**Re: 16-1871-EL-BGN Icebreaker Windpower**

Dear Members of the OPSB,

I am a retiree and a member of Local 435. I spent many years working as a Carpenter in our community. I've seen good times and bad in our State and in Northeast Ohio. I've been fortunate to have raised my family and prepared for our retirement and I want my kids to have the same opportunities I have received. With Icebreaker Wind we have an incredible opportunity to build an entirely new industry in Northeast Ohio and across the Great Lakes. Icebreaker Wind will result in thousands of jobs in construction, manufacturing and production, provide energy independence, clean air and healthier families throughout the Great Lakes.

By 2030 offshore wind will have a major impact on the economic and environmental condition of our region and the entire Great Lakes: powering 2 million homes, creating 8,000 Ohio jobs, and adding nearly \$13 billion in gross regional product. As we've learned, we must grab new opportunities and give them the support they need to thrive.

This project will create jobs that will support families, grow our communities, provide energy independence and open the door to many other opportunities in manufacturing, construction and energy production for years to come.

I support Icebreaker Wind's power siting permit application and urge you to support its approval.

Sincerely,

*Betsy W. Fennell*

**Re: 16-1871-EL-BGN Icebreaker Windpower**

Dear Members of the OPSB,

I have been a Carpenter and a member of Local 435 for almost 14 years. I've seen good times and bad in our State and in Northeast Ohio. When we have our eye on the future we are successful. But when we don't, our jobs vanish, our kids leave for better opportunities and we all suffer.

Today we are moving in a positive direction, with new building, infrastructure, road and bridge projects underway. Whether you see it from the highways, the lake or overhead, it's hard not to be impressed with the stunning skyline of Cleveland and the renaissance across Northeast Ohio. As we've learned, we must grab new opportunities and give them the support they need to thrive.

Icebreaker Wind opens the door to a whole new industry in our region. The development of Icebreaker Wind will lead to a fresh water wind energy industry in Lake Erie and across the Great Lakes. With it will come thousands of jobs in construction, manufacturing and production, providing energy independence, clean air and healthier families throughout the Great Lakes.

I support Icebreaker Wind's application and urge you to support its approval.

Sincerely,

Ken Burr

A handwritten signature in black ink, appearing to read "Ken Burr", with a stylized, flowing script.

**Re: 16-1871-EL-BGN Icebreaker Windpower**

Dear Members of the OPSB,

I am an apprentice in The United Brotherhood of Carpenters. I look forward to having the opportunity to have a good paying job right here in my own backyard.

I am writing to ask you to support Icebreaker Wind's application for approval to move forward with its project to build six wind turbines in Lake Erie north of Cleveland. This project will open the door to thousands of new jobs and will allow me to stay close to home, raise my family and be part of building an exciting future for Northeast Ohio and the entire Great Lakes region.

Building a freshwater wind energy industry will help insure a strong economic future as well as producing cleaner air, healthier families and thousands of jobs for our region's future.

Sincerely,

 Tyler Bowling

**Re: 16-1871-EL-BGN Icebreaker Windpower**

Dear Members of the OPSB,

I am a Carpenter and have been a member of Local 285 for more than \_\_ years. I enthusiastically support the Icebreaker Wind project and urge you to approve its application. Icebreaker Wind is the first freshwater offshore wind farm in North America, and only the second offshore wind farm in the United States.

Icebreaker Wind will put Northeast Ohio at the cutting edge of a clean renewable offshore wind industry and create a whole new fresh water wind energy industry in Lake Erie and across the Great Lakes. With it will come thousands of jobs in construction, manufacturing and production, providing energy independence and healthier families as a result of the reduced air pollution generated by wind power.

Today Northeast Ohio is moving in a positive direction, with new building, infrastructure, road and bridge projects underway. Icebreaker Wind will build on this momentum by leveraging our region's strengths in manufacturing and technology innovation to create an offshore wind industry with the potential to create thousands of new jobs and billions of dollars in gross regional product by 2030. The offshore wind industry in Europe has created nearly 80,000 jobs and keeps growing.

I support the Icebreaker Wind's project and urge you to approve its application.

Sincerely,

PETER J. BUCEY

I have been a Carpenter and a member of Local 435 for almost \_\_\_ years. I've seen good times and bad in our State and in Northeast Ohio. When we have our eye on the future we are successful. But when we don't, our jobs vanish, our kids leave for better opportunities and we all suffer.

