down to chart out a sensible move towards newer, cleaner energy sources that have the potential to create thousands of jobs in Ohio.

I hope that you will join me, and the tens of thousands that have already sent comments and letters opposing other utility bailout request, and oppose DPandL's coal bailout as well.

Sincerely,

Leah Roberts

COMMENT DESCRIPTION:

To whom it may concern, I am writing to you today as the voice of 1,000+ workers in Southern Adams County Ohio. Due to being in a deregulated electric market and stringent EPA mandates, myself and 1,000+ other citizens are in danger of losing our jobs. In Southeast Ohio and Northeast Kentucky coal runs our local economy. The closure of Dayton Power & Light's Stuart and Killen Stations would greatly impact local school districts and businesses. Our plants generate tax money for local schools and townships, along with bringing consumers into all the local businesses. Along with the power plants shutting down we would impact barge companies who bring in our coal, limestone mines (limestone is used for environmental control systems), and drywall factories (they use gypsum we produce as a byproduct). I served in the Kentucky Army National guard for 6 years, so I am exhausting every right I volunteered to defend, to try and save our local economy from catastrophe. I have personally emailed the Ohio EPA, Governor Kasich, State Legislators (Ohio and Kentucky) begging for help. I invite anyone willing to listen, to come and talk with us and see first hand how we are being impacted. Let's work together so my fellow co-workers and I can continue to provide safe and reliable electric to the state of Ohio for years to come. I look forward to hearing from you. Concerned citizen, Robert Schwallie
