1 Friday Morning Session,  
2 December 16, 2016.

3 --|--

4 (Witness sworn.)

5 MR. FARUKI: Let's go on the record for a  
6 minute. We're here and all parties participating  
7 have entered their appearance for the second day of  
8 Craig Jackson's deposition.

9 Toward the end of the first day,  
10 yesterday, the parties had some questions about  
11 information that was contained in DP&L's model that  
12 had been turned over to the parties that signed a  
13 confidential agreement. In the time we've had Craig  
14 has been able to identify where in the model the  
15 information that you wanted with regard to generating  
16 plants is located, so I asked him to bring that  
17 information this morning so that he can provide it to  
18 you.

19 And just to finalize where we are with  
20 regard to that, before he takes questions this  
21 morning I'll ask him to provide that information.

22 Craig.

23 THE WITNESS: Thank you. So in the  
24 financial model, now that's the Excel file that we  
25 were referencing yesterday, there we represented we

1 show the net operating cash flows for the coal  
2 assets, and I'm going to give you the specific row  
3 numbers that the net cash provided by operating  
4 activities for these assets are located in. And,  
5 again, this is in the Cash Flows tab of that file.

6 So Conesville is located in row 520;  
7 Killen is in row 616; Miami Fort is row 648; Stuart,  
8 680; Zimmer, 712. If you add up each of those, and  
9 those are the five coal operating plants, you will  
10 come up to the total amount of net cash from  
11 operating activities for the coal plants that was  
12 adjusted out of the FFO.

13 Again, just to repeat, Conesville, row  
14 520; Killen, row 616; Miami Fort, row 648; Stuart,  
15 row 680; and Zimmer, row 712

16 MR. OLIKER: Mr. Jackson, just to clarify  
17 that, did you -- this is Joe Olikier speaking -- did  
18 you make the calculation from the individual  
19 generation units or can you also make that  
20 calculation from line 472 that has the total free  
21 cash flow, or actually would it be line 469?

22 THE WITNESS: You would add --

23 MR. OLIKER: I'm sorry. Actually --

24 THE WITNESS: You would add up the rows  
25 that I had mentioned here, 520, 612, 648, 680, and

1 712.

2 MR. OLIKER: Yeah, and actually I was  
3 moving too quickly, is that line 456, if you have the  
4 document in front of you?

5 THE WITNESS: I don't. I was just  
6 referencing -- I just noted, when I looked at the  
7 file last night, the specific generation plants  
8 because I want you to be able to see as well the  
9 detail that leads up to that net cash operating --  
10 from operating activities for each of the plants. So  
11 I looked at those five lines and those are the ones  
12 that you should add up to determine the adjustment.

13 MR. OLIKER: Okay. We'll go into that a  
14 little more later then. Thank you.

15 THE WITNESS: Sure.

16 MR. FARUKI: So I think where we left it  
17 last night was that Chris was going to pick up this  
18 morning. Is that right?

19 MR. BZDOK: That's my understanding.

20 Can people hear me on the phone?

21 UNIDENTIFIED SPEAKER: Yes.

22 UNIDENTIFIED SPEAKER: Yes.

23 MR. FARUKI: So we're resuming the public  
24 version questioning.

25 --|--

1 CRAIG L. JACKSON,  
2 being by me first duly sworn, as hereinafter  
3 certified, deposes and says as follows:

4 EXAMINATION

5 BY MR. BZDOK:

6 Q. Good morning, Mr. Jackson. My name is  
7 Christopher Bzdok, and I represent the Sierra Club in  
8 this proceeding.

9 A. Good morning.

10 Q. You indicate in your direct testimony at  
11 the very beginning positions that you hold at three  
12 different companies, correct?

13 A. That is correct.

14 Q. DPL, Inc., DP&L, AES U.S. Services,  
15 correct?

16 A. That is correct.

17 Q. Who do you report to in each those  
18 positions?

19 A. I report to Ken Zagzebski, who is the  
20 president of AES U.S. Services and of the U.S.  
21 market.

22 Q. Who do you report to at the DPL entities?

23 A. I report to Ken Zagzebski.

24 Q. Who does he report to?

25 A. So Ken reports to Bernerd DeSantos, and

1 Bernerd is the chief operating officer at the AES  
2 Corporation.

3 Q. Is your compensation allocated in some  
4 way -- let me rephrase that a different way.

5 Does your compensation have sources from  
6 each of the three companies or does it come from a  
7 single source?

8 A. So my compensation is allocated amongst  
9 the different businesses. So my time is allocated,  
10 and when I say I'm the CFO of AES U.S. Services, DPL,  
11 and DP&L, I'm also the CFO of IPALCO Enterprises and  
12 IPL, which is the utility. And then we have the, as  
13 I mentioned yesterday, several generation established  
14 businesses across the U.S. and my time is allocated  
15 across all of those businesses.

16 Q. Are you paid by AES U.S. Services?

17 A. I am.

18 Q. Is any form of your compensation tied to  
19 the financial performance of, let's start with AES  
20 Corp.?

21 A. There is a -- so if I can start, I'll get  
22 back to the AES Corp. if you just give me a moment.

23 So my comp. in the U.S. is tied to the  
24 financial performance of the U.S. market in aggregate  
25 of which DPL and DP&L are a part of. I am also --

1 and that I believe is weighted at 75 percent. And  
2 then 25 percent, which is just standard across AES,  
3 25 percent is from the AES performance.

4 Q. So, just so I'm clear, when you say "the  
5 AES performance," are you talking about AES Corp. or  
6 AES Services?

7 A. AES Corp.

8 Q. Is your time chiefly spent -- let me say  
9 it a different way.

10 Is there an entity or entities in the U.S.  
11 market on which your time is predominantly spent or  
12 is it sort of distributed in a wide sense?

13 MR. FARUKI: Currently, you mean?

14 Q. The question as phrased if you can answer  
15 it.

16 MR. FARUKI: Well, if you need to specify  
17 a time period, you can do that.

18 A. I would just say generally it's spread  
19 across the multiple entities that we have.

20 Q. If I met you at a cocktail party, who  
21 would you tell me you work for?

22 A. AES U.S. Services and providing support to  
23 the businesses that I referenced earlier and hold  
24 positions in those companies.

25 Q. Since your compensation is tied in some

1 way to the financial performance of these entities  
2 does the vacating of the SSR in ESP II have a  
3 potential impact to your compensation if that revenue  
4 is not replaced?

5 MR. FARUKI: What possible relevance to  
6 this case does his personal compensation have?

7 MR. BZDOK: You asked, well, your  
8 colleagues asked all our experts about their  
9 compensation arrangements so --

10 MR. FARUKI: Right.

11 MR. BZDOK: -- this is in that same vein.

12 Q. You can go ahead and answer.

13 MR. FARUKI: Well, they were people  
14 charging as professional expert witnesses. He's an  
15 employee of the company. I'll let a few questions go  
16 on this, but very few, then I'm going to start  
17 instructing him not to answer because I consider it  
18 harassing and an invasion of privacy if you can't  
19 provide a better basis for questioning him about his  
20 personal compensation.

21 MR. BZDOK: I understand your position.  
22 This is the last question in that vein in this  
23 outline.

24 THE WITNESS: Can you just read back the  
25 question to me, please.

1 (Record read.)

2 A. Yes.

3 Q. You indicated in some -- in your direct  
4 testimony and in some of the questions that you had  
5 with Mr. Olier yesterday that you became the vice  
6 president/treasurer of DP&L about a year to a year  
7 and a half before May 2012. Do you recall that?

8 A. Yes, I do. I said I couldn't remember the  
9 exact time but I thought that that was approximately  
10 the right time, yes.

11 Q. So that would range somewhere from May  
12 2011 to late-2010, roughly speaking?

13 A. I believe that that may be correct, yes.

14 Q. So you were in that position prior to the  
15 AES acquisition --

16 A. Yes.

17 Q. -- of DP&L.

18 A. Yes.

19 Q. In that position as vice president/  
20 treasurer of DP&L during the time frame we're  
21 discussing did you also have an appointment or  
22 position with DPL, Inc.?

23 A. Yes.

24 Q. Same?

25 A. Same.

1           **Q.**       So, just so the record's clear, you were  
2       the vice president/treasurer of DP&L and DPL, Inc. at  
3       the time of the AES acquisition.

4           **A.**       That is correct. Prior to and then after  
5       the acquisition, yes.

6           **Q.**       What was the nature of -- you had some  
7       questions yesterday with Mr. Olikier in which you  
8       indicated, and I'm paraphrasing and roughly speaking,  
9       that you were not directly involved in the  
10      negotiation of the terms of that acquisition,  
11      correct?

12          **A.**       That's correct.

13          **Q.**       Did you have any role in terms of  
14      supporting -- did you have any supporting role  
15      relative to that acquisition?

16          **A.**       Yes.

17          **Q.**       Describe that role.

18          **A.**       Providing financial, some financial  
19      projections to our senior management team which I  
20      believe were provided then to the banks that we were  
21      working with in the transaction.

22          **Q.**       What sort of projections?

23          **A.**       Financial projections.

24          **Q.**       Projections generally speaking of a nature  
25      like you're providing in this case?

1           **A.**       Yeah, projections that would provide some  
2 type of evaluation assessment for the company.

3           **Q.**       Very roughly speaking, what was the time  
4 frame of those projections?

