4/1/17

Please refuse this massive and dangerous pipeline. Duke Energy has dealt with the opposition, by making very minor changes and then trying to sell it as a distribution not transmission line. During their so called public education, they would not take questions and go on the record with their answers. They set it up in a format that did not allow for any accountability for their statements. They refused the hard questions in the so called public session and ended it like a dictator dismisses a serf. "Elvis has left the building." You can all go home now.

None of these address serious safety issues in densely populated residential areas, hospitals, schools, churches, recreation fields and shopping areas.

Duke will not answer where this gas is coming from and who it is really for. Do not let them con you too!!

You work for the public safety and need, there is no need. Let their engineers spend money on keeping us safe, or is that no longer the first priority of monies from the **for profit energy corporations???**

Stop this affront to human decency, this is corporate greed supported by government regulations. Please act for the people, not the energy corporation, whose first priority is not the people and safety, but profits. They made billions in profit, not gross but profit. They use that for shareholders, not the people buying the gas, no lower rates with those high profits.

They pass the profits to a limited group, which is not even all Ohio residents. This corporation does not exist for the public good, it exists for their own corporate good. Stop their dangerous plan.

Thank you,

COMMENT DESCRIPTION:

I am writing concerning Case #16-0253-GA-BTX. I am opposed to this pipeline. Today I walked past the Reading Stadium. There was a track meet with 8 school buses of student athletes and the stadium was full of fans. Duke's pipeline will go past the stadium placing all these people in harms way. This scenario is true many times and places along both the routes that Duke has chosen for their pipeline. Why can't this pipeline go down or along the expressway? The answer is the Federal government will not allow it citing safety concerns. Shouldn't these same safety concerns be applied when Duke routes their pipeline through residential and heavily populated areas? Another concern I have is where will Duke's pipeline be vented? Duke has never addressed this issue. This polluted air is both a health and environmental issue considering the heavy population on both of the routes Duke has chosen. Please put people ahead of corporate profits.

To the Siting Board as a group and to each of the members of the Siting Board. Thank you for the time and effort you have put it and will put in to render your best decision on the Duke pipeline extension. The goal is clearly to balance the need to provide adequate natural gas for our community while minimizing the dangers to communities through which this pipeline will flow. You are in the best position to assess this equation and balance as best as possible the competing interests. I suspect that decisions in the past have been weighted toward utilities. Thanks at the present time for giving serious considerations to the community concerns.

Respectfully,

Louis Schroder

**Subject:** Duke pipeline

I am writing to oppose the proposed route of the new Duke pipeline. Many populated communities with schools and residential housing are in the area. I personally live in Reading and have seen that one of the pipelines is very close to my home. From 1994 to 2013, the United States has had 855 serious incidents with pipelines, causing 319 deaths and many more injuries. So when you say that it is perfectly safe, you apparently mean it's safe unless an accident occurs very near your home or school. Please listen to the people in these areas. We oppose it.

Sincerely,  
Patricia Basler
