RE: 17-0032-EL-AIR

To whom it may concern -

The planned increase  
in customer care charge  
is untenable. Pls reconsider

- John  
Miller

Regarding Case number

17-0032-EL-AIR

Dear Public Utilities Commission -

I am extremely concerned about your plans to increase the Distribution Customer Charge. My husband and I are planning for retirement, and an increase over which we have no control would be severe. We prefer to moderate our usage in order to save costs.

Thank you,

Alice Finkelstein

As a recent graduate student from Arizona State University money is a top priority. Student loans are controlling daily decisions due to financial burden. A huge increase on my power bill would only contribute to that burden. Efficiency & clean energy for a better future!

-TY.

Case # 17 - 0032-EL-AIR

our family is tightly budgeted.  
We have two small kids, full time good-paying  
jobs - and still, every cent is accounted for.  
Please consider halting your plans to raise the  
energy charge. I don't want to have to  
decide between AC/Heat/Lights vs. a tuition  
payment for my kids.

Sincerely —  
The Shrids

Case #  
17-0032-EL-AIR

Public Utilities Commission of Ohio  
180 E. Broad St.  
Columbus, Ohio  
45215

05/08/17

Case # 17-0032-EL-AIR

It is ignorant + absurd to think the people of Cinti, Oh can afford another mandatory residential fixed fee. Please explain the exact definition of "customer charge". Currently the "customer charge" is \$6.00. It is my understanding that DukeEnergy has the intention of ~~\$60.00~~<sup>200%</sup> nearly a ~~200%~~ increase on<sup>the</sup> so called "customer charge". Yearly the increase is approxamately \$1202 ~~xx~~/yr which my fixed income cannot afford. The increase in ~~xx~~ itself is unethical.

I ask the utilities commission to deny this proposal. It does nothing for the residents of Cincinnati, Ohio except drain our financial resources.

Thank you

Helen A. Payne

Helen A. Payne

May 8, 2017

To: Public Utilities Commission of Ohio -

I'm writing to address the  
raising of rates for family living  
on a budget.

In the opposite direction we  
should be going on efficiency.

Every time you think its set  
rates raise for charges that should  
come out of the tax payers pocket.

Thank you,  
Jen Murphy

case # 17-0032-EZ-AIC

5/8/17

Dear Public Utilities  
Commission of Ohio,

Think about how your family lives on a budget every month. Is a huge increase on your power bill (that you have no ability to reduce or control) fair or doable for your family's budget? If not, please tell the commission the kinds of choices it makes difficult in your family's life.

Thank you,  
Jamie Waaff

CASE # 17-0032 - EL-AIR

5/8/17

Public Utilities Commission

If there is going to be an increase in the distribution customer charge from \$6 to \$22 or more, we ask that you consider an alternative to this. We are a family of 6, on a budget, and will suffer because of this.

Please consider renewables as a clean alternative to energy, for our future and our present. Change is hard, but the public should not pay for what is ultimately a failed, non-renewable form of energy. I think that if you embraced this idea, you would be surprised at the number of consumers that would support and even contribute to making the switch to renewables possible.

The Jeff Family

May 10-17

To whom it may concern.

I am a Senior, and as one  
Pay a ~~\$100~~ month. Everything goes  
up, but wages. It's not fair.  
Energy or any others should <sup>not</sup> have  
to see. Cost of living go up, But  
not our little money we get.

I am happy to be older, but  
let us live in peace & no harm way,  
with what we get. Lets us live  
in comfort & not struggles.

Thank you.

public utilities commission -

as a hardworking citizen, paying 4x the current "customer charge" for the same service is not something that i'm interested in paying for, but will soon have to as a duke energy customer. you could say that i could switch providers but that's not feasible in our area - and i'm sure this is a state.

our home is over 1,000 sq. ft., so it's not like we use an extraordinary amount of electricity on any given day. like trump's "grand" tax plans, maybe you charge per square foot based on a given rate so those with larger homes pay more.

duke has also not made this impending change known to its customers, which is shady.

sincerely,  
a concerned customer

**Public Utilities Commission of Ohio**  
180 East Broad Street  
Columbus, OH 43215

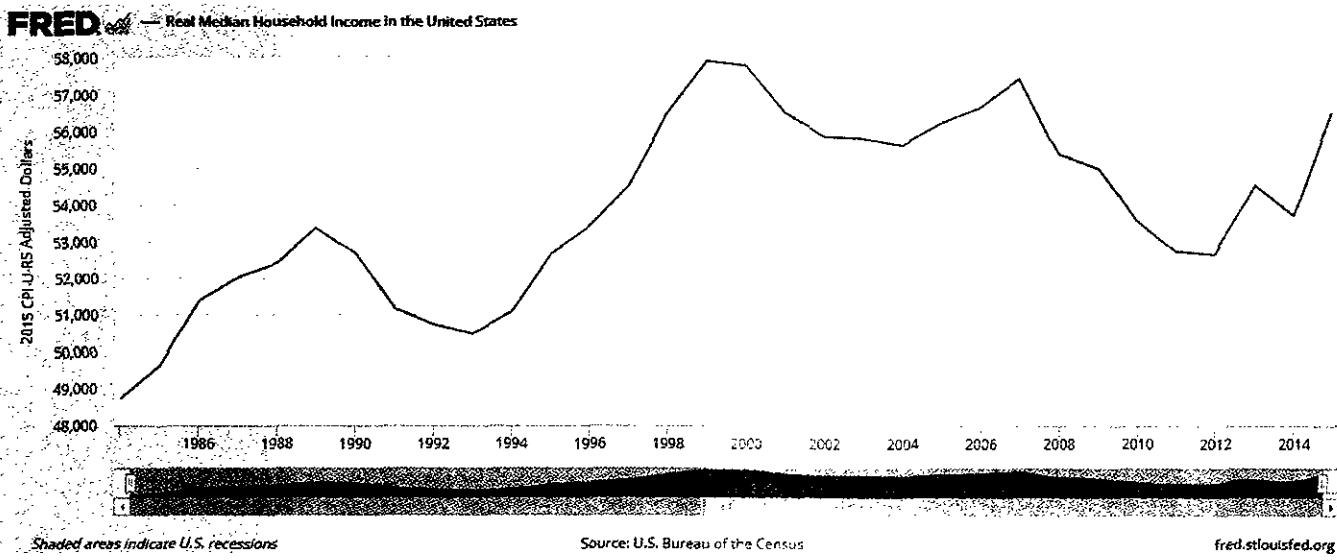

**Case number 17-0032-EL-AIR**

To whom it concerns

I received word that Duke Energy plans on raising our utility access fee, named Distribution Customer Charge from \$6 a month to \$24 a month, a **300% increase**.

