

QUESTIONNAIRE FOR PUBLIC INFORMATIONAL MEETING

CENTRAL CORRIDOR PIPELINE EXTENSION

January 26, 2017

Please complete this questionnaire after reviewing the information presented at today's open house.

This questionnaire is designed to help review and comment on the proposed routing of a 12 to 14-mile new natural gas pipeline from the northern Hamilton County area to the area of Norwood or Fairfax, Ohio. Your comments will help the project team understand public interests and concerns about the project.

1. Has the need for the proposed project been adequately explained?

☐ Yes ☒ No ☐ Uncertain

If "no" or "uncertain," what additional information would be helpful to you?

How can anyone really determine what future demands are? A lot of baby boomers are going to be passing away in the next 20 years.

2. Which of the following applies to your situation?

☐ Preferred (Eastern) Route ☐ Alternate (Western) Route *Different route*
☐ Potential line route(s) is near my home. ☐ On Property ☐ Adjacent to Property ☐ In City/Village *850 ft from house*
☐ Potential line route(s) is near my farm or business. ☐ On Property ☐ Adjacent to Property ☐ In City/Village.
☐ Not directly affected by potential routes. *I think the pipes are safe if installed right.*
 Other, please specify *my problem is the cost. We have to deal with MSD also*

3. Do you have any questions or comments concerning this project or the routes presented?

I believe the cost is way underestimated considering the dense population and all the utilities that will have to be moved, concrete being replaced, traffic controls, to see the wisdom is shocking. No one could tell me the cheapest route. They didn't know where the pipes are being made. I know nobody wants to deal with this but the preferred route is beyond all common sense. I've marked in blue the cheapest route.

4. Are there other features or structures not shown on the maps that you feel should be brought to our attention and considered with regard to either route?

Jewish Hospital has 2 entrances 1 on Galbraith for the parking garage the other on Kennelwood is the Emergency entrance. They have removed all the room on Galbraith road with the new building. The cost to make access to this building alone much less the I Mall will be astronomical. I've sent you a map with the least amount of people and structures and cost, it just common sense.

Please visit one of our computer stations to have the specific location recorded in our project database.

For you unfamiliar with our area the cheapest route is home to some of our richest people. I believe they have already contacted the head engineer for Duke. He got on TV and stated they weren't choosing the rural route! Cheapest Route

Continued on back

6. Do you have any current easements/options on your property? ☐ Yes ☐ No ☒ Unsure

If yes, what type (gas, electric, road, other utility, etc.):

7. Is the public open house format and the information provided helpful for your understanding of the project and process?

OPEN HOUSE FORMAT:

☐ Helpful

☒ Not Helpful

INFORMATION PROVIDED:

☐ Helpful

☐ Not Helpful

PRESENTATION

☐ Helpful

☐ Not Helpful

8. OPTIONAL: Please enter your name and address below. (This information will be kept confidential.)

Name TIM McDONALD Phone 513-731-2032 ^{HOME} 923-6317 ^{CELL}

Address 5601 CARTHAGE AVE

Email: RED 2125@AOL.COM

- ☒ Please add my name to the project mailing list and contact me by (circle one) e-mail or regular mail.

Duke Energy is committed to safely and reliably serving its natural gas customers in the southwest Ohio area for many decades to come. We thank you for coming tonight and your feedback is appreciated.

ADDITIONAL COMMENTS:

Nowadays there is no fixed income, its deteriorated income my person is going to be "suspended" by 66% because of 8 years of no work in the construction industry and a glut of reteribosias. Working peoples income can't + won't keep pace with rising prices. M.S.D is billing up in sewer bills and now in my ~~opinion~~ opinion you "Duke" have chosen one of the most expensive routes for the gas line. There is an alternative but you would have to tear down the Iron Curtain of Indian Hill. They stopped Ronald Reagan Highway but a gas line wouldn't hurt them at all and it would save the rest of us untold amounts of money and 4 years of Traffic Apocolypse. Its just common sense but I believe you have been contacted by people from Indian Hill, why else would you not choose the cheaper and ~~the~~ less populated route?