Today we are moving in a positive direction, with new building, infrastructure, road and bridge projects underway. Whether you see it from the highways, the lake or overhead, it's hard not to be impressed with the stunning skyline of Cleveland and the renaissance across Northeast Ohio. As we've learned, we must grab new opportunities and give them the support they need to thrive.

Icebreaker Wind opens the door to a whole new industry in our region. The development of Icebreaker Wind will lead to a fresh water wind energy industry in Lake Erie and across the Great Lakes. With it will come thousands of jobs in construction, manufacturing and production, providing energy independence, clean air and healthier families throughout the Great Lakes.

I support Icebreaker Wind's application and urge you to support its approval.

Sincerely,

Anthony Alfred  

**Re: 16-1871-EL-BGN Icebreaker Windpower**

Dear Members of the OPSB,

I am a retiree and a member of Local 435. I spent many years working as a Carpenter in our community. I've seen good times and bad in our State and in Northeast Ohio. I've been fortunate to have raised my family and prepared for our retirement and I want my kids to have the same opportunities I have received. With Icebreaker Wind we have an incredible opportunity to build an entirely new industry in Northeast Ohio and across the Great Lakes. Icebreaker Wind will result in thousands of jobs in construction, manufacturing and production, provide energy independence, clean air and healthier families throughout the Great Lakes.

By 2030 offshore wind will have a major impact on the economic and environmental condition of our region and the entire Great Lakes: powering 2 million homes, creating 8,000 Ohio jobs, and adding nearly \$13 billion in gross regional product. As we've learned, we must grab new opportunities and give them the support they need to thrive.

This project will create jobs that will support families, grow our communities, provide energy independence and open the door to many other opportunities in manufacturing, construction and energy production for years to come.

I support Icebreaker Wind's power siting permit application and urge you to support its approval.

Sincerely,

*Robert Schenk*  
*Parma OH*

**Re: 16-1871-EL-BGN Icebreaker Windpower**

Dear Members of the OPSB,

I am an apprentice in The United Brotherhood of Carpenters. I look forward to having the opportunity to have a good paying job right here in my own backyard.

I am writing to ask you to support Icebreaker Wind's application for approval to move forward with its project to build six wind turbines in Lake Erie north of Cleveland. This project will open the door to thousands of new jobs and will allow me to stay close to home, raise my family and be part of building an exciting future for Northeast Ohio and the entire Great Lakes region.

Building a freshwater wind energy industry will help insure a strong economic future as well as producing cleaner air, healthier families and thousands of jobs for our region's future.

Sincerely, Michael Cirino

Sincerely,

A handwritten signature in black ink, appearing to be 'AJ' followed by a long horizontal stroke.

**Re: 16-1871-EL-BGN Icebreaker Windpower**

Dear Members of the OPSB,

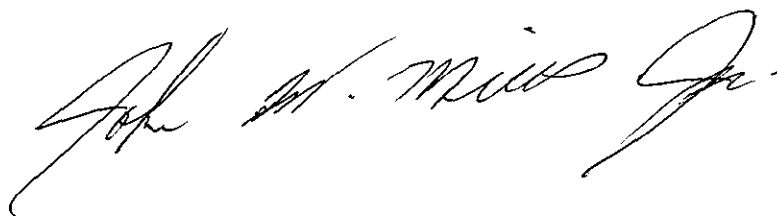

I have been a member of The United Brotherhood of Carpenters for many years. I support Icebreaker Wind's project to build wind turbines in Lake Erie and urge you to approve its application.

The development of Icebreaker Wind will lead to a fresh water wind energy industry in Lake Erie and across the Great Lakes. Icebreaker Wind will leverage our region's strengths in manufacturing and technology innovation to create an offshore wind industry with the potential to create thousands of new jobs and billions of dollars in gross regional product by 2030. This project will open the door to thousands of new jobs and will allow me to stay close to home, raise my family and be part of building an exciting future for Northeast Ohio and the entire Great Lakes region.

Beyond the economic benefits, this offshore wind project will generate clean, renewable energy, enough to power the equivalent of 7,000 homes in Northeast Ohio. Icebreaker Wind will reduce carbon pollution by 12 million tons per year and mercury dumped into Lake Erie by 700 pounds per year – protecting Lake Erie and the region.

For all these reasons, I urge you to approve Icebreaker Wind's application. Thank you for your consideration.