5           **A.**       I believe we did a five-year projection at  
6 that time.

7           **Q.**       At the time, and I'm speaking in general  
8 terms based on what you recall, at the time of those  
9 projections was there an expectation that DPL, Inc.  
10 would be able to service its debt postacquisition?

11          **A.**       So I think I'll answer that two ways so,  
12 one, the financial model that we had provided over  
13 was as a stand-alone company, all right, so it would  
14 not -- did not assume any debt or any changes, it was  
15 just this is our stand-alone company, here's the  
16 projections for that company.

17          **Q.**       Subsequent to the acquisition, then, were  
18 you involved in similar long-term financial planning  
19 or projections for DP&L/DPL, Inc.?

20          **A.**       Yes. Yes.

21          **Q.**       And what were the nature of those  
22 projections generally and based on what you remember?

23          **A.**       Long-term, just mid- and long-term  
24 planning.

25          **Q.**       What do you recall, what's mid and what's

1 long term?

2       **A.**       We generally would do a five-year,  
3 sometimes a ten-year forecast, but midterm I look at  
4 anywhere between zero and five years.

5       **Q.**       Was there an expectation in the early  
6 periods following the acquisition that DPL, Inc.,  
7 would be able to service its debt?

8       **A.**       Yes.

9       **Q.**       Was there an expectation at that time that  
10 DPL, Inc. would be able to pay down its debt at a  
11 rate which would enable it to regain investment grade  
12 credit ratings?

13       **A.**       I can't recall the investment -- or, the  
14 credit ratings at that point in time, but our view  
15 was that the cash flows allows us to service the debt  
16 such that we generate enough cash to service the  
17 debt, so I don't recall that there was a view on  
18 paying down debt at that point, again, because the  
19 cash flow supported it.

20       **Q.**       You had a general awareness, did you not,  
21 that there were credit downgrades of DPL, Inc. at the  
22 time of the acquisition.

23       **A.**       Again, I can't remember exactly where we  
24 were rated at the time of the acquisition and  
25 subsequent to the acquisition, but what I can point

1 to is what I said, the projections at that point  
2 suggested that we could meet the debt. But I can't  
3 recall the exact credit ratings and where we were  
4 rated at that point in time.

5 Q. Sure. In terms of general memory, I guess  
6 my question is directional or I will ask a follow-up  
7 question that is directional. Do you have a general  
8 awareness or a memory from that time that there was a  
9 directional downgrade of credit ratings for DPL, Inc.  
10 following the acquisition?

11 A. Certainly since the time of the  
12 acquisition to where we are today there has been a,  
13 yes, I would agree there has been a downward move in  
14 the credit rating, yes.

15 Q. Can you recall from your general memory  
16 and awareness of that time whether there was any  
17 plan, I'm using that term loosely, to rehabilitate or  
18 mitigate or turn around that downward direction in  
19 credit ratings following the acquisition?

20 A. I can't remember the exact timing but  
21 certainly in our last ESP proceeding is where we  
22 began looking at the need for financial integrity so,  
23 yes, I do recall generally looking at ways that we  
24 can improve the overall integrity of the business.

25 Q. Were there plans that involved any

1 measures other than SSR support?

2       **A.**       Absolutely. In fact, we've executed on I  
3 would say several things over the last several years  
4 and I've noted them in my testimony. For example,  
5 the sale of our retail business, we sold East Bend,  
6 that was a plant that we had misaligned interests  
7 with our co-owner, exited out of that. We closed  
8 Hutchings station. So there have been specific  
9 things we have done outside of just requesting what  
10 was at that point the SSR.

11       **Q.**       Any other than what's mentioned in your  
12 testimony that you just described?

13       **A.**       And then the aggressiveness that we have  
14 used to pay down debt over the last, it's really  
15 since 2012 I believe is the date, we've paid down  
16 over \$700 million of debt, so the utilization of  
17 things I identified, certainly the SSR that we had  
18 been collecting. So we've taken a very prudent  
19 approach to reducing our debt level to try to improve  
20 the overall position of the company.

21       **Q.**       Was there an expectation during the time  
22 following the acquisition as to a time frame under  
23 which DPL, Inc. would be able to be brought back to  
24 investment grade?

25       **A.**       I just don't, I don't recall at that

1 point.

2 Q. Was there an expectation at the time  
3 following the acquisition that DPL, Inc. may need to  
4 rationalize capital and operating expenditures at  
5 DP&L in order to ensure that its own financial  
6 obligations can be met?

7 A. Certainly we've been looking at our  
8 capital expenditures, we do that very consistently  
9 relative to our cash flows. So I would say that's  
10 just part of our normal process to look at ways to  
11 incur costs prudently. Certainly, you want to -- you  
12 don't want to do anything that has an impact on  
13 service quality, reliability, you want to make,  
14 again, prudent decisions around potential costs, cost  
15 savings, and reductions to the extent they're  
16 available.

17 Q. Where are those decisions or plans  
18 reflected? And so let me give you a little sense of  
19 what I'm driving at with that question. I understand  
20 that there's a long-term capital plan. I understand  
21 that there's a financial plan. Where are the  
22 decisions about how much money can be allocated to  
23 the capital plan, for example, based on how much, you  
24 know, debt needs to be serviced or paid down, or  
25 both?

1           **A.**       So I'll start on the process itself. We  
2 have a, what I consider to be a bottoms-up approach  
3 to capital budgeting and to our budgeting of the  
4 operating expenses, and that is -- those capital  
5 projects, and the operating expenses, are evaluated  
6 against the cash flows, as I mentioned, that we are  
7 producing from the business.

8                   That is reviewed by the senior-level team  
9 which would include myself, Ken Zagzebski, who I  
10 mentioned earlier, our chief operating officer that  
11 we have in the U.S., so it's at the senior leadership  
12 team with our financial planning and treasury leads  
13 as well involved in that process. That's where we  
14 look at the overall budget, our capital spending  
15 plan, and how our dollars -- do we have dollars  
16 available, and how we're going to spend that cash.

17           **Q.**       And then in what document or plan or model  
18 are those decisions reflected?

19           **A.**       Well, the model that we have is our -- the  
20 plan that we are moving forward with. There's -- I  
21 can't reference a specific document that documents  
22 the decision that we made to not do this capital  
23 project versus this capital project. The financial  
24 model that we have presented is the plan that we  
25 propose to -- we propose in our filing.

1           **Q.**       Contingent on the outcome of this case.

2           **A.**       Contingent on the outcome of -- yes, that  
3 is correct. Contingent on the outcome, assuming we  
4 get the outcome we have requested, certainly that is  
5 our plan.

6           **Q.**       Are there interim plans of this nature  
7 that are prepared in between cases based on  
8 circumstances at the time?

9                   THE WITNESS: Can you repeat that  
10 question, please.

11                   (Record read.)

12           **A.**       We have drafts where we're developing the  
13 models. We have drafts -- I think we've noted we  
14 tend to do updates for commodity curves. Commodity  
15 curves tend to move, especially on the nearer term,  
16 so we're constantly evaluating changes in the forward  
17 curves and the effects that has on our cash flows. I  
18 would say that's one in particular that we evaluate  
19 frequently.

20           **Q.**       Let's look at the factors that you had  
21 some discussion of with a couple of the questioners  
22 yesterday that appear on page 8 of your direct  
23 testimony. And I don't want to recapitulate the  
24 discussion yesterday, I just want to fill in a couple  
25 of additional items on each.

1           The first factor was, that you identified  
2       that's driving the current outlook, is that load  
3       growth has been anemic at best with a combination of  
4       a slow economic recovery and increased energy  
5       efficiency holding down demand for electricity.

6       Correct?

7           **A.**       That is correct.

8           **Q.**       What was -- in the time period shortly  
9       after the acquisition, to the extent you remember and  
10      in general terms, what was the expectation about the  
11      pace of economic recovery at that time?

12          **A.**       I believe at that point in time we were in  
13      the 1 to 2 percent range expectation of growth.

14          **Q.**       Just for clarity, is that load growth or  
15      economic growth?

16          **A.**       That is our load growth. So megawatt-hour  
17      sales from a distribution perspective.

18          **Q.**       And was that expectation, did that  
19      expectation, to the extent you remember and in  
20      general terms, include the effect of energy  
21      efficiency mandates or programs?

22          **A.**       I believe it did, yes.

23          **Q.**       Is it fair to say, then, that that 1 to  
24      2 percent expectation for load growth represented a  
25      fairly bullish view on economic recovery?

1           **A.**       Yeah, I would have to go back to see what  
2       the view was at that point in time. I think it was  
3       just an expectation of the general economic  
4       conditions. I believe at that point, I can't  
5       remember the exact timing of when all of this was  
6       occurring, but I know Wright-Patt -- Wright Patterson  
7       Air Force Base was in the midst of an expansion.  
8       Wright-Patt, obviously, is the major growth engine in  
9       Ohio, certainly within DP&L's service territory. I  
10      do recall that that was one of the key drivers behind  
11      our assumption.

12           **Q.**       Two follow-up questions, one is you said  
13      you would have to go back and look. What would you  
14      go back and look at?

15           **A.**       I would just have to go back to see what  
16      information I had, just to see if we had any  
17      additional detail around the load growth.

18           **Q.**       Would you be looking at an old financial  
19      forecast or would you be looking at something else?

