EXHIBIT A

5.0 PORTFOLIO MANAGEMENT AND IMPLEMENTATION STRATEGIES

5.1. Overview of Utility Management and Implementation Strategies:

5.1.1. *Describe the types of services to be provided by the utility as well as by any third-party providers, such as consultants and trade allies. Indicate which organizations will provide which services and the basis for such allocation*

Generally the Companies will continue overall administration and oversight of the Plans, and utilize third party vendors to perform various program implementation and support duties. Specific activities that the Companies will oversee include the execution of marketing campaigns; Quality Assurance/Quality Control activities and tracking and reporting activities. The Companies will use contractors to provide many program implementation services, including assistance with program implementation, EM&V and the installation of the tracking and reporting tool.

The Companies may also use ~~the following~~ Administrators that have been approved by the Commission²³, for specific programs, class of customers or to accomplish the goals of a given program. Each of these Administrators is expected to commit to a reasonable level of efficiency and peak demand reductions on behalf of their members; to agree to a reasonable administration fee; and to agree to track and provide documentation evidencing the incremental energy reduction and actual kWh savings achieved from certain programs. The current Administrators are listed below:

1. ~~Ohio Schools Council~~
2. ~~Ohio Hospital Association~~
3. ~~1. Council of Smaller Enterprises ("COSE")~~
4. ~~2. Ohio Manufacturer's Association~~
5. ~~3. Industrial Energy Users~~
6. ~~4. Association of Independent Colleges and Universities of Ohio~~
7. ~~5. County Commissioners Association of Ohio Service Corporation (CCAOSC)~~

Unless otherwise expressly stated in these Plans, the compensation paid to these Administrators is as approved by the Commission in Case No. 09-0553-EL-EEC and/or the Companies' Stipulated ESP IV.

5.1.2. *Describe risks to program performance and any risk management strategies that will be employed to mitigate those risks. Examples of risks that can cause a program to not deliver expected savings including program design flaws, technologies targeted by a program failing to deliver the savings expected (or failing to prove that they have delivered the savings), and customers or other key market players (e.g. contractors) choosing not to participate in a program*

²³ ~~While the Companies entered into contracts with The Ohio Energy Group, Roth Bros Inc., and FirstEnergy Solutions Corp. dba The E Group ("The E Group"), each of whom had also been approved by the Commission, these groups notified the Companies of their intent to terminate their Administrator agreements and pursuant to those notifications the agreements have been terminated.~~
