Subject: Duke's Pipeline Project

April 4, 2017
Pipeline Project-Central Corridor
Case # 16-0253-GA-BTX

Ohio Power Sitting Board,

My name is Julianne Goure and my address is 10237 Kenwood Rd, Cincinnati, Ohio 45242. I am a resident

currently in the path of the proposed route of the Central Corridor Gas Pipeline Project. I am sending this e-

mail to voice my opposition. The preferred pipeline route suggested will come directly behind my house. I

am concerned for my property value but more importantly I am concerned with safety issues in case of an explosion. There are many children in schools such as Sycamore High, Edwin H Green, Ursuline Academy,

and possibly Sycamore Jr. High that are inside the danger zone. Right down the street is the Blue Ash

Educational Building that will be within 100 feet which would put it inside the blast zone. As it moves farther

south it will pass shopping centers and hospitals. People already needing hospital care should be able to

feel safe while there. I understand it would cost more money to run the pipeline further out in areas that are

not so populated but human life is more valuable!! The route suggested is unacceptable! I am thankful that

many surrounding communities are getting on board with opposition. I thank Blue Ash City Council and

Sycamore Community Schools for voicing their opposition. Please, please find a way to use areas away

from the citizens that have developed this community into a thriving place to live. The City of Blue Ash has

worked hard with the community to make this a much sought after place to raise a family. Please do not

destroy that. History has shown there have been many serious incidents with gas lines that cause fatalities

and injuries and billions of dollars worth of damages. Please work hard to change the pipeline route!!!

Thank you

Julie Goure

Subject: Opposition to Duke Pipeline Project- case # 16-0253-GA-BTX

Dear Board Members-

I wish to register my strong objection to the proposed Duke Pipeline Project route through the heavily populated Cincinnati suburbs. With so many schools, shops, and residential homes in the immediate vicinity of the proposed pipeline route, any accidental breach would have disastrous consequences and significant cost to life and property. While I understand gas supply is critical to the community and nation as a whole, a more rural route around the Cincinnati beltway would be far safer and more sensible than the route presently proposed. Even though a more indirect route may add some cost to the project in dollars, the potential costs avoided in the event of an accident would be far greater. Thank you in advance for your consideration.