20           **A.**       I would just have to see what information  
21      we have out there. I'm not exactly sure.

22           **Q.**       Was there any change subsequent to let's  
23      say early-2012 in the Air Force Base expansion plant?

24           **A.**       The Air Force -- the base did expand out,  
25      and this was through the base realignment and closure

1 process. Where we started to see the load  
2 degradation is in our actuals so that the growth was  
3 not materializing as we had anticipated.

4 Q. Any sense of why?

5 A. Well, certainly one, as I've noted here,  
6 the energy efficiency has been a key driver, and then  
7 secondly, it's just that we've seen just slow, slow  
8 growth especially on our commercial and industrial  
9 classes.

10 Q. You said energy efficiency was a key  
11 driver but you also told me a few questions ago that  
12 energy efficiency was built into the forecast that  
13 led to an expectation of 1 to 2 percent load growth.  
14 Can you explain?

15 A. Yeah. Our view is that the energy  
16 efficiency has had a bigger impact than what we were  
17 anticipating.

18 Q. Any sense of why?

19 A. People taking advantage of the energy  
20 efficiency opportunities whether it's through DPL  
21 programs or programs of their own.

22 Q. The second factor that you describe on  
23 page 8 of your testimony is the Supreme Court of  
24 Ohio's June 2016 decision reversing ESP II, correct?

25 A. That is correct.

1           **Q.**       And I think you told me in a discovery  
2 response that the impact of that decision is  
3 reflected as the difference between the ESP I rate,  
4 which you're not -- the ESP I -- you have to forgive  
5 me because I don't, you know, I'm sort of a visitor  
6 so I don't always remember all the exact names of the  
7 charges.

8                   It's the difference between the charge  
9 that was in place in ESP I and which is in place  
10 again in the SSR that was approved in ESP II,  
11 correct?

12           **A.**       That is correct.

13           **Q.**       And I believe the difference between the  
14 two is \$47 million a year. Does that sound right?

15           **A.**       I believe the SSR was on an annualized  
16 basis, approximately 110 million, and the prior  
17 charge, I can't recall the name of it either at this  
18 point, I think annualized it was 73 million. So I  
19 believe in the range of the \$40 million.

20           **Q.**       I'm going to show you a document that I  
21 don't, it's purely for purposes of refreshing your  
22 recollection, I don't think we need to mark it as an  
23 exhibit, but if that helps you remember, I have some  
24 notes on there but they're fairly innocuous.

25                   MR. FARUKI: Why don't you, since you

1 don't want to mark it, Chris, why don't you just  
2 describe what it is.

3 MR. BZDOK: Oh, thank you.

4 MR. FARUKI: Or I can have him do it. I  
5 just want the record clear.

6 MR. BZDOK: Yeah, I forget about --

7 MR. FARUKI: If he wants to do it first,  
8 then he can do it first.

9 MR. BZDOK: So we're looking at an  
10 interrogatory response to Sierra Club No. 34, just  
11 for the record, which is a narrative response, we're  
12 looking at the public redacted version and I'm  
13 looking at item 2, just to refresh the witness's  
14 recollection.

15 Q. I don't need to enter the response if it  
16 helps you remember.

17 A. Yeah, the only thing I'm -- the note  
18 you've written on here, the change is 47. I think  
19 the math, 110 less 73, is -- that's why I'm saying  
20 it's 37.

21 Q. Got it.

22 And that charge was a rate stabilization  
23 charge.

24 A. It was the RSC, yes.

25 Q. So then the -- so if the net on that is

1     \$37 million, was there an expectation -- so let me  
2     back up.

3             At the time of acquisition ESP I was in  
4     place, correct?

5             **A.**     At that time, yes. Yes, that is correct.  
6     I'm getting the dates lined up. Yes.

7             **Q.**     And so there was an ongoing collection of  
8     \$73 million per year under that charge, correct?

9             **A.**     I believe that that's correct given the  
10    timing. Yes, I believe that's correct.

11            **Q.**     Was there an expectation shortly after the  
12    acquisition in the modeling and things that were  
13    being done that some form of charge of that nature  
14    was going to be able to be increased by \$37 million a  
15    year?

16            **A.**     Well, certainly we filed an ESP not long  
17    after the acquisition and we were requesting a higher  
18    amount than the 110 but, ultimately, that's what we  
19    ended up receiving.

20            **Q.**     Do you remember what you requested?  
21    Sorry, finish your answer.

22            **A.**     Yes. I believe it was 137-1/2 million per  
23    year for a five-year period was our original request.

24            **Q.**     And do you remember when that was filed?  
25    Roughly.

1           MR. FARUKI: If you don't, I don't want  
2 you to guess. If you do --

3           **A.** I can't remember the exact date that we  
4 filed. It was in that -- it was in 2012 I believe.  
5 Late, yeah, it was in 2012 I believe.

6           **Q.** So in the next year or so after the  
7 acquisition there was already an identification that  
8 had been made of a shortfall that needed to be filled  
9 of \$137 million per year, correct?

10          **A.** That's correct.

11          **Q.** And sitting here today the shortfall  
12 that's identified is 145 million; is that correct?

13          **A.** That's correct.

14          **Q.** So fairly early on in this process there  
15 was an expectation that existing commitments would  
16 not be able to be met postacquisition without a  
17 significant additional amount of ratepayer support;  
18 is that fair?

19          **A.** I would say between the time of the close  
20 of the acquisition, actually between the time of the  
21 announcement of the acquisition and the time of the  
22 filing of the ESP, that's where we saw the  
23 degradation.

24               MR. BZDOK: Can you read that answer back.  
25               (Record read.)

1           **Q.**       When you refer to the degradation, what do  
2 you mean? The degradation of what?

3           **A.**       So I'm moving on to some of these other  
4 items, but the view on the market, the forward curve  
5 for gas, expectation for power, dark spreads, and  
6 then obviously the volatility in the capacity market  
7 as well. And --

8           **Q.**       Go ahead.

9           **A.**       One thing I did want to note, too, the  
10 specific factors that we're alluding to here,  
11 obviously what I just mentioned had an impact on  
12 that, but what I'm referencing here to in the  
13 testimony is these are also the drivers that are  
14 driving the negative outlook that the rating agencies  
15 currently have on DPL, so I just want to make that  
16 point as well.

17          **Q.**       On DPL or DP&L or both?

18          **A.**       On both. They're both on negative  
19 outlook.

20          **Q.**       And we'll get into that some more.

21               Let's break down the forward curve  
22 expectations. So, as I'm understanding your  
23 testimony, the degradation of sort of forward outlook  
24 occurred relatively quickly during a time frame in  
25 2011 and 2012; is that fair?

1           **A.**       So, again, my testimony here, this is  
2 speaking to the outlook that we had -- that the  
3 ratings agencies have currently put on us but  
4 certainly, yes, the outlook did change from the time  
5 of the acquisition to the time of the ESP and then,  
6 obviously, as you roll forward to where we are today  
7 we have seen degradation in the forward markets.

8           **Q.**       From your general awareness at the time  
9 and whatever you remember now was there a single or a  
10 couple of big swings that were unanticipated that  
11 drove that?

12          **A.**       Probably a better question for Mr. Crusey,  
13 he's the expert. I don't recall if there was one  
14 answer or one event that specifically caused that.

15          **Q.**       A couple of follow-up questions which you  
16 may also defer to Mr. Crusey, but I just want to know  
17 what you know if you remember anything.

18          **A.**       Sure.

19          **Q.**       Was there an outlook at the time that low  
20 natural gas prices due to shale development were not  
21 going to persist?

22                   MR. FARUKI: This is in 2011 you're  
23 asking.

24                   MR. BZDOK: In the time frame we're  
25 talking about where he identified a degradation, so

1 we're talking about roughly a year after the  
2 acquisition.

3 **A.** Yeah, I wouldn't be in a position to  
4 answer that.

5 **Q.** Was there an expectation during the same  
6 time frame that capacity prices were going to -- let  
7 me strike that and start that question again.

8 On your third factor you indicate that the  
9 May 2016 PJM auction and prior-year auctions in PJM's  
10 RPM capacity market have produced prices well below  
11 the net cost of new entry, correct?

12 **A.** That's correct.

13 **Q.** Was there an expectation during this time  
14 frame that we've been discussing that PJM prices were  
15 going to reach or approach net CONE?

16 **A.** I don't recall that we would reach net  
17 CONE fully in the projections, but certainly I recall  
18 that at the time of the acquisition there was a view  
19 being we would see higher capacity pricing than what  
20 has materialized.

21 (Discussion off the record.)

22 **Q.** I want to move to page 12 of your direct  
23 testimony now. Let me just make a note.

24 Starting on page 12 and carrying over to  
25 page 13, and I'm paraphrasing just to try to be

1 efficient but if I ever paraphrase incorrectly, I'll  
2 look to you or your counsel to let me know, I'm just  
3 trying to keep this somewhat streamlined. You  
4 described in general terms the DMR proposal; is that  
5 correct?

6 **A.** Yes, I do.

7 **Q.** And then you indicate that -- you indicate  
8 that, I'm on line 21 now, as to the things that the  
9 cash flow will be used for, under sub (b) you  
10 indicate that it will be used to make discretionary  
11 debt prepayments at DPL and DP&L. Do you see that?

12 **A.** Yes, I do.

