Ohio Gas Company

Case No. 17-1139-GA-AIR, et al.

Test Year: January 1, 2017 to December 31, 2017

Date Certain: December 31, 2016

Section S

- S-1 Most recent five year capital expenditures budget
- S-2.1 Five year projected income statement
- S-2.2 Five year projected balance sheet
- S-2.3 Five year projected cash flow statement
- S-2.4 Assumptions
- S-3 Proposed notice of newspaper publication
- S-4.1 Executive summary of corporate process utilized by the board of directors and corporate officers
- S-4.2 Management policies and practices and organization to meet corporate goals

OHIO GAS COMPANY CASE NO. 17-1139-GA-AIR FIVE YEAR PROJECTED CAPITAL EXPENDITURES 2017 - 2021

Ohio Gas Company Case Nos. 17-1139-GA-AIR, *et al.* Schedule S-3 Proposed Legal Notice

Ohio Gas Company has filed with the Public Utilities Commission of Ohio ("PUCO") an Application seeking authorization to increase its rates for the provision of natural gas distribution and transportation service and to amend its tariffs and obtain approval for certain accounting changes. The Application, *In the Matter of the Application of Ohio Gas Company for an Increase in Gas Distribution Rates*, Case No. 17-1139-GA-AIR, and two related cases, *In the Matter of the Application of Ohio Gas Company for Tariff Approval*, Case No. 17-1140-GA-ATA, and *In the Matter of the Application of Ohio Gas Company for Approval of Certain Accounting Authority*, Case No. 17-1141-GA-AAM, were filed on May 31, 2017.

The last time that Ohio Gas Company was authorized to increase its rates for the provision of natural gas service was in 1985. It is seeking an increase in rates because of increases in costs, increased investment in plant to serve customers, and an erosion in gas sales due to the increased energy content of the natural gas supplied to customers. The proposed rates reflect the investment needed to continue to provide safe and reliable natural gas distribution and transportation service to the customers of Ohio Gas Company at just and reasonable prices.

This case does not propose to change the way that natural gas will be secured for the customer under the Community Energy Partnership or transportation contracts that have been entered by certain large natural gas users and Ohio Gas Company.

Ohio Gas Company has proposed the rate change based on the costs it would incur during a test year from January 1, 2017 to December 31, 2017 and the value of gas distribution plant as of December 31, 2016. The Application seeks approval of an increase in the monthly customer charge from its current level of \$5.45 per month to \$10.91 per month. If a customer consumed 100 CCF of natural gas, the percentage increase in the customer's total bill would be 6.44% over current charges.

The Application also seeks increases in certain onetime charges including charges for reconnection, field collection of bills, and checks returned for insufficient funds, and new charges for tie-ins, meter relocations, installation of excess flow valves, and investigation fees associated with tampering and fraud.

Recommendations which differ from the Application may be made by the staff of the PUCO or by intervening parties and may be adopted by the PUCO.

Any person, firm, corporation, or association may file, pursuant to section 4909.19 of the Revised Code, an objection to such proposed increased rate by alleging that such proposal is unjust and discriminatory or unreasonable.

A copy of the Application is available for inspection at the office of Ohio Gas Company located at 200 West High Street, Bryan, Ohio 43506 and at the PUCO, Docketing Division, 11th Floor, Columbus, Ohio 43215. The Application and supporting documents may also be viewed at the PUCO's web page at <u>http://www.puco.gov</u>, by selecting DIS, inputting 17-1139 in the case lookup box, and selecting the date the Application was filed.

OHIO GAS COMPANY CASE NO. 17-1139-GA-AIR Witness: Kim Watkins No Workpapers

Schedule S-4.1 Page 1 of 2

Ohio Gas Company serves approximately 50,000 customers in the six most northwest counties of Ohio. The service territory includes 28 communities, the largest being the City of Defiance.

Ohio Gas has maintained operating franchise agreements with all 28 communities. These agreements define how Ohio Gas will conduct its operations within the communities' rights-of-way. In addition to operating franchise agreements, Ohio Gas and all 28 communities have agreed to a Community Energy Partnership (CEP) ordinance and an ordinance authorizing contractual arrangements (between Ohio Gas and industrial customers within the municipal boundaries) to be filed with the local community. Contractual arrangements with industrial customers outside of any municipal boundary are filed with the PUCO.

The CEP Program is a community based commodity aggregation program of residential and small commercial customers. Each community acts as the agent for the aggregated customers for the purpose of obtaining a natural gas supply and having that supply delivered to Ohio Gas. Ohio Gas transports that supply to the end user under the authority of its transportation tariff. From the period of 1997 through 2009, all communities and customers in rural areas adopted the CEP Program. In 2009, Ohio Gas completely exited the merchant function.

The larger Industrial and Commercial customers on the Ohio Gas system obtain their own supply of natural gas and contract for that supply to be delivered to Ohio Gas. Ohio Gas then transports that supply under contractual authority.