As near as I can ascertain my wages have yet to go up 300% in a year, or frankly 300% since 1997, twenty years ago. Some investigation shows that real incomes have actually gone DOWN since 1997. Further research shows this \$6 a month to be a fairly recently added fee which Duke applied for back in 2013. Duke said that they needed the money to help make sure that they remain financially viable. Duke went on to make 3 BILLION dollars in 2015 after this passed so I guess they hit the mark.

**Make no mistake here .. your office is charged with keeping these utilities in line and from abusing their area wide monopoly powers. DO THAT JOB.** Because everyone likes to look at graphics here is one for you. It's an income graph all the way from 1984 to present. It shows not just my income situation but also the income situation of the other residents that Duke would like to charge more. **Do you see a 300% increase there, even all the way back to 1984?** Me either.

This appears to be a Duke Energy trick .. allowing third party power sales within their markets and then making their money on these "access fees". I guess it allows boards like yourselves to tell consumers like me that we will "benefit" from this third party "competition". Please cease with the tricks.

**We are depending on you,**

John A Whitling

Corinne M Cahill

DEAR DUKE,  
VERY SUPPORTIVE OF  
DUKE BUT WHERE WAS {  
NOTIFICATION OF INCREASE  
AND AS FOR RENEWABLE }  
WHY AREN'T YOU  
SUPPORTIVE. CAN NOT  
UNDERSTAND HIGH  
RATE INCREASE.  
CASE NO. 17-0032-EL-AIR

# Duke Energy wants you to pay more every month *before you* *even turn on your lights*

Duke Energy recently rolled out a proposal to increase upfront, mandatory residential fixed fees, called the “customer charge”, from a current \$6 to \$22.77 per month — which is almost four times more than the current charge. This means instead of paying \$72 per year, customers would be paying \$273.24, which for many people is like adding a 13th-14th electric bill.

In states like Wisconsin, this approach has led to higher costs, particularly for low-use and – at times – low-income customers, by reducing customers’ ability to control their bill. It eliminates the incentive to conserve energy and purchase more energy efficient appliances, for instance, because it’s a flat charge you have to pay every month no matter how much energy you use.

In a desperate effort to cover costs in a rapidly changing energy landscape, utilities have proposed these fixed rate charges all over the nation. If they hadn’t banked on coal remaining cheap, they wouldn’t be in the position they’re in.

The good news is, national resistance to these proposals began in 2014 and gained momentum in 2015, once public opposition grew. We need to stop this in Ohio right now. All Ohio residential customers must speak out against fixed rate charges, or we’ll see more utilities turn to them to compensate for their bad business decision to delay the transition to cleaner energy and more efficient energy use.

# Please write the Public Utilities Commission

Letters are most effective when they're written in your own words. Use these thoughts and questions to help craft the message you want to send to the commission:

- ① Think about how your family lives on a budget every month. Is a huge increase on your power bill (that you have no ability to reduce or control) fair or doable for your family's budget? If not, please tell the commission the kinds of choices it makes difficult in your family's life.
- If you'd like to be able to invest in energy saving upgrades, like new energy efficiency appliances or solar, tell the commission how big fixed fees reduce what you can save from making those investments. Tell them how that's both taking away your choice, and is the opposite of the direction we should be going on efficiency and clean energy.

Please include Case number 17-0032-EL-AIR in your letter

**Public Utilities Commission of Ohio  
180 East Broad Street  
Columbus, OH 43215**

Please tape your letters to your door by 7:30 today. Have kids? Get them involved with their own letters or drawings. Thank you.

To Whom It May Concern;

With increasing costs and many fixed & variable  
debs, a dramatic increase in expense from  
DSE is yet another obstacle for families.  
Many families have Panachee to purchase  
and cannot afford these increases. You  
MAYBE on THE MARKET MUST MAKE YOU  
SLEEP WELL AT NIGHT. PLEASE CONSIDER  
THE Families THAT may have TO SELL A HOME  
FOR THE PROPOSED "CUSTOMER CHARGE".

Regards,

R. H.

Public Utilities Commission

180 East Broad Street

Columbus, OH 43215

May 12, 2017

To whom it may concern,

I'm writing to protest the proposed increase in your fixed customer service charge from \$6 to \$22 per month.

It eliminates the incentive to conserve energy. Ohio consumers cannot tolerate this. Short-term attempts to delay the transition to cleaner energy.

Patrick Gush

Re: Duke Energy Rate Rises

To the Public Utilities Commission  
of Ohio,

Our family lives on a budget every month. Additional raises in rates are not affordable for us.

We are, however, interested in investing in energy saving upgrades. This takes away our choice and is the opposite of where we should go in the future.

Thank you for your time and consideration.

A. Reiter

Dear Sirs,

Do not allow Duke Energy  
to raise their rates.

I am a widow on Social  
Security and struggle to meet  
my financial obligations.

Thank you.

Marcia Tinker

Case # 17-0032-EL-AIR

Regarding Case Number 17-0032-EL-AIR

It is my belief that the proposed increase to customer charges is unnecessary. Although at the time of the filing, it may have seemed necessary, the current administration has stated its intention of removing regulations across the board. The deregulation will save the energy companies money than can then be used for (hopefully) further infrastructure and renewable investments. The proposed cost increase is putting unnecessary burden on families that need the money. It hurts people that put forth effort to conserve energy and it obfuscates what should be classified as a rate increase.

Thank you,

Tye Scott

#17-0032-EL-A

To whom it may concern,

I'm on a tight budget/  
fixed income and to have  
utility fees increased  
is definitely will add  
due hardship. I've  
already upgraded my  
appliances to energy efficient  
adding anymore fees  
to my utility bills is  
a hardship. Please  
cut cost somewhere  
else. Sincerely, Dea

Regarding Case # 17-0032-EL-AIR

Dear Public Utilities Commission of  
Ohio,

- Our quality of air should  
be of utmost importance. If there  
are any methods we could take  
to help renewable resources such  
as solar then I would like to  
see them taken. Thank you,

Public Utilities Commission of Ohio  
180 East Broad St.  
Columbus, OH 43215  
Case number: 17-0032-EL-AIR

In this post-recessionary period, millions of Ohioans are still struggling. Wages remain stagnant, yet the cost of living keeps increasing. Raising our energy bills by \$273 a year is unjust, unfair and indefensible.