13 **Q.** Expand on what is meant by "discretionary"  
14 because I thought I heard -- I thought I knew but I  
15 was a little confused by some of the answers  
16 yesterday.

17 **A.** So when we talk about making debt payments  
18 at DPL and DP&L, I'm referring to a few things. One,  
19 we have required amortizations of some of our  
20 existing debt so required principal payments that we  
21 have to make, we have maturities on some of our  
22 existing debt, and then, last, we have the ability to  
23 prepay some of that debt as well. Obviously, you  
24 want to make sure that if you're prepaying, that  
25 you're not incurring too much in terms of a

1 prepayment penalty as sometimes is customary with  
2 some of our debt.

3 But when I talk about payments of debt of  
4 DPL and DP&L, I'm generally referring to those types  
5 of payments.

6 **Q.** Is it discretionary as to the amount of  
7 debt prepayment that DPL, Inc. and DP&L would do if  
8 they received the DMR as proposed?

9 **A.** So when I think of discretionary, it's  
10 we're looking to pay down debt at DP&L and DPL, Inc.  
11 The timing of when we might pay down DP&L versus DPL,  
12 Inc. debt may move a little bit but ultimately we're  
13 targeting to get to an overall adjusted FFO-to-debt  
14 as I mentioned yesterday. So when I think and talk  
15 about discretionary, it's around that avenue.

16 Secondly, you know, if there is an ability  
17 to use some of that cash, if the Commission were to  
18 approve it in the order, to make investments in grid  
19 modernization, there could be some discretion between  
20 paying down debt versus using that cash to invest in  
21 grid modernization. But in how we presented the  
22 financials here, we're paying down debt exclusively.  
23 So we have not assumed that we're making any grid  
24 modernization investments in my testimony.

25 **Q.** On page 16 of your direct testimony there

1 are amounts listed, which I will not state, for how  
2 much debt will be reduced at DP&L and how much debt  
3 will be reduced at DPL, Inc. and how much debt in  
4 total would be reduced between the two, correct?

5 **A.** Yes, that is correct.

6 **Q.** So if you can answer, and I guess I'll  
7 look to your counsel as well if not, but why are  
8 those numbers confidential?

9 **A.** That's -- I'm just trying to think if  
10 there's any rationale. There may be an argument that  
11 we could provide that information. I'm not thinking  
12 of one right off the top of my head.

13 **MR. FARUKI:** Yeah, I think the reason is  
14 we didn't want to have a situation from a big picture  
15 standpoint where the total set of figures is  
16 confidential but then we start subtracting from that  
17 and sprinkling various numbers from it into the  
18 testimony and have someone argue Well, now you've  
19 waived confidentiality because the testimony has X  
20 number of figures in it. So that was the reason  
21 really.

22 **MR. BZDOK:** And my question is not an  
23 argument nor is it an attempt to, you know, extract a  
24 commitment relative to that.

25 **MR. FARUKI:** I understand.

1 MR. BZDOK: I was just trying to, for my  
2 own understanding, what the rationale there was.

3 Q. Is it your understanding -- and when I ask  
4 you these questions, it's for your understanding as a  
5 proponent of this testimony and not in any way for  
6 legal opinions or legal commitments that would be  
7 binding on the company. Is it your understanding  
8 that this proposal that you've sponsored, if those  
9 debt prepayment -- that as the company has proposed  
10 the DMR, if it prepays less overall debt, that's  
11 something that the companies would have discretion to  
12 do?

13 A. If the Commission ruled in this proceeding  
14 that we have the ability to use some of the funding  
15 and let's just say for sake of discussion they said a  
16 specific amount for grid modernization, then  
17 certainly there would be less debt paid down because  
18 the Commission in the ruling said use X amount of  
19 dollars for grid modernization.

20 If the Commission did not include that in  
21 the order and they said, "No. DMR is going to be  
22 used for debt prepayments to ensure that we can meet  
23 our interest obligations that we currently have,"  
24 then that's what the use of the DMR will be for, for  
25 the debt prepayments, and to meet interest

1 obligations we have at both DP&L and DPL, Inc.

2 Q. When you're saying that's what it will be  
3 used for, you're indicating that's the plan, right?

4 A. That is the plan, yes.

5 Q. If conditions change, is it fair to say  
6 that plan could change postapproval?

7 A. I mean, our plan is that we are using  
8 those funds for those purposes.

9 Q. Let me try it maybe another way. The  
10 proposal as it's framed currently in the absence of  
11 more specific Commission requirements is to receive  
12 \$145 million a year and then to be able to use that  
13 somewhat flexibly among these different priorities  
14 that you've identified. Is that a fair  
15 characterization?

16 A. Between grid modernization, debt paydown,  
17 meeting interest obligations on debt, that is how we  
18 have proposed it, yes.

19 Q. On page 13 of your direct testimony  
20 starting at line 3 there's a question: "Will the  
21 proposed discretionary debt prepayments include  
22 prepaying debt associated with the generation  
23 business?" Answer: "No," and then there's an  
24 explanation. Do you see that?

25 A. Yes, I do.

1           **Q.**       Why, in your opinion, does it matter that  
2       the discretionary debt prepayments would not include  
3       prepaying debt associated with the generation  
4       business?

5           **A.**       As I mentioned yesterday, we at the DP&L  
6       level, we don't have any debt that's specific to the  
7       generation business. The debt that we raise there is  
8       supported by the assets of the utility, so it's T, D,  
9       and G, so that's the point that we are trying to make  
10      in my testimony.

11          **Q.**       Sure. So I understand the basis for your  
12      position based on the answers that I heard yesterday  
13      and then you reiterated again today. I guess what my  
14      question is driving at is why do you need to make  
15      that point in connection with this request?

16               MR. FARUKI: Chris, that was counsel's  
17      decision. That was my decision. And the answer is  
18      it was based on some of the parties' arguments in the  
19      previous ESP about generation debt and I thought we  
20      should address it in this case. So Craig did the  
21      answer, but I did the question.

22          **Q.**       Take a look at your Exhibit CLJ-7, page 7.  
23      There was some -- I'll wait till you get there.

24          **A.**       Got it.

25          **Q.**       There were some questions yesterday about

1 this page of this exhibit, there were also some  
2 questions about pollution control bonds. Do you  
3 remember that discussion generally?

4 A. Yes, I do.

5 Q. I wanted to just follow up on a couple of  
6 items relative to that discussion. So look at line 3  
7 of page 7 of Exhibit CLJ-7 and you'll see the first,  
8 I guess I'll call it a debt instrument; is that fair?

9 A. Sure.

10 Q. The first debt instrument indicates "PCB  
11 4.80 OH FGD." Do you see that?

12 A. Yes, I do.

13 Q. And "PCB" stands for pollution control  
14 bonds?

15 A. Correct.

16 Q. And "OH" stands for Ohio?

17 A. Yes, it does.

18 Q. What is the significance of that, the  
19 "Ohio"?

20 A. That's just the naming of the debt that we  
21 had.

22 Q. Why is it named "Ohio"?

23 A. I don't have an answer for that. I'm not  
24 sure.

25 Q. Does "FGD" stand for flue gas

1 desulfurization?

2       **A.**       Yes, it does.

3       **Q.**       And that's another word for scrubbers?

4       **A.**       Yes.

5       **Q.**       So is that debt instrument, was that debt  
6 instrument taken out -- let me rephrase that  
7 question.

8               So is it fair to surmise that that debt  
9 instrument was taken out in order to help fund FGD  
10 projects on DP&L power plants?

11       **A.**       As I noted yesterday, that debt was  
12 taken -- we had obviously several capital projects in  
13 that time period, that debt was taken out and was  
14 supported by all of the assets that we have at DP&L.  
15 It's not specific to any one or any generation assets  
16 that we have.

17       **Q.**       Sure. I understand your answer -- sorry.  
18 Go ahead.

19       **A.**       I was going to say, so, yes, part of the  
20 overall capital costs would be -- the FGD is part of  
21 our overall capital costs. It's an asset of the  
22 utility.

23       **Q.**       Sure. And I understand your answer, and I  
24 heard it yesterday as well as to collateral or  
25 security. My question is more as to the purpose of

1 those funds and what they were taken out in order to  
2 accomplish. And is it fair to infer from the  
3 designation "FGD" that they were taken out for the  
4 purpose of helping to fund required projects related  
5 to scrubbers?

6 **A.** It was taken out to help fund capital  
7 projects that we have for general corporate purposes  
8 of DP&L of which the FGD was part of that.

9 **Q.** Who is the -- who's the creditor?

10 **A.** So the debt is on behalf of DP&L.

11 **Q.** You were at the company when those  
12 pollution control, that first pollution control bond  
13 was taken out; is that correct?

14 **A.** It was issued in 2006, yes, I was with the  
15 company at that point in time.

16 **Q.** Did you have a general awareness that that  
17 was going on?

18 **A.** Yes. I believe I did at that point.

19 **Q.** Was it your understanding that those funds  
20 were being procured under a state program?

21 **A.** I was not actively involved at that time  
22 on the treasury side of the business in 2006. What I  
23 do recall is the debt was being issued, again, as I  
24 noted before, on behalf of DP&L and all the assets of  
25 DP&L. But the particulars of the program at that

1 time and what it was being issued under, I wasn't  
2 directly involved in that.