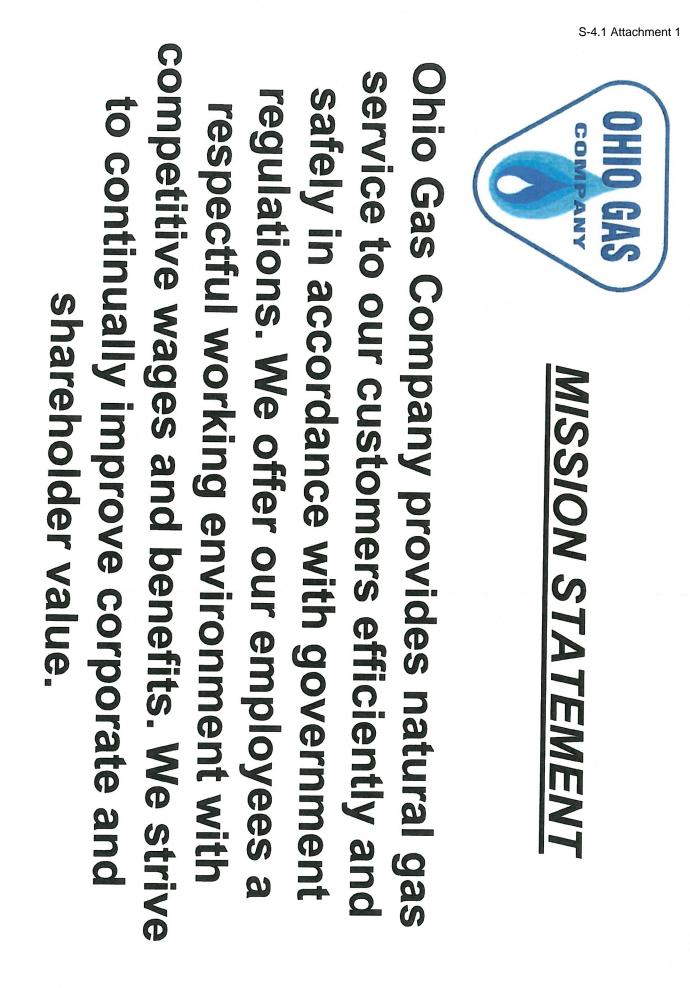

The corporate process of the Ohio Gas Company and its ownership is intended to recognize the interests of its customers, its employees and its ownership as stated in its Mission Statement (S-4.1 Attachment 1).

The ownership is represented by the Board of Directors (S-4.1 Attachment 2) with the main involvement coming from the Chairman of the Board. NWO Resources has direct approval authority for all wage and salary increases, all employee benefit programs, the annual level of capital expenditures and the dividend. Each year an annual capital and operating budget is prepared and approved by the Chairman of the Board. A long-term system capital needs assessment is prepared by the Senior Vice President and his staff. This process is ongoing and will be discussed in S-4.2.

Schedule S-4.1 Page 2 of 2

NWO Resources does not get involved in the day-to-day operations of Ohio Gas. It is the Officers responsibility to conduct the day-to-day operations within the parameters of the approved annual operations and capital budget.

The Chairman of the Board visits Ohio Gas several times a year and meets with the Officers (S-4.1 Attachment 3). The purpose of these meetings is to discuss the day-today operations as they relate to the approved annual operating and capital budgets.

Gas Supply (OGES) Industrial Services (OGC)

Schedule S-4.2 Page 2 of 4

OFFICER Treasurer & Corporate Secretary FUNCTIONAL AREAS Cash Management Federal Tax Return Pension Plan Administrator Annual Financial Forecast Rates & Tariff Corporate Records Insurance Regulatory

President

The President of Ohio Gas directs the operations of the Company in accordance with the objectives of ownership and the Company's Mission Statement (S-4.1 Attachment 1). The President reports directly to the Chairman of the Board. The Marketing Department is under the direct control of the President. The marketing function includes involvement in economic development activities in the Ohio Gas service territory. The President is responsible for all charitable donations made by the Company.

Senior Vice President Operations

The Senior Vice President of Operations has responsibility for all field operations, gas measurement and distribution support services. The overall philosophy of the Operations Department is to provide managers with operating standards and let the day to day operating decisions be made at the manager level. Over the years, this philosophy has served Ohio Gas well. Ohio Gas always gets positive responses from area developers on how accommodating Ohio Gas is and the fact that they can get a decision timely without going through excessive layers of management.

Bi-weekly operations meetings are held throughout the year allowing managers of all areas to discuss their area's progress toward the annual capital and O & M budgets. Deviations from budgeted activities or unforeseen requirements are discussed and noted.

The Senior Vice President of Operations and his staff periodically engage in an ongoing system needs assessment. This needs assessment is presented to ownership when capital requirements exceed annual depreciation provisions by a significant amount.

Schedule S-4.2 Page 3 of 4

Field Services

The Field Services Department is divided into the Eastern District and the Western District and each district has a manager reporting to the Senior Vice President Operations. The Eastern District has two service offices, Wauseon and Swanton. The Western District's service offices are Bryan and Defiance. Each service office has a Lead Service Tech reporting to their respective Managers.