Instead, you should promote and encourage conservation efforts to achieve energy savings. There are a variety of ways to do this and you can get customers onboard with ideas that would save both energy and money.

Duke Energy should immediately begin the process of transitioning to cleaner, more efficient forms of energy. That is something Ohioans can back and will in partnership. Encourage and aid households to conserve energy and to purchase more energy efficient appliances and devices.

Higher utility costs are not the answer or the solution. Our financial burdens are already too heavy.

Please hear our voices and listen to us.

Sincerely,

Angela Berger  
2546 Cleinview Ave

1610 East McMillan Street  
Cincinnati, OH 45206

RE: Customer Charge Increase from \$6.00 to \$22.77 per month  
CASE NUMBER: 17-0032-EL-AIR

To Whom It May Concern:

I am contacting you to oppose the customer charge increase from \$6.00 to \$22.77 per month. This increase is an outrage because it's a flat charge that customers have to pay every month no matter how much energy we use. This is unethical! Especially when considering so many citizens in Ohio struggle to make payments overall to survive day-to-day. I have personally heard of families who have their water turned off because they cannot afford it. Do not implement any increases in this customer charge. If anything, it should be reduced.

Clean energy is the answer and I strongly encourage using only renewable energy sources and eliminate coal 100%. Coal is expensive, nasty, and contributes to pollution. Get with the ‘green’ movement. Dirty energy is trashing our planet and all of us need to do what we can to save our beloved Earth.

Thank you for your time and consideration.

Brigid O’Kane

Jason Franz

May 12,2017

Dear Public Utilities Commission,

I am writing to oppose the Duke Energy proposal to increase the customer charge from \$6 to \$22 (case 17-0032-EL-AIR). I see this proposed increase as a blatant attempt by Duke Energy to recoup losses to renewable energy sources. Furthermore, this proposal de-incentivizes energy conservation by making more of my monthly bill independent of energy usage. We are at a critical time in this country regarding global warming and wise decision making pertaining to appropriate energy sources. I see this proposal as a step in the wrong direction. I urge you to reject this proposal.

Thank You.

Alison O. Dearden

Public Utilities Commission of Ohio  
180 East Broad St.  
Columbus, Ohio 43215

Dear Commission,

I understand DUKE Energy wants to increase the "Customer charge" from \$6 per month to \$22.77 per month. This amount has nothing to do with the amount of energy we use, it is a flat fee on everyone who has an account with DUKE. This is an unfair increase that will punish people who use less energy. People who use a lot of energy (large houses with air conditioning, lights on all night & day, extra appliances like freezers) will pay no more than \$22.77 and yet use much more energy. People who do not have or use those energy using appliances will be subsidizing those who can afford to pay for those appliances. This is unfair for people on strict budgets and limited income.

Please just say NO to DUKE Energy.

Barbara R Wolf  
Cincinnati, OH, 45206

Case Number 17-0032-EL-AIR

Re: Case # 17-0032-EL-Air

Dear Public Utilities Commission,

I am very concerned about the Duke Energy et al. proposed increase in the "customer fixed fee charge" from \$6.00 to \$22.77 per month. It is a disproportionate increase and I do not support it. It will bring a hardship on too many families' budgets. If it goes through, it will discourage me and I think many other Ohio families from supporting alternative fuels like solar & wind energy because we will not have the funds in our budgets to be able to do so.

I strongly feel that this will hurt Ohio's future & my children's future in the long run.

Sincerely,

Richard A. Kasper

2082 Shimmering Bay Ln  
Cincinnati, OH 4521

10 MAY 17

To whom it may concern,

My name is Gabe Warner and as an active voter in Hamilton County, I am concerned with our lack of focus on clean air and water. Often, in the city, the air can be dangerous for those with respiratory ailments to breathe. Much of this is due to coal-fired power plants in the Ohio Valley. A shift to renewable energy sources would help to alleviate these problems for the people of Hamilton County. I hope my words are heard.

Please consider investing in clean, renewable energy sources for the financial benefit of my household, the medical benefit of the people of Hamilton County, and the overall benefit of our world.

Thank You,

Gabe K

5/10/17

Dear Public Utilities Commission of Ohio,

I am writing this letter to you out of concern for an increase in our Duke monthly energy charge. The new charge is going to make it difficult for us as a family with two young children.

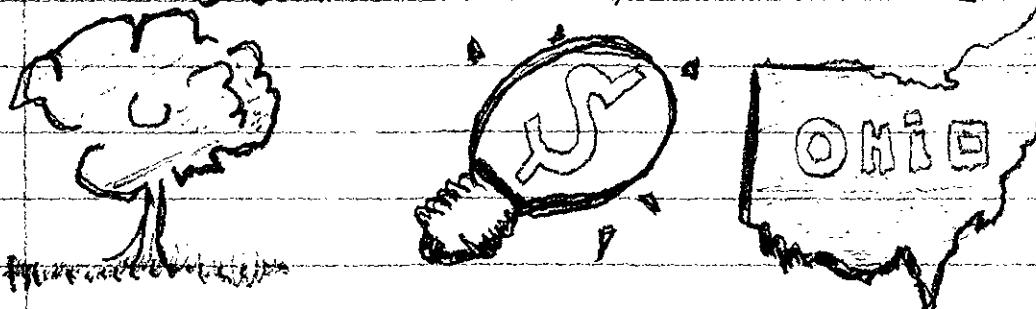

We would like to be able to someday invest in cleaner energy options, but are unsure if we'll have the funds available to save up for this option.

Please help to stop the impending "customer charge" increases.

Sincerely,

1) Dan Rubin (8 family) 2) Jon Rubin

2398 Shimmering Bay  
Cincinnati, OH 45255

Case Number 17-0032-EL-AIR

05/11/17

Dear P.U.C.O.,

I'm writing this letter in response to the fact that Duke Energy is requesting an increase in the custom distribution charge. As a customer, I object to pulling money from my family budget in order to allow Duke Energy to increase their fees. Duke Energy has seen a steady increase in their profitability over the past 5 years. While I understand that they strive to continually increase their profits for their shareholders, I do not feel this should be at the expense of the consumer.

