PUCO

Dear Mr. Haque,

In regards to OPSB case # 16-0253-GA-BTX, I live on Kenwood Road in Madeira OH and would like to lodge a complaint about Duke Energy's location of the proposed natural gas pipeline around the perimeter of Kenwood Country Club. The original plan was to locate this pipeline around the western border of the golf club; a straighter line, and significantly farther from the residences of Madeira. The new plan places this pipeline on the opposite side of the course, and very close to many houses. This could be avoided.

I attended the Duke informational meeting on 1/26, and when I asked several representatives "why this placement", I got shuffled between several people who "didn't know". Finally, one man said "Kenwood Country Club's negotiations were much more advanced than those of Madeira's residents." We didn't even know about it!

Surely the details of this "gentlemen's agreement" should be made public. This pipeline should be placed in the safest location, not placed to avoid the least disruption to the greens and fairways.

Please look into this before this

Dear Ohio Power Siting Board,

In regards to OPSB case # 16-0253-GA-BTX, as a resident of Kenwood Road in Madeira OH, I would like to lodge a complaint about Duke Energy's location of the proposed natural gas pipeline around the eastern perimeter of Kenwood Country Club. The original route was on the western border, along I-71; this was a straighter line, and was significantly farther from the residences of Madeira. The new plan seems more costly to Duke, and more potentially dangerous should a pipeline accident occur.

I attended the Duke informational meeting on Jan 26 and, when I asked "why this new placement", I got shuffled between several representatives who "didn't know". Finally, one Duke rep. said "Kenwood Country Club's negotiations were much more advanced than those of the local residents" We didn't even know about it when this deal was struck!

The details of the agreement between Duke and Kenwood Country Club should be made public. This pipeline should be placed in the safest location. Was it placed along the eastern boundary just to avoid disruption of greens & fairways?

Please look into this before Duke's

plan is finalized, and help assure Madeira's residents that Duke's plan is above board and as safe as possible.