Gas Measurement

The Gas Measurement Department is responsible for all meter and regulator maintenance and capital additions. Interstate delivery stations and city gate pressure regulator stations are monitored and maintained by Meter Shop personnel. Large industrial meters & regulators are maintained based on performance and accumulated mileage through the meter. Residential meters & regulators are maintained according to a periodic computer sampling program based on historical meter performance.

Distribution Support Services

Distribution Support Services is comprised of the construction function, engineering function and the pipeline maintenance functions. This department manages tasks requiring pipeline contractors as well as company personnel. In addition, they oversee pipeline safety regulatory compliance.

Vice President Personnel & Information Technology

The Vice President Personnel & Information Technology meets with the managers of Information Technology and Gas Control monthly. In addition, the Vice President attends the quarterly Gas Control meeting with the System Controllers. All three managers submit a monthly report detailing tasks that have been accomplished and items being worked on with regards to the approved budget.

Vice President & Controller

Responsibilities include the functional areas of accounting, budgeting and state & local taxes. This area is responsible for all monthly, quarterly and annual reporting to management, ownership, PUCO, auditors and other outside parties.

Schedule S-4.2 Page 4 of 4

The Vice President & Controller coordinates the monthly closing process with all departments including the customer billing system, cash receipts, payroll, accounts payable/receivable and the capital work order system. The annual O&M and capital budgeting process is coordinated in this area along with all State and Local tax filings.

Vice President Gas Supply & Industrial Services

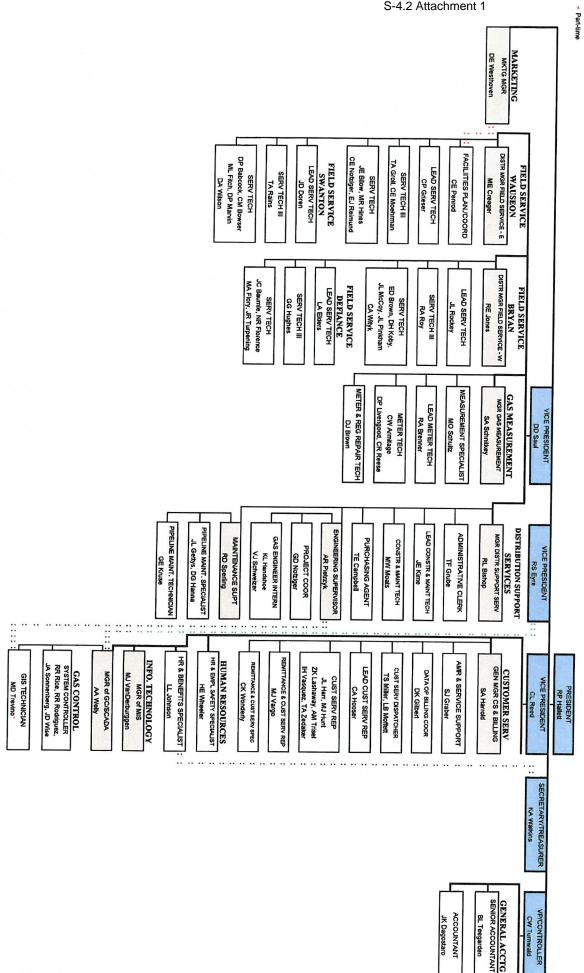

The Vice President Gas Supply & Industrial Services has functional responsibilities split between Ohio Gas Company and Ohio Gas Energy Services. Ohio Gas has exited the merchant function and only transports end user gas that is delivered to Ohio Gas Company. Ohio Gas Energy Services at the present time secures the commodity, transmission and storage functions for all 28 communities participating in the CEP program. This area is responsible for industrial/large commercial transportation contract administration for Ohio Gas Company.

The administration of all commodity, interstate transmission and third party storage contracts is handled in this area for Ohio Gas Energy Services. Ohio Gas Energy Services administers the commodity, interstate transmission and third party storage requirements as agent for all 28 CEP community aggregation pools.

Treasurer & Corporate Secretary

The Treasurer & Corporate Secretary position is responsible for the functions of cash management, federal taxes, pension plan administration, annual financial forecast, rates & tariffs, corporate records, insurance and regulatory.

The cash management function is primarily devoted to Ohio Gas Energy Services. All gas purchases are performed by Ohio Gas Energy Services. Cash receipts for the CEP-GCR billings are done by OGC and OGC purchases the receivable for the CEP-GCR at 100%. The remaining functions are primarily devoted to Ohio Gas Company.

DIRECT TESTIMONY OF DAVID A. BERG ON BEHALF OF OHIO GAS COMPANY

- 1 Q1. Please state your name and business address.
- 2 A1. My name is David Berg and my business address is 15213 Danbury Ave W,
- 3 Rosemount, MN 55068.
- 4 Q2. Who are you employed by?
- 5 A2. I am the Principal of Dave Berg Consulting, LLC. Dave Berg Consulting is a single

6 person utility financial consulting firm formed in 2012.

