COMMENT DESCRIPTION:

Regarding proposal AEP: 16-1852-EL-SSO, I would like to express my deep opposition to this proposal. Since the late 1970's I have worked in energy conservation at Oberlin College and Case Western Reserve University. In both institutions, as well as my own home, I have worked to reduce the amount of electricity consumed, and fight the effects of Climate Change caused by burning of coal and other fossil fuels. I am opposed to proposals that allow a utility to charge me a mandatory fee for power I am not using. I also should not be punished, for using less electricity, by steep fixed rates.

Ohio is one of the worst states in the country in terms of energy efficiency and renewable energy implementation. At this very moment our state government is attempting eliminate our renewable energy standards. Ohio needs to wake up and support the expansion of renewable energy and energy efficiency. Lastly, these fixed rate increases are going to impact low income families, who struggle to pay their monthly utility bills already, the hardest. I urge the PUCO to reject all of the fixed rate increases that are being brought before you by the three electric utilities, AEP, Dayton Power and Light and Duke Energy.