3 Q. Understood. So my question was prefaced  
4 as to your just general awareness. Did you have a  
5 general awareness that those -- that that first  
6 pollution control bond was being issued under some  
7 state of Ohio program?

8 A. At that time, I'm not sure because I was  
9 not actively involved in the treasury side so I,  
10 unfortunately, ten years ago almost so, yeah.

11 Q. Do you have any awareness about that  
12 question today?

13 A. Again, my position is that we have issued  
14 that debt on behalf of DP&L and it's debt supported  
15 by DP&L by all the assets of DP&L which is consistent  
16 with all of the debt that we have at the utility.

17 Q. Do you have any understanding now or then  
18 as to whether there are certain tax-related benefits  
19 provided in connection with those bonds?

20 A. At the time I believe there were, yes, tax  
21 exempt related -- or, tax-related benefits to that.

22 Q. And do you remember why? Or do you know  
23 why?

24 A. Specifically at that point, not right off  
25 the top of my head, no.

1           **Q.**       Do you have any awareness as to whether  
2 the funds are unrestricted in their use?

3           **A.**       The funds that we raised, again, were for  
4 the general corporate purposes and for the utility;  
5 my understanding.

6           **Q.**       So is that a "yes," they were unrestricted  
7 in their use?

8           **A.**       It's my understanding that those were used  
9 for the general corporate purposes.

10          **Q.**       So I'm not, I just, you know a lot more  
11 about this area than I do and so I'm just trying to  
12 understand if when I ask you if they were  
13 unrestricted in their use and you tell me they were  
14 for the general corporate purposes, if that's the  
15 same thing or if that's something different.

16          **A.**       I guess I'm not understanding when you say  
17 the same thing or different.

18          **Q.**       So I asked if they were unrestricted as to  
19 their use, and you said they were for the general  
20 corporate purposes. Is that a confirmation? Are you  
21 agreeing with me, or are you disagreeing with me?

22          **A.**       I am saying that the debt was used and the  
23 debt is supported by all of the assets, it is not  
24 attributable to any specific business. Whether --  
25 when you say was it restricted in its use, we issued

1 the debt, we raised the debt, that debt is back by  
2 and supported by all of the assets of the company.

3 Q. Let me try it this way then I'll move on:  
4 Are you aware of any commitment made by DP&L as to  
5 how the funds would be used as part of the  
6 consideration or the terms of obtaining those funds?

7 A. At that point in time when that debt was  
8 issued I'm not really aware of that.

9 Q. There is a second pollution control bond  
10 line item on line 4 of Exhibit CLJ-7 on page 7 for  
11 PCB Variable Rate OH Series A and B. Do you see  
12 that?

13 A. Yes, I do.

14 Q. And those were issued in August of 2015,  
15 correct?

16 A. That is correct.

17 Q. Just to streamline this, maybe I can't  
18 streamline it, I'm just going to try to ask you the  
19 same questions and --

20 A. I believe that was a refinancing as well  
21 at that time.

22 Q. Okay. A refinancing of what?

23 A. I believe that was a prior debt that we  
24 had.

25 Q. Okay. Do you know what the prior debt --

1 when you say "a prior debt that we had," do you mean  
2 a prior state of Ohio pollution control bond debt or  
3 something else?

4 **A.** If I recall correctly, I think it was a  
5 prior pollution control debt that we had. Again,  
6 that would be subject to check, but I believe that's  
7 correct.

8 MR. BZDOK: About to switch topics. Do  
9 you guys want a break? Do you want to keep going?

10 MR. FARUKI: Okay. Yeah, let's go a while  
11 longer.

12 You speak up, Craig.

13 We'll go till 10 or something.

14 MR. BZDOK: Okay.

15 MR. FARUKI: Whenever it becomes a good  
16 point for you.

17 MR. BZDOK: Sure.

18 **Q.** (BY Mr. Bzdok) Let's take a look at page  
19 15 of your direct testimony. Well, let's back up a  
20 minute. Let's look at page 14, item (a) that starts  
21 on line 4. In item (a) on line 4 of page 14 you're  
22 describing the methodology that you used to determine  
23 the FFO-to-debt target for the objective of the DMR.  
24 Is that a fair paraphrase?

25 **A.** Yes, it is.

1           **Q.**       And you are relying on a Moody's rating  
2 methodology paper for regulated electric and gas  
3 utilities, correct?

4           **A.**       Yes.

5           **Q.**       And then on page 15 of your testimony  
6 starting at line 17 you are discussing whether FFO to  
7 debt is the only relevant component of an investment  
8 grade rating and you, again, mention that same rating  
9 methodology paper for the regulated electric and gas  
10 utilities; is that correct?

11          **A.**       That's correct.

12          **Q.**       And you go on to describe other components  
13 on page 15 carrying over to page 16 which are cited  
14 by that Moody's rating methodology paper that are  
15 considered in ratings for electric utilities,  
16 correct?

17          **A.**       Yes, that is correct.

18          **Q.**       Now, IEU asked you in discovery to produce  
19 a copy of that paper. Do you recall that?

20          **A.**       I do recall that.

21          **Q.**       I am going to provide you and your  
22 counsel -- I'm going to ask the court reporter to  
23 mark one and then provide it to you and also to your  
24 counsel of a discovery response attachment to the IEU  
25 tenth discovery that has the Bates numbers 7994

1 running through 8056.

2 (DEPOSITION EXHIBIT 2 WAS MARKED.)

3 Q. So you indicate in your testimony starting  
4 on line 3 of page 16 that "'Financial Strength,'  
5 which Moody's generally gives a 40 percent weight to  
6 the overall rating, typically includes more than one  
7 financial metric"; is that correct?

8 A. That is correct.

9 Q. And on this paper which we're looking at  
10 as Deposition Exhibit 2, on page 6 those financial  
11 metrics are set forth. Would you agree?

12 A. Could you repeat that question, please.

13 Q. Sure.

14 A. I don't think I'm in the correct place, I  
15 want to make sure.

16 Q. Yeah. I'll try to phrase it better.

17 So on page 6 of this document that we're  
18 looking at Moody's provides all of the -- provides a  
19 table, let's start there. Correct?

20 A. That's correct.

21 Q. And the table includes factors and  
22 subfactors which are used in weighting for the  
23 purpose of rating regulated electric utilities; would  
24 you agree?

25 A. I agree with that.

1           **Q.**       And those are the -- the factors are the  
2 same factors that you cite in bullet points on pages  
3 15 and 16, correct? So I'm looking at the Broad  
4 Rating Factors column.

5           **A.**       Yes, that is correct.

6           **Q.**       And then the subfactors are also included  
7 within each of those broad factors. Agreed?

8           **A.**       Yes, I do.

9           **Q.**       And the FFO, what you are referring to as  
10 the FFO which you -- let me try that a different way.  
11 I'm trying to ask too many questions at one time.

12                   On page 14 of your direct testimony, line  
13 5, you use the abbreviation "FFO" and then you have a  
14 parenthetical that says "(pre-working capital cash  
15 flow from operations) to Debt," right?

16           **A.**       That is correct.

17           **Q.**       And so from that phrasing I am  
18 interpreting that what you're calling FFO to debt in  
19 your testimony corresponds with the subfactor under  
20 Financial Strength and Key Financial Metrics that's  
21 abbreviated "CFO pre-WC over Debt"; is that correct?

22           **A.**       Those are the comparable -- yes.

23           **Q.**       So, according to this Moody's rating  
24 methodology which you've been relying on, FFO to debt  
25 has a subfactor weighting of 15 percent in the

1 overall rating methodology that Moody's uses. Would  
2 you agree?

3 **A.** I would agree with that.

4 **Q.** And in addition to -- in addition to those  
5 rating -- in addition to those rating factors which  
6 are given various percentages of weight the table on  
7 page 6 also contains a note or a row relative to  
8 Notching Adjustments, Holding Company Structural  
9 Subordination, and a subfactor weighting of zero to  
10 minus 3, correct?

11 **A.** That's correct.

12 **Q.** And what is -- what is your understanding  
13 of what the zero to minus 3 signifies?

14 **A.** It signifies the differential in the  
15 ratings you could see between the holding company and  
16 the subsidiary. So I think you may have mentioned,  
17 maybe we can have it read back, but zero to 3 is not  
18 a weighting percentage, I think it just represents  
19 the rating differential if you're looking at the  
20 notches between a parent and a utility.

21 **Q.** So from my read of this document, I just  
22 want to tell you my understanding and you let me know  
23 if your understanding is similar or, if it's  
24 different, how it's different. There is a weighting  
25 process that is done using these various factors that

1 include FFO to debt and then that produces an  
2 outcome, and then there is a notching adjustment that  
3 may be necessary based on holding company structural  
4 subordination; is that fair?

5 **A.** Based on the holding company, as they've  
6 noted here, holding company structural subordination,  
7 there could be a notching adjustment, that is  
8 correct.

9 **Q.** And so the zero to minus 3 mechanically  
10 signifies that depending on the outcome of the  
11 holding company structural subordination analysis,  
12 the rating for the regulated utility produced by  
13 these factors could be lower between zero and three  
14 notches.

15 **A.** That is correct.

16 **Q.** And that application of that zero to minus  
17 3 would have the result, if it's anything other than  
18 zero, of bringing the regulated utility closer in  
19 rating to the holding company, correct?

