COMMENT DESCRIPTION:

I am among the millions of Americans and environmentalists throughout the world who are opposed to the expansion of fossil fuels because of their risk to the future of the planet. We must stop the emissions which are causing climate change. The natural gas fracking wells in Ohio are releasing methane, which is an ever more dangerous pollutant than carbon, in trapping heat in the atmosphere I am opposed to your building the pipeline extension in Blue Ash. When is Duke going to aggressively support solar and wind? Your climate legacy is dreadful and seems may get worse.

COMMENT DESCRIPTION:

I am writing in reference to the proposed gas transmission line being proposed by Duke Energy (Case 16-0253-GA-BTX). It is an outrage that Duke is considering placing a high volume high pressure 20 inch pipeline in the middle of an urban area. The danger and threat from an accident is too great and the risk to our children, homes and schools is too great to justify the whimsical desire of Duke Energy to make money. This pipeline goes directly in front of Evendale Elementary. If a transmission line is needed, please place it in a rural area and not right in line with our most precious resource, our children. The green proposal specifically goes directly thru my front yard and will require removal of 3 100+ year old oak trees. These trees shelter our home from the street noise, provide shade and shelter to animals in a urban area and are the very reason we purchased the home since it was a very unique feature. The 30 foot easement requirement would actually be right up to our front door or possibly beyond it. As a parent of 2 children and a 20 year resident of this home, the only home my children have ever known, I stand firmly opposed to this proposal. No one should have to be forced to give up everything they have worked and watch their home and property be destroyed just so Duke energy can make some cash by lying to your board that this is an intrastate pipeline when it is clearly part of an interstate plan to transport gas to market outside of Ohio. Thank you for your consideration Paul Overly
