Subject: Oppose the Central Corridor Pipeline Extension Project

Dear PUCO Commissioner Thomas W. Johnson,

As a resident of Sycamore Twp and concerned citizen, I am writing you to register my opposition to Central Corridor Pipeline Extension Project (Reference No. 16-253- GA-BTX).

As a resident of Sycamore Township I am writing you to register my opposition to Central Corridor Pipeline Extension Project (Reference No. 16-253- GA-BTX).

This pipeline will travel through densely populated areas, close to my neighborhood and will pose a danger to residences, schools, businesses, a hospital and houses of worship.

Unlike delivery pipelines, this pipeline will be under up to 720psi pressure and an accident or rupture could cause injuries, death and destruction of property within a radius of 1/3 mile.

If there were an immediate and pressing need to have more power/energy delivered to the area for immediate use it might be different - smaller lines such as those already in place would make more sense. Since this area is not experiencing growth pains and the need is not immediate why should people be put at risk for some possible future need?

Take more time and come up with alternative plans - such as renewable energy sources. The needs and safety of many should come before putting everyone at risk so that Duke can be ready for a future need that may never materialize.

I ask you to oppose this pipeline and encourage both Duke Energy and the Ohio Power Siting Board to reject this pipeline

Thank you for your consideration in this matter