Duke Energy should understand that as an advocate of clean air and water I prefer to use my hard earned family income to upgrade to high efficiency appliances or investment in the community conservation goals. Duke Energy seems to be moving in the opposite direction of my goals. Increasing my energy bill takes away my freedom to choose and control what's best for my family. Fixed rate distribution charges are not the solution. Using my money to invest in efficient appliances will help my family manage and conserve energy. We do not want to pay a higher price for energy. Instead we need to be rewarded for conservation. Thank you.

Kind regards,

Brennan P. Gately

It already cost a lot of money  
to pay for electricity. Raising the  
price would ~~already~~ be even harder for people  
to pay.

Public Utilities Commission of Ohio  
180 East Broad Street  
Columbus, OH 43215

Case # 17-0032-EL-AIR

Unit charges per kWh may fluctuate, but upping the fixed distribution charge by 4 times should never happen. In a time when renewable energy and conservation of energy are of utmost importance, we should be incentivizing responsible energy choices, not punishing people with higher charges before they even have the chance. Every family has a budget, and increasing the distribution charge by 400% is easily noticeable on family budgets. These budgets should be going to purchasing more efficient appliances or solar power instead of big fees.

Please consider going against this massive price hike.

- Kurt Hiffer

To Whom it May Concern,

I am writing in regards to Case number 17-0032-EL-AIR and the proposed increase to the customer charge.

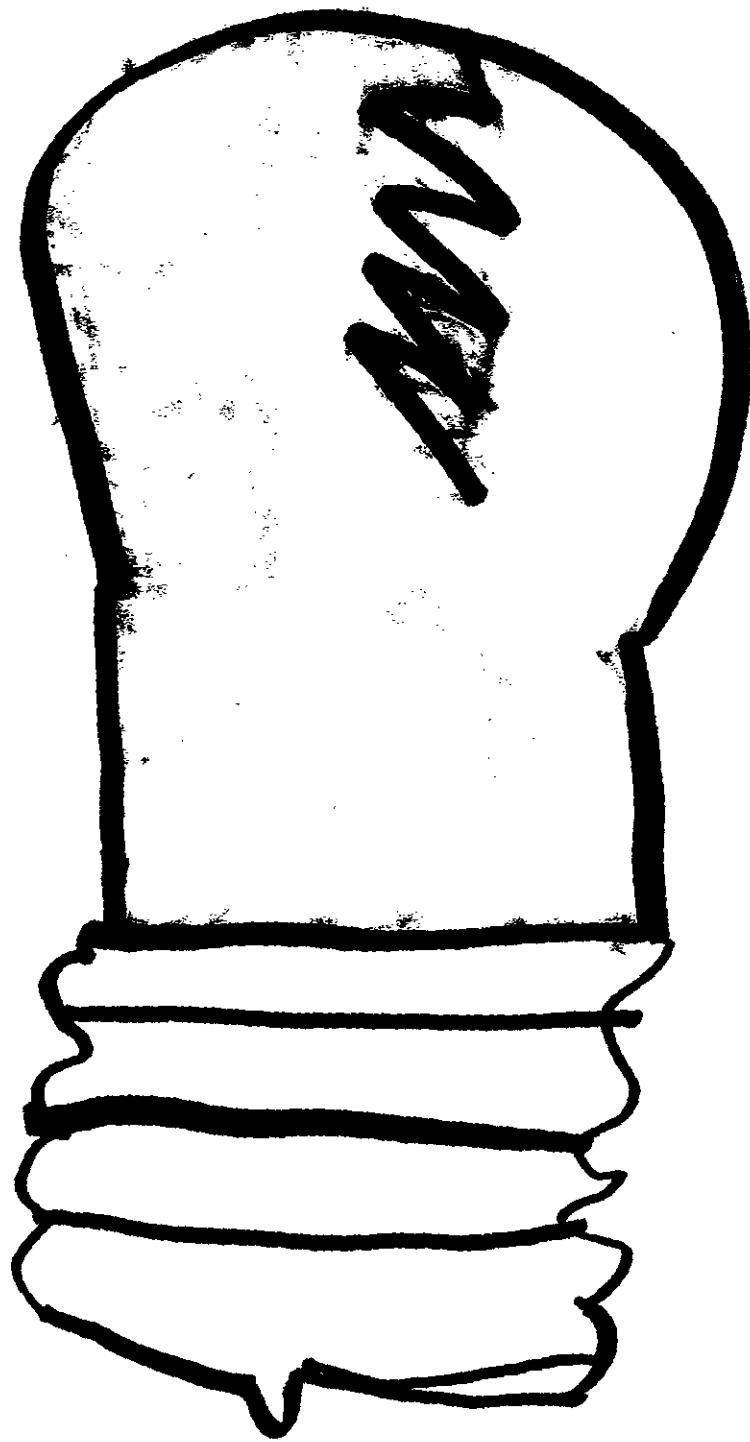

Most families, such as mine, live paycheck to paycheck. Increases, such as these, make it difficult for our family to make ends meet. We rely on you to provide energy at a reasonable fee. We trust that you are considering your customers and not just your bottom line. If you follow through with this increase, it could effect my families ability to provide medication for my daughter.

Please reconsider this increase to help your customers stay your customers.

Thank you,

Jennifer Cook

5/10/2017

Public Utilities Commission of Ohio  
180 East Broad Street  
Columbus, OH 43215

Dear Public Utilities of Ohio,

This letter is an official comment on Duke Energy 17-0032-EL-AFR. My husband and I have three children, we both work full time and recently purchased a home. Like most people I feel it is fair that I pay for what I use. However, like most people I feel it is fair that I pay for what I use. For this reason I am opposed to an increased mandatory fee for power I am not using. A fee increase from \$6 to \$22 represents a more than 300% ~~increase~~ in my bill. Offsetting this fixed rate fee by charging less for use rates disincentivizes using more energy efficient appliances or ~~most~~ in alternate home based energy ~~renewable~~ capture technology like solar or wind power.

Additionally, I have spent the last decade working to support the most vulnerable and disadvantaged members of our community. They rely on a safety net and consumer protection from our government agencies to maintain their often as hold they have on ~~their~~ stability for them and their families. Please vote against this proposed rate change.

Thank you

Molly Lyons J.D.