20 **A.** That is correct.

21 **Q.** So the closer, in general terms just  
22 understanding the methodology, the closer that the  
23 regulated utility is to the holding company -- let me  
24 strike that question.

25 Certainly you would agree that there are

1 instances, and I'm speaking in general terms now,  
2 where the notching adjustment that is applied has a  
3 greater impact on credit rating than a financial  
4 metric which is assigned 15 percent of the overall  
5 weight. Would you agree that that's possible?

6 MR. FARUKI: Let me hear that one back,  
7 please.

8 (Record read.)

9 MR. FARUKI: Okay.

10 A. If looking at just the utility? Yes, that  
11 could be -- that could be possible.

12 Q. And would you agree that that is the case  
13 relative to DP&L currently?

14 A. So I would say right now with DP&L having  
15 a negative outlook, I think it's uncertain right now  
16 where the rates will end up. So no, I would not  
17 necessarily say that it is purely the result of the  
18 notching differential. I think there's uncertainty  
19 in Ohio which are causing some of these other  
20 nonfinancial metrics, because that has an impact on  
21 the overall rating as well.

22 So you can't just look at the financial  
23 strength in that respect, you have to look at the  
24 overall condition, the regulatory environment within  
25 the state. And that's predominantly the reason,

1 given the factors that we had discussed earlier, why  
2 we're on a negative outlook with the rating agencies  
3 at both DPL and DP&L.

4 **Q.** So what, in your understanding, is a  
5 negative outlook?

6 **A.** A negative outlook generally speaking is,  
7 you know, within a 90-day period, I'm just using  
8 round numbers, let's just say it's 30 to 90 days, it  
9 may change a little bit between the rating agencies,  
10 they are looking for something to specifically occur  
11 so they can cure that negative outlook, but it  
12 generally means that there is a negative view on  
13 conditions facing the company, that they're not  
14 willing to take action yet because they want to see  
15 if those conditions improve to which they can remove  
16 the negative outlook and the ratings that are in  
17 place at that time would continue, or if the  
18 conditions don't improve, then the expectation is you  
19 will be downgraded.

20 **Q.** So, as I understand your answer two  
21 questions ago, it is that the negative outlook is  
22 being driven by a number of factors including  
23 conditions in Ohio, correct?

24 **A.** It's the factors that I had noted on --  
25 just going back to the page -- the factors that I had

1     noted on page 8.

2           **Q.**       Of your direct testimony.

3           **A.**       Of my direct testimony, yes. I'm sorry.

4           **Q.**       But the current rating, is it fair to say,  
5     is predominantly driven by the notch differential at  
6     DPL, Inc.? Would you agree with that?

7           **A.**       I would say the current ratings at DPL and  
8     DP&L are based on the expectation of a reasonable  
9     outcome in this case.

10          **Q.**       Understood. So my question was about  
11     DP&L.

12          **A.**       I would say the same, there's an  
13     expectation of the outcome in this proceeding which  
14     is driving the current ratings, yes, there is a  
15     notching differential between DPL and DP&L at some of  
16     these rating agencies, so that is a -- the notching  
17     is a cause of some of that differential, yes.

18          **Q.**       The Moody's differential is one notch,  
19     right?

20          **A.**       I believe that is correct.

21          **Q.**       And is it your understanding that that is  
22     driven primarily, according to Moody's, by the  
23     decision to transfer generation assets without  
24     transferring any of the associated debt?

25          **A.**       You know, in my view I think the notching

1 differential is related to the debt that is sitting  
2 at the parent company and that's, in my view that's  
3 what's driving the ratings differential.

4 Q. Can you explain what you mean by that,  
5 it's driven by the debt at the parent company?

6 A. So the holding company has debt, right,  
7 has interest obligations that it has to meet on that  
8 debt, that's what's driving the, in part, the lower  
9 rating than you have at DP&L.

10 By nature of that and given the notching  
11 differential that is having an impact back on DP&L's  
12 overall rating as well, so the notching rules are  
13 what's driving the lower change -- or, the lower  
14 rating between DPL and DP&L.

15 Q. The debt at DPL, Inc. drives the lower  
16 rating for DPL, Inc., fair?

17 MR. FARUKI: I'll object. That's not what  
18 he said. You're making that a single cause.

19 Q. Let me try to rephrase. And let me first  
20 note that I was not asking you what you said, I was  
21 asking your opinion of a proposition, but I will try  
22 to rephrase the proposition.

23 Is it fair to say that the current rating  
24 at DPL, Inc. is predominantly driven by the debt  
25 position that you described?

1           **A.**       So the rating at DPL, Inc. is driven by  
2       there is debt at the parent company and what cash  
3       flows do we have to support that debt, whether it's  
4       in the utility or from any of the other subsidiaries  
5       that we have at DP&L, that's what's driving the  
6       rating. Obviously, the cash flows that are coming  
7       from the other subsidiaries, there's risk around  
8       those cash flows and several of those are noted in my  
9       testimony.

10          **Q.**       Is it fair to say that looking only at  
11       DP&L, and so in that sense this question has a  
12       hypothetical element to it, looking only at DP&L and  
13       not making any conclusions about what should be but  
14       looking only at DP&L, it scores relatively strongly  
15       on the financial metrics outlined by Moody's in the  
16       methodology paper?

17          **A.**       The calculated ratings would suggest a  
18       higher rating, I would agree with that, however -- I  
19       understand your hypothetical, but the fact is there  
20       is a parent company that has debt and there obviously  
21       is a link between DPL and DP&L. But, to answer your  
22       question, from a straight calculation, yes, it would  
23       suggest a better score than what you would otherwise  
24       expect given the rating that we have.

25          **Q.**       And the one-notch differential between

1 DPL, Inc. and DP&L would suggest that the link that  
2 you mention between holding company and parent  
3 company is viewed by Moody's as being very tight. Is  
4 that a fair characterization?

5 A. Can you just define, when you say "very  
6 tight," just are you referring to there's just a  
7 one-notch differential?

8 Q. Yes. I was trying to use your phrasing,  
9 and maybe I was trying to be too cute so let me try  
10 it another way.

11 The current rating for DP&L, as I  
12 understand your testimony, is constrained by its  
13 relationship to DPL, Inc.; is that fair?

14 A. I think we've clearly said the notching  
15 rules between DPL and DP&L are what's causing a lower  
16 rating at DP&L.

17 Q. On this document -- let me show you one  
18 more document.

19 MR. BZDOK: I will ask to get this marked  
20 as Deposition Exhibit No. 3. This is also an  
21 attachment to an IEU request for production, it has a  
22 Bates stamp number of 7657 through 7665, it's a  
23 Moody's Investors Service Credit Opinion from August  
24 11 of 2016.

25 (DEPOSITION EXHIBIT 3 WAS MARKED.)

1           **Q.**       Do you generally recognize this as one of  
2       the credit rating agency reports that you reviewed in  
3       connection with preparing your testimony?

4           **A.**       Yes, it is.

5           **Q.**       And if you turn to page 5 of this report,  
6       there is a paragraph at the bottom that has a heading  
7       "DP&L Secured and Unsecured Rating Considerations,"  
8       and I would just ask you to take a minute and review  
9       the paragraph and let me know when you're ready.

10          **A.**       Okay.

11          **Q.**       So, generally, and I don't want to get too  
12       caught up in paraphrasing, but I also don't want to  
13       be too blasé about this, generally I'm understanding  
14       this to indicate that Moody's is applying only one  
15       notch between DPL, Inc. and DP&L because of the plan  
16       to transfer generation assets without associated  
17       debt. Is that a fair reading of what Moody's is  
18       saying?

19          **A.**       Yes, that is what they're saying.

20          **Q.**       Is that, and again my question is about  
21       what Moody's is saying for now, is that an indication  
22       that there is significant structural subordination to  
23       the holding company?

24          **A.**       It's an indication that their view is that  
25       once separation occurs, it's noted on here, I won't

1 read what's at the bottom of page 5 up to five 6, or  
2 up to page 6, that it would drive a one-notch  
3 differential between the two.

4 Q. Is Moody's wrong about this?

5 A. This is their opinion.

6 Q. In your opinion, is Moody's wrong about  
7 this?

8 MR. FARUKI: About the one-notch  
9 differential?

10 Q. About the cause of the one-notch  
11 differential.

12 A. Again, in my view these are the rules that  
13 Moody's has provided in their opinion so, again,  
14 their opinion is it is a one-notch differential.  
15 When you say are they wrong in my opinion, my view is  
16 there's, as I mentioned before, we have the debt of  
17 the parent and there is risk around the cash flows  
18 from the subsidiaries that support the parent,  
19 whether it's DP&L, whether it's AES Ohio Generation,  
20 or any other subsidiary that we have, that creates  
21 some risk given the size of the debt of the parent  
22 company.

23 MR. BZDOK: Could we go off the record.

24 MR. FARUKI: Sure.

25 (Recess taken.)

1           **Q.**       Mr. Jackson, we had been talking before  
2 the break about notching and notching adjustments  
3 between parent companies and regulated utilities.  
4 Fair?

5           **A.**       Yes, that's fair.

6           **Q.**       In the document we've been looking at,  
7 Deposition Exhibit 2, which is the Moody's Rating  
8 Methodology, there is some discussion on page 25  
9 carrying over to page 26 that I would like to take a  
10 brief look at, so I would -- really starting on page  
11 24 of this document which at the head, starting at  
12 the heading titled "Notching for Structural  
13 Subordination of Holding Companies," and I will ask  
14 you to familiarize yourself with it.