Sincerely,

A handwritten signature in black ink, reading "John M. Miller Jr." in a cursive script.

**Re: 16-1871-EL-BGN Icebreaker Windpower**

Dear Members of the OPSB,

I am a Carpenter and have been a member of Local 373 for many years. I enthusiastically support the Icebreaker Wind project and urge you to approve its application. Icebreaker Wind is the first freshwater offshore wind farm in North America, and only the second offshore wind farm in the United States.

Icebreaker Wind will put Northeast Ohio at the cutting edge of a clean renewable offshore wind industry and create a whole new fresh water wind energy industry in Lake Erie and across the Great Lakes. With it will come thousands of jobs in construction, manufacturing and production, providing energy independence and healthier families as a result of the reduced air pollution generated by wind power.

Today Northeast Ohio is moving in a positive direction, with new building, infrastructure, road and bridge projects underway. Icebreaker Wind will build on this momentum by leveraging our region's strengths in manufacturing and technology innovation to create an offshore wind industry with the potential to create thousands of new jobs and billions of dollars in gross regional product by 2030. The offshore wind industry in Europe has created nearly 80,000 jobs and keeps growing.

I support the Icebreaker Wind's project and urge you to approve its application.

Sincerely,

A handwritten signature in cursive script, appearing to read "Antonio Gorm".

Dear Members of the OPSB,

I am a Carpenter and have been a member of Local 373 for many years. I enthusiastically support the Icebreaker Wind project and urge you to approve its application. Icebreaker Wind is the first freshwater offshore wind farm in North America, and only the second offshore wind farm in the United States.

Icebreaker Wind will put Northeast Ohio at the cutting edge of a clean renewable offshore wind industry and create a whole new fresh water wind energy industry in Lake Erie and across the Great Lakes. With it will come thousands of jobs in construction, manufacturing and production, providing energy independence and healthier families as a result of the reduced air pollution generated by wind power.

Today Northeast Ohio is moving in a positive direction, with new building, infrastructure, road and bridge projects underway. Icebreaker Wind will build on this momentum by leveraging our region's strengths in manufacturing and technology innovation to create an offshore wind industry with the potential to create thousands of new jobs and billions of dollars in gross regional product by 2030. The offshore wind industry in Europe has created nearly 80,000 jobs and keeps growing.

I support the Icebreaker Wind's project and urge you to approve its application.

Sincerely,

A handwritten signature in black ink, reading "Gary O. Wood". The signature is written in a cursive style with a long, sweeping horizontal line extending to the right from the end of the name.

**Re: 16-1871-EL-BGN Icebreaker Windpower**

Dear Members of the OPSB,

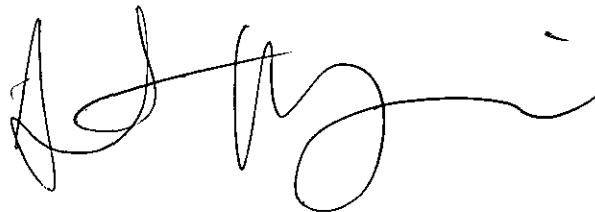

I have been a Union Carpenter and a member of Local 373 for many years. I've seen good times and bad in our State and in Northeast Ohio. When we have our eye on the future we are successful. But when we don't, our jobs vanish, our kids leave for better opportunities and we all suffer.

Today we are moving in a positive direction, with new building, infrastructure, road and bridge projects underway. Whether you see it from the highways, the lake or overhead, it's hard not to be impressed with the stunning skyline of Cleveland and the renaissance across Northeast Ohio. As we've learned, we must grab new opportunities and give them the support they need to thrive.

Icebreaker Wind opens the door to a whole new industry in our region. The development of Icebreaker Wind will lead to a fresh water wind energy industry in Lake Erie and across the Great Lakes. With it will come thousands of jobs in construction, manufacturing and production, providing energy independence, clean air and healthier families throughout the Great Lakes.

I support Icebreaker Wind's application and urge you to support its approval.

Sincerely,

A handwritten signature in black ink, appearing to be "J. H. [unclear]", written in a cursive style.