7 Q3. Please describe your education and professional work experience.

8 A3. I have Master of Science (1984) and Bachelor of Science (1983) degrees in 9 Electrical Engineering from North Dakota State University. I am a licensed professional engineer in the states of Minnesota and Missouri. From 1984-1988 I 10 11 was employed as a planning engineer with Burns & McDonnell in Kansas City, MO. From 1988-2012 I was with R.W. Beck (later called SAIC) in their 12 Minneapolis, MN area office. I was a principal with R.W. Beck and was national 13 director of the rates and regulatory group. In my current position, I primarily work 14

C0102166:1

with natural gas, electric, water and wastewater utilities performing cost of service
 and rate design studies. Since 2004 I have been an instructor for an in-depth
 electric cost-of-service and rate design course that has been taught throughout the
 U.S. through Electric Utility Consultants, Inc. ("EUCI"). Over 1000 utility

- professionals have attended my training sessions.
- 6 Q4. Have you previously testified before the Public Utilities Commission of
- 7 **Ohio?**
- 8 A4. No, I have not.
- 9 Q5. What is the purpose of your testimony?
- 10 A5. I have prepared the cost-of-service analysis for the Ohio Gas Company
- 11 ("Company") as part of this proceeding.

12 Q6. Have you included any exhibits with your testimony?

13 A6. Yes, my testimony includes the following exhibits:

Exhibit Number	Exhibit Title
DAB-1	Functionalization of Expenses
DAB-2	Functionalization Allocators
DAB-3	Functionalization of Plant and Rate Base
DAB-4	Functionalization of Labor
DAB-5	Classification of Transmission Expenses
DAB-6	Classification of Transmission Plant and
	Rate Base
DAB-7	Classification of Distribution Expenses
DAB-8	Classification of Distribution Plant and
	Rate Base
DAB-9	Classification of Customer Expenses
DAB-10	Classification of Customer Plant and Rate
	Base
DAB-11	Allocation Factors
DAB-12	Allocation of Operating Expenses
DAB-13	Allocation of Rate Base

14 Q7. Why has a cost-of-service study been prepared?

1 A7. The cost-of-service analysis has been prepared to allocate the Ohio Gas Company's operating expenses between the jurisdictional or tariff customers 2 ("Tariff Customers") and the non-jurisdictional or contract customers ("Contract 3 Customers"). The analysis also addresses allocation of plant and rate base 4 between Tariff Customers and Contract Customers. The allocation of plant is 5 related to the physical plant assets of Ohio Gas Company. The gross plant and 6 accumulated depreciation values by account number were each analyzed. The 7 difference between gross plant and accumulated depreciation for each account 8 9 results in net plant. Other rate base items such as various cash accounts, materials and supplies and deferred taxes were also analyzed individually. The 10 total of net plant and other rate base items results in the total allocated rate base. 11

12 Q8. Why does the cost-of-service analysis only address operating expenses?

Typically, a full cost-of-service analysis would include all revenue requirements A8. 13 including operation and maintenance expenses, depreciation, taxes other than 14 income taxes, income taxes, return on investment and other operating revenues. 15 The issues of depreciation, income taxes, return on investment and other operating 16 17 revenues are addressed in separate Ohio Gas Company testimony prepared by others. From a revenue requirements perspective, the analysis included with my 18 testimony only addresses the allocation of normal operation and maintenance 19 20 expenses and taxes other than income taxes between the Tariff Customers and the Contract Customers. 21

22 Q9. Is the cost of wholesale natural gas addressed in your analysis?

C0102166:1

4

A9. No, because the Ohio Gas Company has previously exited the natural gas
 commodity merchant function; it is a gas transporter only.

3 Q10. Please briefly describe the approach you took in performing your analysis.

A10. Utilizing 2016 actual values, the expenses were first functionalized as 4 5 Transmission, Distribution or Customer related expenses. Within each of these three functions, the expenses were then classified as demand, commodity or 6 customer related. The functionalized and classified expenses were then allocated 7 to the Tariff Customer and Contract Customer groups using specifically developed 8 9 allocators. The analysis results in an allocation of total 2016 operating expenses between these two groups of customers. The same approach was utilized for 10 allocation of plant and rate base. 11

12 Q11. Please describe the functionalization of the operating expenses.

A11. In Exhibit DAB-1, the 2016 operating expense values are listed by Federal Energy Regulatory Commission ("FERC") accounting number. The basis for the functionalization of each expense item is shown in the far-right column of the exhibit. Direct allocations to each function are shown as 100% transmission, 100% distribution or 100% customer. The following derived allocators were developed for non-direct expense allocations across the functions.