15                   I will indicate to you that the items I  
16 plan on discussing with you are the bullet points at  
17 the bottom of page 25, so I'm not going to have a  
18 long discussion with you on sort of the narrative  
19 portion but take whatever time you need to  
20 refamiliarize yourself with this portion of the  
21 document and let me know when you're ready.

22           **A.**       Okay.

23                   MR. FARUKI: Craig, why don't you just  
24 read that section and tell him when you're done.

25                   THE WITNESS: Okay.

1           **A.**       Okay.

2           **Q.**       I'm going to ask you to look at one other  
3           portion on this topic of this document which is  
4           Appendix D on page 46, "Approach to Ratings within a  
5           Utility Family," and, again, I'm interested in  
6           discussing with you the bullet points that are  
7           primarily on page 46.

8           **A.**       Okay.

9           **Q.**       In both of these sections the -- both of  
10          these sections have certain bullet points in common  
11          in terms of considerations that Moody's is indicating  
12          that it evaluates in determining notching  
13          differentials between a parent company and an  
14          operating company. Is that a fair characterization?

15          **A.**       There are similarities, yes.

16          **Q.**       One of those items which is similar in  
17          both is regulatory or other barriers to cash  
18          movements -- to cash movement from the operating  
19          company to the holding company, correct?

20          **A.**       Yes.

21          **Q.**       Has that been, has the implementation of  
22          any barriers like that been considered as a potential  
23          way of improving DP&L's credit position relative to  
24          DPL, Inc.?

25                 THE WITNESS: Can you repeat the question

1 for me, please.

2 (Record read.)

3 **A.** Well, today in order to move cash from  
4 DP&L to DPL, Inc. obviously requires approval from  
5 the DP&L board. There are no restrictions from the  
6 PUCO on the movement of cash. I believe if there  
7 were restrictions put in place to restrict the level  
8 of dividends that could be moved from DP&L to DPL,  
9 Inc., it would cause DPL, Inc.'s ratings certainly to  
10 fall further which, even if you only had a one-notch  
11 differential, would still move down DP&L's rating.

12 So I would say that we have not -- we are  
13 not looking and don't think one is needed to put in  
14 any type of a restriction on cash flow from the  
15 utility to DPL, Inc.

16 **Q.** Am I understanding your answer correctly  
17 that you believe that barriers, regulatory or  
18 otherwise, to cash movement or limits on cash  
19 movement would push DPL, Inc.'s rating down but  
20 provide no upward boost to DP&L's rating?

21 **A.** Say if there is a one-notch differential  
22 between the two, if -- if there is a one-notch  
23 differential between the two and DPL, Inc.'s gets  
24 worse because of the restriction on cash, my view is  
25 that DP&L, even if it maintained that one-notch

1 differential, would by default move with it.

2 Q. Sure. So the spirit of my question and  
3 its embeddedness in these sections is intended to  
4 look at the considerations for increasing the  
5 differential between the two and so it was in that  
6 spirit that I was asking the question. Is your  
7 answer still the same?

8 A. I would say by not having a restriction on  
9 the dividends that we can move between the two houses  
10 to protect the, at least the differential that we  
11 currently have, since we don't have that restriction  
12 in place today, I don't believe there's anything with  
13 that that will widen it any further than where they  
14 currently have that rating or that notching  
15 difference.

16 Q. Would you acknowledge that the imposition  
17 of such barriers or limits could be a factor in  
18 increasing the differential between the two  
19 companies?

20 THE WITNESS: Can you repeat that  
21 question, please.

22 (Record read.)

23 A. I don't know that I agree with that.

24 Q. Why not?

25 A. If you, again, if you impose a barrier,

1 it's restricting cash moving up to the parent, my  
2 view is that the rating agencies, one, would move the  
3 parent down and they're going to move the utility  
4 down right along with it. Again, it's just my view.  
5 I don't see a scenario there where they would expand  
6 the notching differential.

7 **Q.** Another one of the items that these bullet  
8 points contain in common -- another bullet point  
9 common to these two sections concerning the impact of  
10 structural subordination and the approach to ratings  
11 within a utility family is specific ring-fencing  
12 provisions. Do you see that?

13 **A.** Yes, I do.

14 **Q.** Has that been considered as a way of  
15 increasing the notch differential between DPL, Inc.  
16 and DP&L?

17 **A.** I would say I believe we do have certain  
18 ring-fencing protections in place today. For  
19 example, we have separate books and records. We have  
20 a separate board of directors between the two  
21 entities. The board of directors for DP&L makes  
22 decisions where DP&L must approve. The dividends, as  
23 I mentioned before, flow from DP&L to DPL, Inc.

24 These are operating as two separate  
25 entities, so I believe there are certain factors

1 already in place to date that the company has put in  
2 place to justify the notching differential and I  
3 would say, in fact, this is a discussion that we  
4 continue to have with the rating agencies around the  
5 ring-fencing provisions that we believe are in place  
6 today. And it's something that we would continue to  
7 discuss with them. We firmly believe that those are  
8 in place.

9 **Q.** A couple follow-up questions on that. Who  
10 are the primary corporate officers who provide  
11 staffing and support to the board of DP&L?

12 **A.** So the primary officers to the board of  
13 DP&L would be myself, Tom Raga, who is the president  
14 and CEO of Dayton Power and Light, again, I'm just  
15 thinking on the officers side. From time to time  
16 Andy Horrocks, chief operating officer. I would say  
17 those are the primary officers that have the  
18 interactions with the board. Obviously, our general  
19 counsel attends the meetings as well.

20 **Q.** Just so the record's clear --

21 **A.** General counsel, Judi Sobecki.

22 **Q.** It's funny to ask questions about her  
23 while she's sitting there, but she is general counsel  
24 for who?

25 **A.** She is the, obviously, general counsel

1 employed by AES U.S. Services, but general counsel  
2 for DP&L and DPL, Inc.

3 Q. And you mentioned Andy Horrocks as CEO.  
4 CEO of --

5 A. COO. Chief operating officer.

6 Q. Thank you.

7 -- of DPL, Inc., DP&L, or both?

8 A. Actually I believe his chief operating  
9 officer title is for AES U.S. Investments which he  
10 provides service then to DP&L and DPL.

11 Q. AES U.S. Investments is a different  
12 company --

13 A. I'm sorry. AES U.S. Services, LLC. Thank  
14 you for that correction.

15 Q. You indicated that my other follow-up  
16 question is you had indicated as part of your answer  
17 that, and I didn't write it down exactly, but to the  
18 effect that these kinds of things continue to be  
19 under consideration, more or less. Do I have that  
20 right?

21 A. We have discussions around ring fencing  
22 and talk to our ring-fencing provisions with the  
23 rating agencies when we meet with them every year.  
24 When I say it's under consideration, there are things  
25 that we will continue to discuss with them. I am not

1 aware that any of the rating agencies are at the  
2 point where they're willing to make a further  
3 notching differential just specific to ring-fencing  
4 provisions that we have in place.

5 Q. Is there active consideration of any  
6 additional ring-fencing provisions to put into place?

7 MR. FARUKI: Wait a minute. Just for  
8 foundation, Chris, you haven't asked him for a  
9 complete list. He just gave a couple as examples. I  
10 mean, they have a corporate separation plan,  
11 et cetera, that he could talk about. Are you trying  
12 to get a whole list?

13 MR. BZDOK: Yes.

14 Q. I took your answer as a complete list. If  
15 it's not a complete list, can you tell me what else  
16 you can think of.

17 A. We're in compliance and have a corporate  
18 separation plan in place, obviously the debt at DPL,  
19 Inc. is nonrecourse back to DP&L, I mentioned the  
20 separate books, separate records that we maintain, we  
21 have the independence -- the separation of the board  
22 of directors between each entity.

23 Q. Any other -- anything else you can think  
24 of?

25 A. There may be others, but those are the

1 ones I'm aware of at this point.

2 Q. So having completed the list are there any  
3 additional ring-fencing provisions that are under  
4 consideration as a way to improve the differential  
5 between -- well, scratch that.

6 Are there any additional ring-fencing  
7 provisions that are under consideration?

8 A. I'm not aware of anything further under  
9 consideration other than the ring-fencing provisions  
10 that we have in place today. And I would add that,  
11 again, we believe, as we've noted to the rating  
12 agencies, that we have significant ring-fencing  
13 provisions in place.

14 Q. On page 25 one of the bullets is listed as  
15 "Higher leverage at the HoldCo level." Is that -- in  
16 your opinion, does that exist in the situation of  
17 DPL, Inc.?

18 A. We do have higher leverage at -- a high  
19 leverage position at DPL, Inc.

20 Q. And would you agree that, looking at the  
21 last bullet on 25, that you also have exposure to  
22 subsidiaries with high business risk or volatile cash  
23 flows?

24 A. Yes, we do. And I think that goes to the  
25 point I made today and yesterday during the

1 deposition around the reason to exclude out the  
2 adjusted FFO to debt from the -- from the FFO to debt  
3 adjust out the coal generation cash flow because of  
4 some of the volatility relating to those assets.