CASE NUMBER: 17-0032-EL-AIR

To Whom It May Concern:

LEON SILVER  
4676 HAMILTON:  
CINCINNATI, OH 45246

I AM WRITING IN OPPOSITION TO THE PROPOSED INCREASED CUSTOMER CHARGE BY DUKE ENERGY. THE INCREASE AMOUNTS TO OVER \$200/YEAR FOR MY FAMILY, WHICH IS MORE THAN OUR AVERAGE MONTHLY BILL OF AROUND \$150. BASICALLY, THIS INCREASE IS ADDING A 13TH MONTH TO EACH YEAR. I, UNFORTUNATELY, AM NOT GETTING A RAISE AT MY JOB EQUIVALENT TO AN EXTRA MONTH OF PAY.

THIS TYPE OF REGRESSIVE "TAX" IS NOT ONLY A PROBLEM FOR MY FAMILY, BUT IT IS PARTICULARLY BAD FOR THOSE ON FIXED INCOMES & THE ELDERLY. THIS INCLUDES MANY OF MY EXTENDED FAMILY. MAKING NO MISTAKE, THIS IS A TAX. IT IS A TAX THAT ALL USERS OF ELECTRICITY HAVE TO PAY TO COVER THE BAD DECISIONS AND INVESTMENTS OF DUKE ENERGY OVER THE YEARS. I DO NOT FEEL IT IS MY RESPONSIBILITY TO PAY FOR THE MISTAKES OF AN ENERGY MONOPOLY.

FINALLY, THIS TYPE OF TAX MAKES IT MORE DIFFICULT FOR MY FAMILY TO MAKE ENERGY UPDATES SUCH AS INSULATION & UPGRADING OUR CENTRAL AIR. EFFICIENCY IS MY GOAL TO LOWER MY ENERGY BILLS. THIS PROPOSED INCREASE IS A STEP IN THE WRONG DIRECTION.

THANK YOU FOR YOUR TIME AND CONSIDERATION. SINCERELY,  
LEON SILVER

To Whom this May Concern:

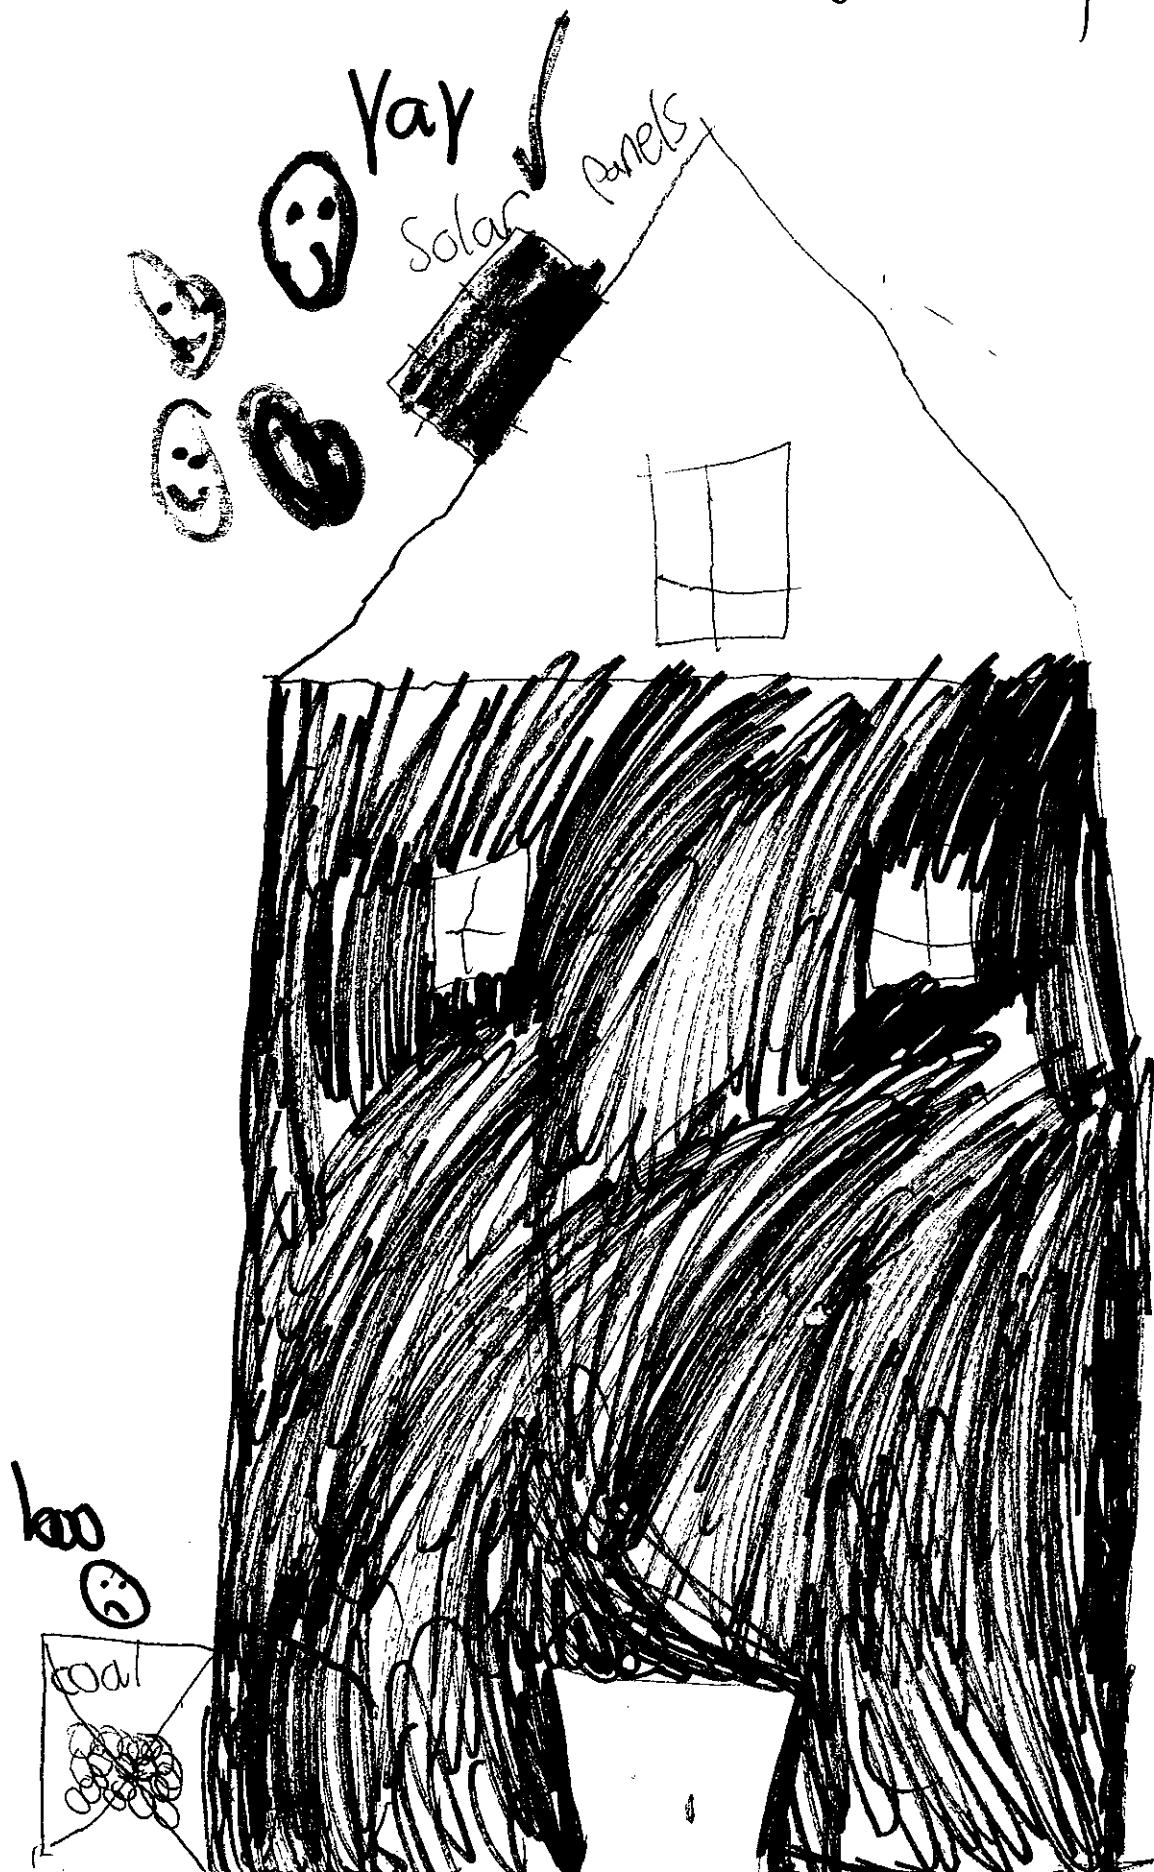

I would like to see the cost of my electric bill remain as low as possible. I would like energy investments to go toward clean, renewable energy sources.

\* I also would like to see smart meters removed from residences because they are negatively affecting our health.

Sincerely  
Bobby Ellis  
Bobby Ell.

Public Utilities  
Commission of Ohio

Public Utilities Commission of Ohio,

Case #  
17-0032-EL-AIR

Duke Energy's request to raise ~~the~~ my distribution customer charge from \$6 a month to over \$22 a month is completely unacceptable and inhumane. It will most impact those struggling to get by without letting households like mine save money by using less electricity or heat.

I recognize that Duke is heavily invested in coal for a majority of our energy and that the costs of that are going up even as jobs in that area decrease. However, Duke needs to get its act together and invest in renewable energy and energy efficiency. It's 2017 already, that is the future, and should really be the present already. It is not okay for them to drag their feet anymore on this issue.

Last but certainly not least is the impact of our health. As far as I know, burning coal in older, out-of-date plants is the leading source of heavy metals in our air in Ohio. I'm asthmatic, and every time I've moved back to Cincinnati, my health has worsened. Ohioans want clean, renewable energy and the jobs it brings, and we want them yesterday.

Meagan Lauer, 931 Dayton St, Cincinnati, OH 45214

Dear Public Utilities Commission of Ohio,

The current proposed rate hikes are very unfair for consumers because they did not have a say when these energy companies were investing in coal. It's time for companies to invest in renewable energy, so we can be on par with other states. Clean air and water is ~~quite~~ quite important, and we should not be neglecting the environment.

The case # I'm referring to is 17-0032-EL-AIR.

Duke Energy should be able to invest in renewable energy in Ohio without having to push this unneeded burden on consumers.

Thanks! Get us on a greener path!

Shawn Karim

(630)965-6088

4815 Muscatine Dr. Cincinnati OH 45207

Case # 17-0032-EL-AIR

Public Utilities Commission of Ohio,

The attempted rate hikes proposed by Duke Energy are a direct assault on consumer rights. Citizens of Ohio DEMAND that you deny these proposals.

The future of energy is renewables. We need to double down on these investments. Because these increases are on the delivery charge and not volumetric charges, it de-incentivizes energy efficiency efforts.

Please deny these rate hikes.

I can hardly afford my energy bill as it is. Raising this fixed rate from \$6 to over \$22 is going to really hurt me financially, and most people that I know.

Do not punish regular people for the bad investments that these utility companies have made.

It is time to invest in renewables. Protect air and water. Protect consumers. Protect PEOPLE, not corporate interest.

Again, the people of Ohio want you to deny this proposal.

Thank you! - Hali Greene

3.20.17

Dear PUCO

The customer distribution charge will  
from \$16 to \$22 is a bit excessive.  
This increase is a 72% increase.  
No one gets a raise of 72%. How  
can such a great increase be justified?

Gas & Electric charges have constantly  
risen, but not to this degree. Families  
on fixed or low incomes will have a  
hard time affording such an increase.  
Adding this increase to the already  
rise cost of other products is a hardship  
for many families.

Dear Duco,

3/20/17

Over the years we have seen our energy bill rise along with other cost of living expenses. We are hard working parents who try to provide all we can for our two young children. We save and budget to enjoy a nice life and still be able to pay our bills. An increase in the mandatory residential "Customer Charge" is unreasonable. We are stretched already and it seems nonsense to add this fee with nothing to show. It's greedy and we will not support it. We do what we can to conserve so our bill is as low as possible. Simply adding a "fee" is not fair. I implore you to reconsider. Think of all the families this increase will effect in a very negative way. It doesn't have to happen.

Thank you for your consideration.