Derived Functionalization Allocator	Description			
Gross Plant	Functionalization of Gross Plant			
Accumulated Depreciation	Functionalization of Accumulated			
	Depreciation			
Net Plant	Functionalization of Net Plant			
Rate Base	Functionalization of Rate Base			
Operating Expenses	Total Functionalization of Operating			
	Expenses			

C0102166:1

Direct Labor	Sum of Labor Directly Charged to
	Functions

1		Exhibit DAB-2 shows each of the allocators used within the functionalization of the
2		operating expenses. The functionalization of Gross Plant, Accumulated
3		Depreciation, Net Plant and Rate Base is summarized in Exhibit DAB-3. Actual
4		labor charged by FERC account and the resulting labor dollars by function is
5		shown in Exhibit DAB-4.
6	Q12.	How were the taxes other than income taxes addressed within
7		functionalization?
8	A12.	The taxes other than income taxes were categorized as revenue, labor, O&M,
9		plant, or throughput related taxes. Each category of tax was then functionalized.
10		Work paper WP-DAB-1 summarizes the categorization of these taxes.
11	Q13.	What was the result of the functionalization of operating expenses?
12	A13.	The total 2016 operating expenses as allocated to the three functions are as
13		follows:
14 15 16 17		Transmission function\$1,774,663Distribution function4,474,716Customer function4,393,609Total Operating Expenses\$10,642,988
18	Q14.	What was the result of the functionalization of plant and rate base?
19	A14.	The total 2016 net plant and rate base as allocated to the three functions are as
20		follows:
21 22 23 24 25		Net PlantOther Rate BaseTotalTransmission function\$9,762,223(\$749,340)\$9,012,883Distribution function17,327,628(2,011,451)15,316,176Customer function10,489,033(2,963,560)7,525,473Total\$37,578,885(\$5,724,352)\$31,854,533

Q15. How were the transmission function expenses and plant/rate base 1 classified? 2

With the exception of throughput related taxes, all transmission related expenses 3 A15. were classified as demand related expenses. The throughput related taxes were 4 classified as a commodity related expense. The classification of transmission 5 expenses is shown in Exhibit DAB-5. The classified transmission expenses 6 7 are:

8	Demand related	\$1,463,763
9	Commodity related	310,900
10	Total Transmission Expenses	\$1,774,663

Exhibit DAB-6 summarizes the classification of transmission plant and rate base 11 as 100% demand related. 12

Q16. How were the distribution function expenses and plant/rate base classified? 13 Distribution function expenses were all classified as demand related expenses. A16. 14 The classification of distribution function expenses is shown in Exhibit DAB-7.

Exhibit DAB-8 shows the classification of distribution plant and rate base as 100% 16 demand related. 17

Q17. How were the customer function expenses and plant/rate base classified? 18

Exhibit DAB-9 details the classification of customer related expenses. Ohio Gas A17. 19 Company serves 17 Contract Customers directly from its transmission system. An 20 21 additional 71 Contract Customers and 49,942 Tariff Customers are served from the distribution system. Within the customer function, certain expenses related to 22 physical services, billing and service/sales are common to all Contract and Tariff 23 24 Customers. There are certain customer expenses that have been classified

15

7

directly to transmission connected Contract Customers. Other customer expenses
 have been classified directly to distribution connected Tariff Customers and certain
 customer expenses are common to both Contract and Tariff Customers served
 from the distribution system. The basis for classification of each customer related
 expense is shown in the far right column of Exhibit DAB-9. The classified customer
 expenses are:

7	Common Services	\$407,136
8	Common Billing	2,285,428
9	Common Service/Sales	265,252
10	Transmission Contract	30,526
11	Distribution Common	617,238
12	Distribution Tariff	788,029
13	Total Customer Expenses	\$4,393,609

Exhibit DAB-10 shows the classification of the customer related plant and rate base. The results of this asset classification were also utilized in certain classification allocators for customer related costs. Work paper WP-DAB-2 shows the breakdown of asset account number 385 as utilized in the classification of that plant account. The resulting classified customer plant/rate base is:

19		Net Plant	Other Rate Base	Total
20	Common Services	\$2,491,586	(\$576,030)	\$1,915,556
21	Common Billing	6,321,416	(1,339,071)	4,982,345
22	Common Service/Sales	34,736	17,332	52,069
23	Transmission Contract	521,887	(126,005)	395,882
24	Distribution Common	876,499	(156,323)	720,176
25	Distribution Tariff	242,910	(783,464)	<u>(\$540,555)</u>
26	Total Customer	\$10,489,033	(\$2,963,560)	\$7,525,473

27 Q18. How were the classified expenses and plant/rate base allocated to the two

- 28 groups of customers?
- A18. Allocators were developed based on the service characteristics of the two groups
 of customers (Contract and Tariff) to allocate the classified expenses across the
 - C0102166:1

customer groups. Exhibit DAB-11 summarizes the available allocators developed
 for this analysis. Direct allocators to either Contract or Tariff Customers were used
 if a certain expense should be allocated 100% to either group. Work paper WP DAB-3 shows the breakdown of MCF commodity sales to each group of customers
 as well as the system peak day and individual customer group peak days resulting
 in the calculation of the average & excess allocator. For the customers connected
 to the distribution system, separate distribution only allocators were developed.