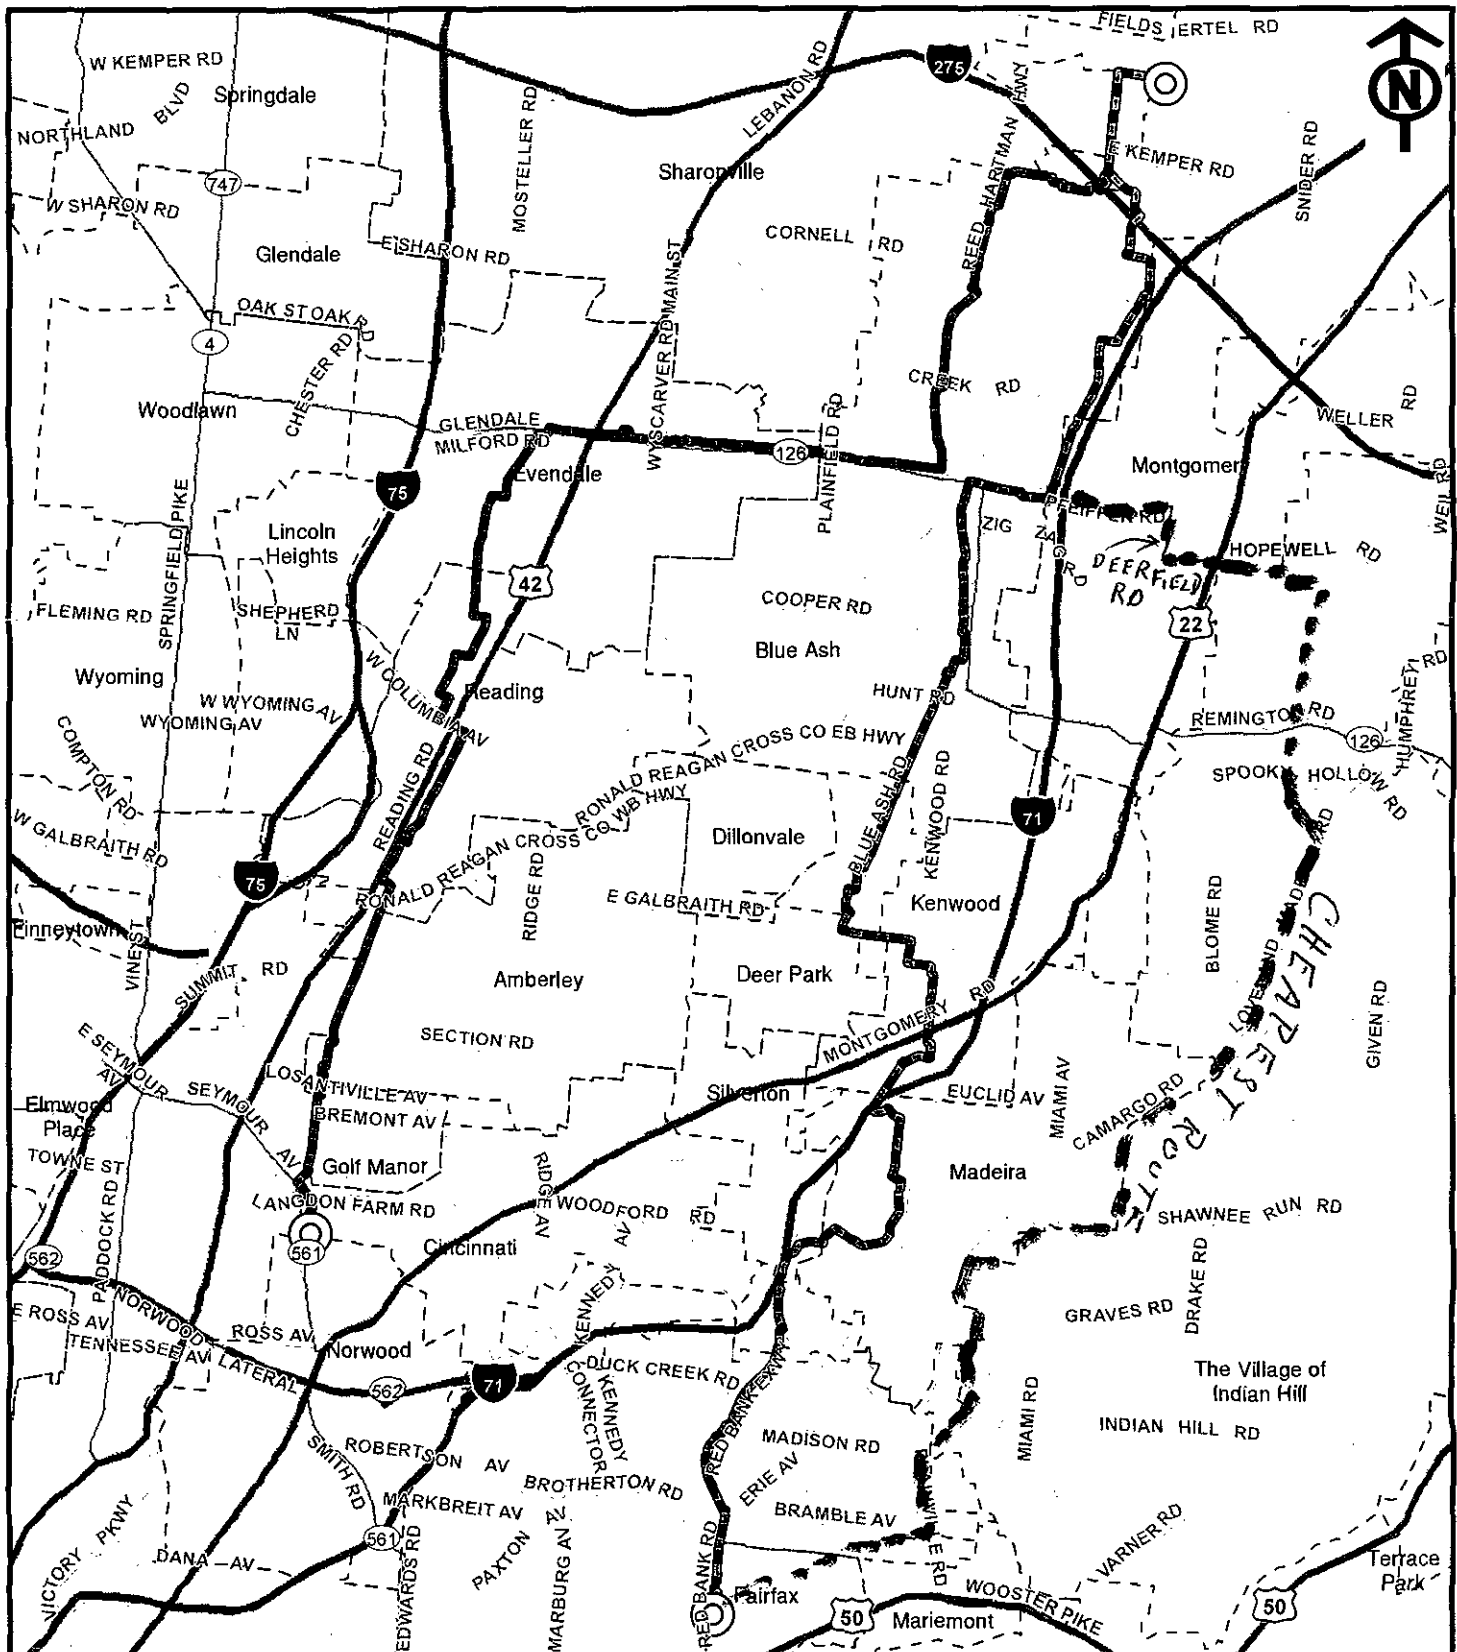

This questionnaire will be also available on at www.duke-energy.com/home/natural-gas/central-corridor-pipeline-ext

If taking the questionnaire with you, please return it by February 3, 2017, to:
