PUCO

Re: Case Record 15-1830-EL-AIR

Dear PUCO,

Please count me as opposed to Dayton Power & Light's proposed increase to their customer service charge.

I am in favor of more diversified, renewable sources of energy, and I realize that switching away from coal will have its costs. If DP&L is looking for some cash to do so, perhaps they can use the quarter billion dollars they collected as an "electric security plan." The Ohio Supreme Court reversed the decision allowing DP&L to charge that money, but DP&L never had to pay any of that money back.

Sincerely,

John Blackwell,
Beavercreek, Ohio

CASE # 15-1830-EL-AIR

DEAR PUCO

IT HAS BEEN BOUGHT TO
MY ATTENTION THAT DP&L
INTENDS TO MORE THAN
DOUBLE MY CUSTOMER SERVICE
CHARGE. THIS HAS BECOME
REDICULOUS TO EVERYDAY PEOPLE
WHO DO WHAT THEY CAN TO REDUCE
HOUSEHOLD ELECTRIC USE AND
ARE STILL BEING PUNISHED WITH
THESE FEES. . . . WOULD LIKE TO
SEE DP&L INCREASE USE OF
RENEWABLE ENERGY AND PROGRAMS
LIKE THAT.

LIVE US A BREAK!
PLEASE?

DEAR PULCO

I AM OPPOSED TO DAYTON POWER
& LIGHT'S PLAN TO MORE THAN DOUBLE
THEIR CUSTOMER SERVICE CHARGE!

I AM RETIRED & ON A FIXED
INCOME!

CASE # 15-1830-EL-AIR

RICHARD SHERMAN

MR. RICHARD E. SHERMAN
1071 CEYLON CIR.
BEAVERCREEK, OH 45430

Public Utilities Commission of Ohio:

I'm opposed to Dayton Power and Light's plan to more than double their customer service charge. People with fixed incomes like me can't have you nibbling away at their budget.

I want to see DP&L increase their renewable energy and energy efficiency programs, not punish customers who reduce their electric use.

Sincerely,

William P. Cullen
1161 Firewood Dr
Beavercreek, Ohio
45430

To whom it may concern,

As a DPL customer for many years, I am saddened to hear that you will soon be raising my utility usage rates. I feel the reasons are unfair and the result of a decreasingly effective infrastructure. Increased charges are unjust considering there has been little effort to curb the increasing cost to produce the energy for which I am charged.

Research into geothermal and tide and wind energy would benefit both the economy and the environment by reducing pollution and our reliance on non-renewable energy sources.

Please reconsider this rate increase and try to focus more on building for the future instead of trying to prop up a failing and outdated business model.

Sincerely,

Michael A. Miller