8 Q19. How was the development of customer expense allocation factors done?

9 A19. For customer services, customer billing and customer service/sales specific weighted customer allocators were developed. Tariff Customers were given a 10 weight of one for each of these categories. The weighting factor for Contract 11 Customers in each category were developed based on discussions with Ohio Gas 12 Company representatives. For physical customer services, Contract Customers 13 were given a weight of 10 based on the average cost of a Contract Customer 14 service as compared to the average cost of a Tariff Customer service. Contract 15 Customers were given a weight of 5 for customer billing expenses to reflect the 16 17 more detailed billing requirements for these larger customers. For customer service/sales, the Contract Customers were given a weight of 100 as a reflection 18 of the higher level of customer service effort for an average single Contract 19 20 Customer as compared to an average single Tariff Customer. The weighting factors were utilized for common customer expenses and for distribution system 21 22 connected common customer expenses.

9

1 Q20. What were the results of the allocation of the operating expenses between

2

the two groups of customers?

A20. Exhibit DAB-12 shows the final allocation of expenses and the allocators utilized to achieve the allocation to the Contract Customers and Tariff Customers. The resulting allocations to the two groups of customers are:

- 6Contract Customers\$1,210,7677Tariff Customers9,432,2218Total Operating Expenses\$10,642,988
- 9 Based on the cost-of-service analysis, 88.62% of the operating expenses are
- attributable to the Tariff Customers and 11.38% to the Contract Customers.

11 Q21. What were the results of the allocation of plant/rate base between the two

- 12 groups of customers?
- A21. In Exhibit DAB-13, the rate base as functionalized and classified has been
- allocated to the two groups of customers. The resulting allocations of the rate base
- 15 to the two groups of customers are:
- 16
 Contract Customers
 \$4,927,684

 17
 Tariff Customers
 26,926,849

 18
 Total Rate Base
 \$31,854,533
- Based on my analysis, 84.53% of the rate base is attributable to the Tariff
- 20 Customers and 15.47% to the Contract Customers.

21 Q22. Was your analysis and testimony all prepared by your or under your direct

- supervision?
- 23 A22. Yes.
- 24 **Q23.** Does this conclude your pre-filed direct testimony?
- 25 A23. Yes.

DIRECT TESTIMONY OF JOSEPH G. BOWSER ON BEHALF OF OHIO GAS COMPANY

1 I. INTRODUCTION

- 2 Q1. Please state your name and business address.
- A1. My name is Joseph G. Bowser, 21 East State Street, 17th Floor, Columbus, Ohio
 4 43215.

5 Q2. By whom are you employed and in what position?

- 6 A2. I am a Technical Specialist for McNees Wallace & Nurick LLC ("McNees"),
- 7 providing testimony on behalf of Ohio Gas Company.
- 8 Q3. Please describe your educational background.
- 9 A3. In 1976, I graduated from Clarion State College with a Bachelor of Science
- 10 degree in Accounting. In 1988, I graduated from Rensselaer Polytechnic Institute
- 11 with a Master of Science degree in Finance.

1 Q4. Please describe your professional experience.

2 A4. I have been employed by McNees since 2005, where I focus on assisting 3 IEU-Ohio members address issues that affect the price and availability of utility 4 services. As part of my responsibilities, I provide IEU-Ohio members assistance 5 as they evaluate and act upon opportunities to secure value for their demand response and other capabilities in the base residual auction ("BRA") and 6 7 incremental auctions conducted by PJM Interconnection, L.L.C. ("PJM") as part of the Reliability Pricing Model ("RPM"). Prior to joining McNees, I worked with 8 the Office of the Ohio Consumers' Counsel ("OCC") as Director of Analytical 9 10 Services. There I managed the analysis of financial, accounting and ratemaking 11 issues associated with utility regulatory filings. I also spent ten years at 12 Northeast Utilities, where I held positions in the Regulatory Planning and Accounting Departments, provided litigation support in regulatory hearings, and 13 14 assisted in the preparation of the financial/technical documents filed with state 15 and federal regulatory commissions. I began my career with the Federal Energy Regulatory Commission ("FERC"), where I led and conducted audits of gas and 16 electric utilities in the Eastern and Midwestern regions of the United States. I am 17 a Certified Public Accountant (inactive) and am a member of the American 18 Institute of Certified Public Accountants and the Pennsylvania Institute of 19 20 Certified Public Accountants.

Q5. Have you previously submitted expert testimony before the Public Utilities
Commission of Ohio ("Commission" or "PUCO")?

A5. Yes. Since 1996, I have submitted testimony as an expert in numerous cases. A
 listing of cases in which I have submitted expert testimony is attached as Exhibit
 JGB-1.

4 Q6. What is the purpose of your testimony?

5 A6. My testimony presents analysis and a recommendation regarding the appropriate 6 rate of return that the Commission should allow for the Ohio Gas Company 7 ("Ohio Gas" or the "Company") in the determination of the revenues that the 8 Company should be authorized to collect as a result of this proceeding.