Case # 17 0032 EL AIR

Dear Public Utilities Commission of Ohio,

I've recently learned that the State of Ohio is considering a proposal from Duke Energy (case number 17-0032-EL-AIR) to increase mandatory residential fixed fees from its current \$6.00 to \$22.77 per month. I'm from Florida, and I can survive with no power because where I live is hot. But I can't imagine living somewhere that gets as cold as Ohio does, and not being able to afford electricity because of a dramatically increased fixed rate. Living paycheck to paycheck only works when there aren't any surprises. It's the little inconveniences that pull you under. Like a busted car engine, like a leak in the roof, like a raised fixed rate on your electricity bill. Making it a fixed rate changes the options from 'using less electricity' ~~or struggling~~ to 'not using any electricity' or 'paying more than twice the amount for electricity no matter how much or if you use it'. Not only that, but Ohio is ranked third in the nation for toxic air pollution because it uses so much coal. If Ohio relied on a renewable/sustainable energy source such as wind turbines or solar panels it would reduce the cost of electricity/energy in the long run, benefit the environment, and reduce the financial stress on struggling Ohio citizens.

Best,

Miriam Carlson  
4223 Virginia Ave,  
Cincinnati, OH 45223

Dear PUCC,

I am a concerned ohio citizen who does not support Duke Energy's proposal to increase everyone's utility costs. Rather than having their consumers essentially bail them out, DUKE needs to be investing in sustainable forms of Energy. Coal is becoming out dated, and Duke would not sustain economically, and the environment would not begin to clean if we keep on buying fossil fuels at this rate. Coal is the number one contributor to pollution in ohio - a state ranked to have the third worst air toxicities in the nation. We all need to do what we can to protect our air & water in ohio - and for Duke it means they NEED to divest from coal, and begin providing folks clean forms of energy. We use less than 2.5% renewable energy in Ohio. We need to be using more renewables, and our shift in energy dependence. This begins with Duke, DPL, AEP, and all of our other wonderful utility providers across the state.

THANK YOU,

Adam Dill

Case # 17-0032-EL-AIR

I'll think to save Energy.

I try to turn off all of the lights.

Some people leave them on like that

(cuz) nuts I think its up to

to make my mom and dad  
spend more money on energy.

But energy is very important.

I think everyone should check to

see if all lights are off. Because

that what my sister, dad, mom

and I do. I love energy.

It helps us see in the dark.

Sense we use it all the time.

I think it shouldn't be so expensive.

Energy is fun to use some

times. But you still shouldn't turn

it off on off on and use

it all the time. Remember

energy is important.

By your very old

This increase of money in  
my mom and dads energy bill  
is UNFAIR because they  
already spend enough money on my  
younger sister and I and we use  
energy such as water, lights, and  
heating and air conditioning all  
the time! So PUCO I ~~PUCO~~ think  
you really should not make the bill  
any more expensive than it is. THANKS!

To the, "Public Utilities of Ohio"

Regarding case number 17-0032-EL-AIR,  
I first believe it is extremely important to have  
clean water in ohio because drinking the dirty  
water and using the dirty water wont only effect  
the direct people but the people of tomorrow.  
I secondly believe the water and the air participate  
in the effects and should be corrected.

Dear Public Utilities Commission of Ohio,

The Duke Energy is trying to increase the "Customer Charge" by 4 times and the bill also known as Case # Number 17-0032-EC-  
AIR  
It's @ the Coals fault and the Greed that flows thru the U.S.A  
Government. Coal Plants damage the air and if you damage the  
air you damage everything around you, the water, the plants and  
the water.

Dear Public Utilities Commission of Ohio,

The Duke Energy is trying to increase the "customer charge" by 4 times and the bill also known as Casenumber "17-0082-EL-AIR".  
Thereasen the price is going up because Coal is getting more expensive  
and the Coal also pollutes our air and our water both very important  
to humans ~~the~~ beings and other living creatures.  
Your ways informing people such as a citizen of OHIO do  
Not approve of this Nonsense.

dirty air

Fresh air

Public Utilities Commission:

RE: Customer charge increase Duke Energy  
CASE No. 17-0032-EL-AIR

We are customers living in our present home for thirty-five years. We are now retired and on a fixed income.

Over the years we have increased the efficiency of the energy used in our home with substantial upgrades. Such as whole house installation, and appliances.

How can other homeowners make that choice now with big fixed fees reducing what you can save from making those investments. That's path taking away your choice, and is the opposite of the direction we should be going on efficiency and clean energy.

Don't increase the Distribution Customer Chg. It is not fair to make residents pay more when these charges are already paying too much.

Mr. & Mrs. Larry Meister

**DATE:** March 14, 2017

**REGARDING:** Case Number 17-0032-EL-AIR

As a young family of 5 we struggle daily to meet our financial obligations. My wife and I both work just to provide for our 3 children ages 7, 5, and 2. It's a constant struggle trying to put them through school, provide constructive activities for them to learn and grow, and keep the roof over our heads while putting food on the table. Our money is planned to the penny with none to spare and often not enough to provide the basic costs of living. Each week we juggle what little we have to pick up the modest amount groceries to get us through until we do it again the next week. We have had to make deep sacrifices just to be able to have anything to juggle. We shop discount stores and off brand items just to stretch our money. We have cut out our landline, television service, and reduced our internet service to help. Any increase to our monthly expenses would have a severely adverse impact on ability to help foster a rich and loving environment to raise our children. It would force us to choose between providing rewarding and constructive activities for them and making sure they have heat to in the house to keep them warm through the long winter nights. We would love the opportunity to invest in energy saving upgrades like solar power for our house or even simply more energy efficient appliances. As it is right now though, we need to decide if we are buying milk for the week or vegetables. A fixed fee increase, such as the one currently proposed by Duke Energy, could have devastating consequences on our family and takes our financial planning in the wrong direction. We sincerely hope the proposed "customer charge" is reconsidered. We have been loyal customers but at a time when we are trying to build the foundations of our children's lives, which will be the future of our society, we are fearful of the lasting consequences this may have on our family, and our community. Thank you for your time and attention to this matter.

Stephen J. Niermann

To the Public Utilities Commission of Ohio  
Re: Case # 17-0032-EL-AJR

Considering Duke Energy's proposal to raise the mandatory residential fixed fee to 4 times the current charge concerns me for many reasons.

The cost of living is becoming higher & higher every day. It is very worrisome to consider such a large jump for something that is leaving me no choice. It will cause me to be unable to do many things that I work hard for.

Please stop this from happening.

As we don't know what the future holds & we should not be taken advantage of

Dear Poco,

I've heard of the plan to increase the power cost. Many familys are living paycheck to paycheck. Even our familys. My family decided to send me to a Catholic High School which isn't cheap if Duke was to increase the amount it would put a big hurt on my family and we probably wouldn't be able to make our budget every month.

It really sucks that we have no control over how much it cost just to have power at your house which is a necessity these days.

