Regarding:

ATP Case # 16-1852-EL-SSD

042617

I suggest respectfully  
that you reconsider  
a rate increase especially  
for home & commercial  
customers like Bread & Butter  
Sincerely, M. Altier

FILE

## PUBLIC UTILITIES COMMISSION;

I FEEL IT IS UNFAIR THAT CUSTOMERS  
LIKE MYSELF WHO CONSERVE ENERGY; LED BULBS,  
TIMERS, EFFICIENT APPL. ETC SHOULD HAVE TO  
SUPPLY TO SHORTAGES TO KEEP PROFITS UP.

INVESTMENT SHOULD HAVE BEEN MADE  
LONG AGO FOR OTHER ENERGY SOURCES &  
EFFICIENCY PLANTS.

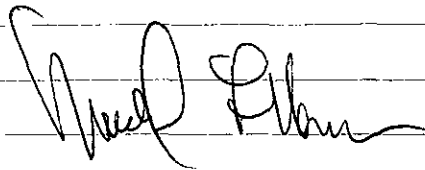

CHARGING US MORE AS A CHARGE  
INSTEAD OF USAGE IS UNCALLED FOR!

The raise in the  
customer charge for  
AEP is not a fair  
charge. The charge  
is because of coal  
remaining uneconomic  
which it isn't. AEP  
had some fuel right  
that would be one thing  
but to charge your  
customers for lost of  
planning expenditure  
Dianne Burr

Dear PUC-

I am writing to urge you  
not to increase the customer  
charge for the sake of increasing  
coal generated power in Ohio. I  
would like to increase the solar  
generated power in Ohio, both  
at the household level, and state level.

Best,

Ramble Krohn

I am against fixed  
rates. I use energy  
efficient appliances.  
A fixed rate would  
negate this.

Why have Utilities  
dragged their feet  
on Clean Energy?  
Maybe AET is denying  
Science and Global  
Warming.  
Help save our Planet!  
Don't destroy it.

CASE # 16-1858-EL-550

Public Utilities Commission of OH,

Our family lives on a very tight monthly budget. We have 2 children under the age of three and pay a significant amount each month toward daycare costs. A increase in our power bill will be unfair and put undo stress on us.

Sincerely,

Courtney & Matt

Hatchel

AEP,

Your proposed increase is just one more example of rich businesses and businessmen and politicians getting richer while beating down the common man. Enough already! Improve your business plan, freeze executive and board member salaries and bonus before you add more financial burden to your customers.

You work better rather than making the customer pay more for the same old services.

RE: AEP Case #

16-1852-EL-SSO

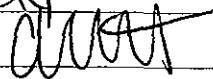

Case # 16-1852-EL-SSO

To whom it may concern (PUCO)

My name is Amy Klatt and I live at 81 Amazon. While a \$5.00 increase to the residential fixed fee may not seem like a lot of money, I am already living paycheck to paycheck. My boyfriend and I are trying to help support 4 children, and I do not want to have to choose between paying my bills or feeding them. An unnecessary increase places an undue burden on my family and I. Please consider this before creating increases that cause us to suffer.

Sincerely,

Dear PUCO,

I am writing regarding the potential increase in the customer service fees imposed to pay for the changes in electric power usage.

With the cost of living increasing far more rapidly than employment compensation, I find myself like many, keeping a tighter budget for general expenses. Substantial increases in utilities and unexplained service charges make it difficult to adhere to a budget, which can cause stress and financial hardships.

Paying slightly more for energy efficiencies and clean energy , however, is a burden that I am willing to help shoulder as it will result in a better environment, the security of sustainable jobs and an investment in a greener future.

As an energy consumer, I will continue to look for ways to be a good environmental steward and I will look toward electricity suppliers to do the same while keeping costs competitive and transparent.

Thank you for considering my concerns as a current – and hopefully future customer.

A massive increase to AEP's "customer charge"  
is unwarranted and extremely regressive as this  
bailout to a very profitable industry will  
overwhelmingly effect those who can't afford it.

I STRONGLY oppose AEP's latest effort to fleece its customers. The "customer charge" is merely an attempt to keep profits high while providing no additional service to its customers.

Please do not allow AEP to increase this charge. It's essentially a bailout.

Sincerely,

Anne Erkman

To Whom it may Concern,

RECEIVED-POCKETING LP

2017 MAY -3 PM 12:58

I am adamantly opposed to the plan to increase mandatory fixed residential fees (AEP case number 16-1852-EL-SSO). The costs of all utilities increases regularly and makes it difficult for families to live reasonably within their means. There is no regard by big utilities for the impact of increased rates on the consumer. My family and I do everything possible to conserve energy and live on our budget. A huge increase in our electric bill will make it difficult if not impossible to invest in other energy saving upgrades and purchase energy efficient appliances.

This push to increase my utility bills and those of my other family members takes away from my choice and ability to choose energy saving upgrades. There should be more efforts toward efficient and clean energy.

Re: 16-1852-EL-SSO

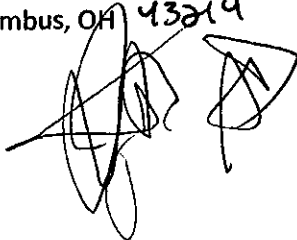

To whom it may concern:

It has come to our attention that AEP plans to increase their fees to consumers by 119% disguised as a "customer charge". Rather than charging high flat fees that have nothing to do with usage, AEP should be looking at ways to save consumers money by encouraging efficiency in energy usage and discouraging reliance on non-renewable resources. AEP should be a leader in looking at alternative energy resources, like solar, and educating the public on how to be efficient with their use of energy.

At a time when belief in science is low, regard for our planet and its people is seemingly non-existent, and corporations reign high, AEP should distinguish itself as a leader. Stop passing the buck to the consumer and become a part of the solution. You have the resources, use them to do good. People will remember when and if you do.