- 9 Ohio Gas is a wholly-owned subsidiary of NWO Resources, Inc., a privately held
- 10 company. Ohio Gas's total proprietary capital as of December 31, 2016 was
- approximately \$42 million. Ohio Gas's capital structure is 100% common equity,

12 with no long-term debt or preferred stock outstanding.

13 Q7. Based on your analysis, what is your conclusion regarding the appropriate

14 rate of return to be awarded to the Company in this proceeding?

A7. I recommend that an appropriate rate of return for the Company is 9.0%, basedon my range of 8.94% to 9.07%.

17 II. COMMON EQUITY COST RATE MODELS

Q8. Please summarize your methodology and results in estimating the Company's rate of return.

A8. As explained further in my testimony, I developed my rate of return
 recommendation using the Discounted Cash Flow ("DCF") methodology and the
 Capital Asset Pricing Model ("CAPM") because Ohio Gas does not have publicly

traded stock. I looked to proxies ("comparable companies") to determine the cost
 of common equity for the Company.

In addition, I reviewed recent returns allowed nationally by regulatory bodies for
natural gas utilities.

5 **Q9.** Please explain how you chose your comparable group of companies.

A9. 6 Two U.S. Supreme Court cases, the *Hope* and *Bluefield* cases, set forth the fair 7 rate of return standards for regulated utilities. These standards provide that a 8 utility should be allowed the opportunity to earn a fair and reasonable return in order to attract capital at a reasonable cost in competition with other firms of 9 10 comparable risk, and to maintain its financial integrity. It is necessary then that 11 market data must be relied on to determine a common equity cost rate that is Choosing a comparable group of 12 appropriate for ratemaking purposes. 13 companies for Ohio Gas presents some challenges because Ohio Gas has no 14 long-term debt, is a relatively small company, and has no publicly-traded stock. I began my selection of a comparable group from publicly-traded natural gas 15 16 utilities that are listed in the "Natural Gas Utility" Group in Value Line that pay a 17 dividend, that have a Value Line adjusted beta, that have not publicly announced 18 that they were involved in any major merger activity, have Value Line, Yahoo 19 Finance, or Zacks five-year earnings growth rate projections, that have regulated revenues that comprise the majority of their revenues, and that have a market 20 21 capitalization less than \$1.2 billion. The result was a comparable group of 3 22 companies ("comparable companies"), as follows:

23 RGC Resources (RGCO)

C51128:2

1	Delta Gas	(DGAS)
2	Chesapeake Utilities Inc.	(CPK)

Two additional companies were also produced from my initial screen, Star Gas 3 Partners and Adams Resources. I eliminated Star Gas Partners from 4 consideration because it is a master limited partnership and excluded Adams 5 Resources because it is a producer of crude oil products in addition to its gas 6 7 business. I eliminated Delta Gas from consideration because it is being acquired by People's Gas, and RGC Resources as there was little in the way of forecasted 8 9 earnings information available for that company. This left just one natural gas 10 utility, Chesapeake Utilities Inc.

As my initial screening for comparable companies produced only one company, I expanded my comparable companies to "Water Utilities" in *Value Line* or Yahoo Finance, using the same criteria I utilized in selecting the comparable gas utility companies above. This produced an additional 4 companies as follows:

15	Connecticut Water	(CTWS)
16	Middlesex Water	(MSEX)
17	SJW Corporation	(SJW)
18	York Water	(YORW)

19 Q10. Did you review financial data for the comparable companies?

A10. Yes. I have summarized in Exhibit JGB-2 financial statistics for the comparable
 companies for the years 2012-2016.

Q11. Why did you use the CAPM methodology and the DCF methodology for determining the appropriate rate of return for Ohio Gas Company?

A11. I believe that the results from the DCF and CAPM models are largely adequate 3 4 and reasonable for setting a reasonable cost of common equity for Ohio Gas 5 Company. First, these two methods have been widely used by the Commission Staff in other rate cases. Second, using two separate common equity rate 6 7 models, which are complementary to each other, also adds more reliability in determining the recommended common equity rate. For instance, the CAPM 8 9 model measures the cost of common equity on a relative basis, which is 10 determined on the relative risk of a business to the entire equity market. The 11 DCF model depends primarily on the expected dividend growth of a specific 12 company. I also considered the returns on equity ("ROE") allowed nationally for natural gas utilities by regulatory bodies. 13

Q12. Why did you consider the ROEs allowed by regulatory bodies in determining your recommendation?

- A12. Recognizing that no single ROE model is perfect in producing the results needed
 to determine a fair rate of return, I also reviewed the returns allowed nationally by
 regulatory bodies for natural gas companies in 2016, and reflected this in my
 recommendation as well.
- Q13. What returns on equity have recently been authorized by Regulatory
 Commissions for natural gas companies?
- A13. The PUR *Utility Regulatory News* issue dated December 30, 2016 provides the
 results of the annual survey of regulatory authorized rates of return on common

equity. The returns are summarized on Exhibit JGB-3. Exhibit JGB-3 indicates that the average authorized rate of return on common equity for all of the reported gas cases for 2016 was 9.6%. The lowest return on common equity was 9.0% and the highest was 10.5%. Fully 63% of the authorized returns were in the range of 9.51% to 10.00%.