We think that we would rather be spending the money on solar panels that will help save the earth while also saving many familys money each month.

Case # 17-0032-EL-AIR

Dear PUCO,

I am a single mom with four children. I am currently working 80+ hrs a week to be able to support my family. If the current "customer charge" is raised to \$22.77 mo means I have to cut back even more than I currently do. To many people this may not be a large amount of money, but in my case,(and others) I am sure it will make living even more stressful than it already is by adding more financial stress.

Thank You for your attention

Re case # 17-0032-EL-AIR

To whom it may concern:

The proposed hike in the mandatory residential fixed fees<sup>by Duke Energy</sup> is quite extensive. For many years Duke consistently failed to read our meter and we received estimated bills even though Duke had instructions about how to access our meter. More times than not, the estimation was over the amount used so our even billing was higher than necessary. With remote reading now available that issue has been resolved. However numerous times we were overcharged. Although not specifically related to Service charges we have paid more than our fair share over time. Even billing is now consistent with our usage. Municipal Aggregation of costs has also help get our energy expenditure more in line with our budget. An increase of nearly 4 times the current amount is an unnecessary adjustment to our expenses.

Philip Moore

Dear Poco,

I am writing in regards to case number 17-0032-EL-AIR. Ohioans are already paying too much for energy. Duke Energy is trying to penalize us even more just because we are being more efficient. This increase is just another bailout for big energy.

Tim and Nataia McGraw

Reference Case 17-0032-EL-Air

You have the responsibility to the citizens of Ohio (like me) on a fixed income to prevent the energy companies from charging exorbitant rates. We need to work together to keep rates reasonable, and protect the environment.

Thanks to the information on the PUCO website, I have changed my power provider to be BOTH low cost and environmentally responsible. I expect you to deny Duke Energy's application for higher rates, and pressure Duke Energy to keep rates low for all of us, and replace the old coal burning plants with any of the environmentally better energy sources available.

Thanks for protecting our state.

Karl Munson

March 23<sup>rd</sup>, 2017  
8021 Dimmick Rd  
Cincinnati Ohio

Dear Poco,

To our family, I think our budget is just enough to pay all our bills and have a little left for ourselves. I honestly don't think a huge increase on our power bill wouldn't be doable unless my family works harder than they already have been. My family has to balance their job(s) with what their children need for school and stuff. The amount of money that my family is working for, is perfectly fine to balance everything and the bill. But if the bill goes uncontrollably high, it wouldn't be fair. My family fully supports anything for clean environments. Just the other day, we saw a truck squirt out a HUG~~E~~ amount of dark gas into the air. I think everyone wouldn't want to see that on our Earth anymore.

PUCO -

To whom it may concern...  
Many people in the U.S. are  
on fixed incomes. My  
husband & I are just two.  
Our income does not go up  
& we will have no ability to  
control increases in our  
Public Utilities.

Thank you

Linda Glass

Dear PUCO,

It has been brought to my attention that Duke Energy proposes to put in place a mandatory residential fixed fee. The current charge is \$6.00 per month, but the rate will jump to \$22.77. This hardly seems fair to customers on a fixed income. Customers should be charged according to the amount of energy they use and can afford.

I cannot believe your customers approve this proposal. I suggest you rethink this proposal.

Better Homes in reference to Case number 17-0032-EL-AIR.

Dear PUCO Mar 23/17

Please do not approve Duke Energy's request for higher delivery fees. Each month my family and I do what we can to control our expenses and find ways to be more efficient. I would expect Duke Energy to be investing in more efficient & environmentally friendly choices for energy - not coal!

Thank you for your attention to this matter,

Sincerely,

Shayl Trusk

RE: Case #17-0032-EL-AIR

Dear PUCO,

I have recently learned that Duke Energy has proposed to increase my "customer charge" from \$6.00 to over \$22.00 per month. I feel this is an outrageous increase and pray that this increase is not allowed. I do what I can to save energy and spend my hard earned money wisely, only to be charged a fee by a company who cannot do the same.

A respectable corporation would find a way to work around rising costs without passing it on to their loyal customers.

Please deny Duke Energy's proposal.

Thank You,

April J. Wingate

To increase my Duke bill  
Would make it very difficult  
for me. I'm on a fixed income  
and I'm 82 years old and my  
husband is deceased. My monthly  
budget could not handle an increase  
on my Duke bill.

Thank you

CASE # 17-0032

-EL-AIR

Dear PJCO

My resources are limited and I will  
not be able to pay any increase in  
my gas & electric bills. I'm 74 yrs  
old and working at a job that's pay  
less than \$5.00 per hour.

As a disabled Veteran my Disability income  
is less than \$400 per month.

John Dupoey

PLEASE DENY THE DUKE

ENERGY PROPOSAL TO INCREASE

THE UPFRONT MANDATORY

RESIDENTIAL FIXED FEES

FOR I LIVE ON A FIXED

INCOME AND ANY INCREASES

CUTS INTO MY BUDGET

CASE # 17-0032-EL-AIR

317 ANDERSON CT

CINCINNATI OHIO

45238.

Dear PUCO

I'm writing in reference to case # 17-0032-EL-  
AIR

The proposal of Duke Energy to raise their customer charge from 6 to over 22 dollars per month is a clear violation of consumer rights. There is no justification for this increase to the fixed rate. It's clear that Duke is just trying to cover their loss of profit from a history of bad investments and the dying coal industry. It's no secret that coal can't hold its own in our current market. The only reason Ohio hasn't put more effort into utilizing renewable energy is because of the amount of money these huge coal electric companies have. If money is what is valued in this country, then switching to renewables makes sense. There are more jobs in the clean energy industry & the efficiency of these alternative energies saves consumers money. Now, if you're a decent human and money is not the paramount value in your life the answer is even ~~more~~ strongly more obvious. Coal is disgusting. To continue using this dirty energy source causes tremendous destruction.

to air & water. The people who are most exposed to this are low income & communities of color. Zoom out & the release of carbon from digging up & burning this stuff is ruining our entire planet. The wealthy coal CEOs don't get to ruin lives of the poor or anyone just to protect their wallet. Everyone benefits when we let coal go. Don't let them keep up this dirty business by charging their consumers over \$200 per year.

Thanks,

Cinci., OH 45238

I am against the huge increase  
to my power bill proposed  
by Duke Energy that  
I have no ability to  
reduce or control. Being  
a new home owner I am  
budgetting for home improvements  
and the extra money  
I would be paying Duke  
could be saved.