**Re: 16-1871-EL-BGN Icebreaker Windpower**

Dear Members of the OPSB,

I am a retiree and a member of Local 373. I spent my career working as a Union Carpenter in our community. I've seen good times and bad in our State and in Northeast Ohio. I've been fortunate to have raised my family and prepared for our retirement and I want my kids to have the same opportunities I have received. With Icebreaker Wind we have an incredible opportunity to build an entirely new industry in Northeast Ohio and across the Great Lakes. Icebreaker Wind will result in thousands of jobs in construction, manufacturing and production, provide energy independence, clean air and healthier families throughout the Great Lakes.

By 2030 offshore wind will have a major impact on the economic and environmental condition of our region and the entire Great Lakes: powering 2 million homes, creating 8,000 Ohio jobs, and adding nearly \$13 billion in gross regional product. As we've learned, we must grab new opportunities and give them the support they need to thrive.

This project will create jobs that will support families, grow our communities, provide energy independence and open the door to many other opportunities in manufacturing, construction and energy production for years to come.

I support Icebreaker Wind's power siting permit application and urge you to support its approval.

Sincerely,

A handwritten signature in black ink, reading "Frank E. Keating". The signature is written in a cursive, flowing style with a large initial "F" and a prominent "K".

Whether you see it from the highways, the lake or overhead, it's hard not to be impressed with the stunning skyline of Cleveland and the renaissance across Northeast Ohio. As we've learned, we must grab new opportunities and give them the support they need to thrive.

Icebreaker Wind opens the door to a whole new industry in our region. The development of Icebreaker Wind will lead to a fresh water wind energy industry in Lake Erie and across the Great Lakes. With it will come thousands of jobs in construction, manufacturing and production, providing energy independence, clean air and healthier families throughout the Great Lakes.

I support Icebreaker Wind's application and urge you to support its approval.

Sincerely,

William Gluon

**Re: 16-1871-EL-BGN Icebreaker Windpower**

Dear Members of the OPSB,

I have been a Carpenter and a member of Local 435 for almost \_\_ years. I've seen good times and bad in our State and in Northeast Ohio. When we have our eye on the future we are successful. But when we don't, our jobs vanish, our kids leave for better opportunities and we all suffer.

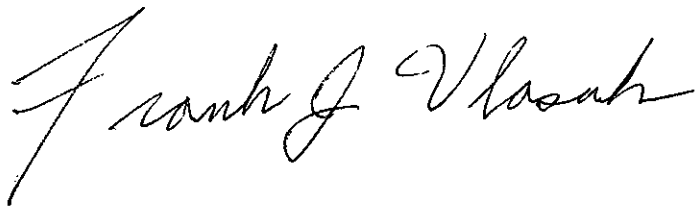

Today we are moving in a positive direction, with new building, infrastructure, road and bridge projects underway. Whether you see it from the highways, the lake or overhead, it's hard not to be impressed with the stunning skyline of Cleveland and the renaissance across Northeast Ohio. As we've learned, we must grab new opportunities and give them the support they need to thrive.

Icebreaker Wind opens the door to a whole new industry in our region. The development of Icebreaker Wind will lead to a fresh water wind energy industry in Lake Erie and across the Great Lakes. With it will come thousands of jobs in construction, manufacturing and production, providing energy independence, clean air and healthier families throughout the Great Lakes.

I support Icebreaker Wind's application and urge you to support its approval.

Sincerely,

**(Member Letter 1: to OPSB from Carpenter or Millwright)**

**Re: 16-1871-EL-BGN Icebreaker Windpower**

Dear Members of the OPSB,

I am a member of The United Brotherhood of Carpenters and a member of Local 285. I enthusiastically support the Icebreaker Wind project and urge you to approve its application. Icebreaker Wind is the first freshwater offshore wind farm in North America, and only the second offshore wind farm in the United States.

Icebreaker Wind will put Northeast Ohio at the cutting edge of a clean renewable offshore wind industry and create a whole new fresh water wind energy industry in Lake Erie and across the Great Lakes. With it will come thousands of jobs in construction, manufacturing and production, providing energy independence and healthier families as a result of the reduced air pollution generated by wind power.

Today Northeast Ohio is moving in a positive direction, with new building, infrastructure, road and bridge projects underway. Icebreaker Wind will build on this momentum by leveraging our region's strengths in manufacturing and technology innovation to create an offshore wind industry with the potential to create thousands of new jobs and billions of dollars in gross regional product by 2030. The offshore wind industry in Europe has created nearly 80,000 jobs and keeps growing.

I support the Icebreaker Wind's project and urge you to approve its application.

Sincerely,

  
Charles J. Rohr