5 Q. Sure. So I understand your -- so I  
6 understand your answer, and you explained it in great  
7 detail yesterday as it concerns your adjusted FFO  
8 calculation. In terms of -- let me back up for a  
9 minute.

10 Has a decision been made as of today,  
11 December 16th, 2016, as to whether to go forward or  
12 not with moving the coal generation assets over to  
13 the GenCo under DPL, Inc.?

14 A. At the advice of counsel, no, a decision  
15 has not been made.

16 Q. Currently, those live in DP&L, correct?  
17 Those assets.

18 A. The coal generation assets, they are a  
19 part of DP&L.

20 Q. So to the extent that they have high  
21 business risk or volatile cash flows, that's a direct  
22 impact on DP&L, correct?

23 A. That is correct.

24 Q. If they were moved over to an affiliate  
25 GenCo under DPL, Inc. as described in the FERC

1 application, they would still have the potential to  
2 impact the notching differential between the two  
3 companies according to the Moody's methodology that  
4 we've been discussing; would you agree?

5 **A.** When you say "impact," can you just  
6 explain that a little bit more.

7 **Q.** Sure. Impact, have an influence on the  
8 notching differential that's applied under these  
9 methodologies.

10 **A.** Yes, I believe that that is correct.

11 **Q.** Has any, and I understand we're a couple  
12 of contingent steps out in asking this question, but  
13 has any consideration been given if the generation  
14 separation plan does go forward to providing any ring  
15 fence or other barriers or protection between the  
16 subsidiary affiliate and DP&L?

17 **MR. FARUKI:** Craig, you may answer that  
18 question only if you can do so without revealing any  
19 attorney-client discussions with Judi.

20 **A.** Yeah, and I would not be able to.

21 **MR. FARUKI:** Okay.

22 **Q.** Just so that I understand, and I'm not  
23 going to ask you to reveal any attorney -- does that  
24 mean there is an answer but it's privileged or there  
25 is no answer?

1 MR. FARUKI: If you don't mind, Chris, let  
2 me suggest -- I would not object, because it doesn't  
3 waive the privilege, if you ask him has that been the  
4 subject of a discussion with counsel.

5 Q. Can you answer that question?

6 A. We have had those discussions.

7 Q. And, again, not seeking any privileged  
8 information, has any decision been made?

9 A. No.

10 Q. Speaking -- going back now to the earlier  
11 question about going forward with the generation  
12 separation or not, and I understand that no  
13 decision's been made as of today, is there a time  
14 frame present for such a decision?

15 A. Not that I am aware.

16 Q. Yesterday you had a discussion with  
17 Mr. Alexander on the phone in which you indicated  
18 that without a DMR there could be a need for DPL,  
19 Inc. to rationalize capital expenditures and O&M  
20 expenditures at DP&L. Do you recall that discussion  
21 generally?

22 A. Yes, I do.

23 Q. And Mr. Alexander asked you as part of  
24 that discussion if DP&L has sufficient revenues, is  
25 it appropriate for DPL, Inc. to withdraw funds from

1 DP&L that DP&L needs to provide safe and reliable  
2 service. Do you remember a question like that?

3 **A.** Yes, I do.

4 **Q.** And you answered that DP&L needs a healthy  
5 DPL, Inc. Do you recall that?

6 **A.** Yes, I do.

7 **Q.** Based on current projections and outlooks  
8 how close or far is DPL, Inc. to making a decision to  
9 withdraw funds from DP&L that DP&L needs to provide  
10 safe and reliable service?

11 **MR. FARUKI:** I'm going to have to hear  
12 that one again I'm afraid.

13 (Record read.)

14 **MR. FARUKI:** Go ahead.

15 **A.** Well, first, DPL, Inc. doesn't make the  
16 decision to withdraw funds from DP&L so, again, any  
17 cash that is moved from DP&L to DPL, Inc. the board  
18 of DP&L must make that decision.

19 I would say it's difficult to say the  
20 timing because a lot of it depends on the outcome of  
21 this proceeding as to when that impact might occur.  
22 If we were to receive no DMR in this proceeding, it  
23 could be in the very near future, very near within  
24 the next one to two -- one to two years.

25 **Q.** With my following question I am not asking

1 for a legal opinion or to make any legally binding  
2 commitment as to the company, I'm just asking for  
3 your general understanding from the work you do and  
4 the circles you travel in this industry.

5 Are you aware of a regulated utility in  
6 the United States who has taken a similar position  
7 with a public utility commission as to the potential  
8 for its holding company needing funds that otherwise  
9 would be required to provide safe and reliable  
10 service?

11 **A.** I can't say that I am aware.

12 MR. BZDOK: That concludes my questions  
13 for you in the public session. Thank you.

14 THE WITNESS: Okay. Thank you.

15 MR. FARUKI: I believe this -- this is  
16 Charlie. I believe, Gretchen, you said earlier this  
17 morning that you had a few questions.

18 MS. PETRUCCI: Yes, I do.

19 --|--

20 EXAMINATION

21 BY MS. PETRUCCI:

22 **Q.** Good morning, Mr. Jackson.

23 **A.** Good morning.

24 **Q.** If we could turn to page 12 and 13 in your  
25 direct testimony, specifically at the bottom where

1 you indicate what the proposed DMR would be used for.

2 A. Okay. I'm there.

3 Q. Could funds that are collected under rider  
4 DMR as proposed by DP&L be used to develop or  
5 implement a battery-based energy storage system given  
6 your testimony there?

7 MR. FARUKI: This is Charlie. Did you say  
8 could they be? Was that your question?

9 MS. PETRUCCI: Yes.

10 MR. FARUKI: Okay. Thank you.

11 A. My testimony alludes to the DMR being used  
12 for grid modernization. I believe in the -- my  
13 understanding, in the clean energy rider I think we  
14 reference renewables, but that that would have to be  
15 addressed by another person who is a witness in this  
16 case that's talking to the clean energy rider.

17 Q. Would your answer be the same, then, as to  
18 whether or not funds collected under the rider DMR  
19 could be used to develop or implement renewable  
20 energy products or projects, excuse me?

21 A. Yes, that would be -- that would be the  
22 same response.

23 Q. And do you mean that any cost recovery for  
24 either a energy storage system or a renewable energy  
25 project would be collected solely through the clean

1 energy rider?

2       **A.**       As I mentioned, I think that's probably a  
3 better question for I believe it was Miss Hale, I  
4 can't remember if that's the right witness or not,  
5 but Miss Hale would be the one to address it.

6       **Q.**       And just to make sure I'm following along,  
7 please, if you think that she is the person to  
8 answer, does that mean that, in fact, the proposed  
9 DMR would not -- funds collected under it would not  
10 be used for either an energy source system or  
11 renewable energy project?

12       **A.**       If the Commission issued an order whereby  
13 they suggested that the DMR be used for grid  
14 modernization or renewable projects, that is the path  
15 that we would go down. Likewise, if they, as I  
16 mentioned yesterday, they just said for grid  
17 modernization and debt prepayment, we would do that,  
18 or if it's just debt prepayment alone, that that's  
19 the direction that we would go. But it's --

20       **Q.**       As proposed by DP&L currently the rider  
21 DMR would not be -- its purpose would not include  
22 development or implementation of an energy storage  
23 system or renewable energy projects, correct?

24       **A.**       As I've noted here, yes, the DMR would be  
25 used just for the -- to pay interest obligations on

1 debt, make debt prepayments, and then also for grid  
2 modernization.

3 MS. PETRUCCI: Okay. Those are my  
4 questions. Thank you.

5 MR. FARUKI: Thanks, Gretchen.

6 Let's go off the record a minute.

7 (Discussion off the record.)

8 (Whereupon, at 10:53 a.m., the deposition  
9 was concluded and signature was not waived.)

## AFFIDAVIT

State of Ohio )  
 ) SS:  
 County of \_\_\_\_\_ )

I, CRAIG L. JACKSON, do hereby certify that I have read the foregoing transcript of my deposition given on Thursday, December 15, 2016 and Friday, December 16, 2016; that together with the correction page attached hereto noting changes in form or substance, if any, it is true and correct.

\_\_\_\_\_  
 CRAIG L. JACKSON

I do hereby certify that the foregoing transcript of the deposition of CRAIG L. JACKSON was submitted to the witness for reading and signing; that after he had stated to the undersigned Notary Public that he had read and examined his deposition, he signed the same in my presence on the \_\_\_\_\_ day of \_\_\_\_\_, 201\_\_.

\_\_\_\_\_  
 Notary Public

My commission expires \_\_\_\_\_, \_\_\_\_\_.

CERTIFICATE

State of Ohio )  
 ) SS:  
 County of Franklin )

I, Maria DiPaolo Jones, RDR and CRR, the undersigned, a duly qualified and commissioned notary public within and for the State of Ohio, do certify that, before giving his deposition, CRAIG L. JACKSON was by me first duly sworn to testify to the truth, the whole truth, and nothing but the truth; that the foregoing is the deposition given at said time and place by CRAIG L. JACKSON; that I am neither a relative of nor employee of any of the parties or their counsel and have no interest whatever in the result of the action.

IN WITNESS WHEREOF, I hereunto set my hand and official seal of office on this 27th day of December 2016.

  
 Maria DiPaolo Jones, RDR, CRR,  
 and Notary Public in and for the  
 State of Ohio.

My commission expires June 19, 2021.