As more fully explained below, because my CAPM and DCF results are well below even the average natural gas company return awarded and reported in the PUR *Utility Regulatory News,* I am recognizing the average PUR return as an additional data point, in addition to my CAPM and DCF results, in deriving my return on common equity recommendation.

11 III. THE CAPITAL ASSET PRICING MODEL (CAPM)

12 Q14. Please explain in more detail the CAPM methodology.

A14. The CAPM methodology adds a risk-free rate of return to a market risk premium,
 which is adjusted proportionately to reflect the market risk of an individual stock
 relative to the total market as measured by beta. The formula for determining the
 common equity rate using CAPM is as follows:

17	R = Rr + B (Rm - Rr), where:
18	R = the required return expected by investors
19	B = Beta (the volatility of the stock relative to the market as a whole)
20	Rm = the return on the market as a whole
21	Rr = the return on risk-free assets

1 Q15. Please describe your results when applying the traditional CAPM 2 methodology.

The CAPM determines cost of equity as a yield on a risk-free interest bearing 3 A15. 4 obligation plus a premium that is proportional to the risk of an investment. I used 5 the comparable group consisting of five publicly-traded natural gas utilities and water utilities that I described above. The traditional CAPM model would be 6 7 applied by multiplying the average of the betas for the five comparable companies reported in the Value Line Investment Survey, 0.71, times the spread 8 9 of arithmetic mean total returns between long term government bonds – 6.10% 10 (i.e. "risk free return") and large company stocks 12.10%, per the lbbotson 11 Stocks, Bonds, Bills, and Inflation (SBBI) 2015 Classic Yearbook, resulting in a 12 figure of 4.26%. I utilized the lbbotson data as it reflects returns realized over long term periods, thereby avoiding short term variations in returns. To this 13 14 would be added the contemporary risk-free return, based on the average daily yield on 10-year and 30-year treasury bonds over a one-year period. The 15 average yield for the twelve months ended April 10, 2017 was 2.33%, resulting 16 17 ina CAPM cost of equity estimate of 6.59%. However, this resulting return on common equity is artificially low, producing a return on common equity result that 18 is below a level that is deemed to be reasonable. 19

20 Q16. Why does the traditional CAPM produce an artificially low return on 21 common equity?

A16. The low return figure results primarily from the fact that Treasury bond rates are
 currently at very low levels. In fact, Treasury bonds have been in a fairly

C51128:2

1 prolonged period of low rates. As a key component of the CAPM model is the 2 "risk free return," which is typically represented by U.S. Treasury Bonds, the CAPM model will tend to produce artificially low results when the recent 12-3 4 month average Treasury Bond rates are used in the calculation. More recently, 5 the Federal Reserve has begun to increase rates, with the first increase in nine years coming in December 2015 and additional increases in December 2016 and 6 7 March 2017. It is expected that an upward trend in interest rates will continue, with several economic forecasts calling for the trend in interest rates to continue 8 9 upward in response to high federal deficits, the recovery in the U.S. economy, 10 and expectations of higher inflation.

Therefore, in order to provide an appropriate estimate of the rate of return that 11 12 investors expect, rather than relying on current rates, the CAPM needs to utilize 13 data that reflects future expectations. Accordingly, to adjust the CAPM's risk free return to better represent future Treasury bond rates, I obtained information on 14 forecasted long-term Treasury bond rates from several sources, in order to 15 16 derive estimated Treasury bond rates five years out, to the year 2022, by which 17 time the Treasury bond rates are likely to be moving toward levels that are more 18 representative of such bond rates, than are the current Treasury bond rates.

My first source was the Congressional Budget Office – Budget and Economic Data Ten Year Economic Projections. Those projections are that 10-year Treasury Bonds are forecasted to yield 3.5% in 2022. Adding this yield to the 30year Treasury bond premium over the 10-year Treasury bond for the 12 months ended April 11, 2017, of 0.70%, produces an estimated 30-year Treasury bond

1 yield of 4.20%. Another source was the U.S. Dept. of Labor ("DOL") Report, The 2 U.S. Economy to 2024, Table 1 dated December 2015. In that Report, the annual rate of increase in the 10-year Treasury bond from 2014 through 2024 is 3 4 expected to be 5.5%. Based on the 10-year Treasury bond yield of 2.5% as of 5 2014 reported in the DOL report and the annual escalation forecast by the U.S. Dept. of Labor, I derived a 10-year Treasury bond rate of 3.837% in 2022. I then 6 7 took the yield spread between 10-year Treasury bonds and 30-year Treasury bonds for the 12 months ended April 11, 2017, and added this to the estimated 8 9 10-year Treasury bond rate of 3.837%, deriving an estimate for the 30-year Treasury bonds of 4.537%. 10

My third source was Value Line. In its Quarterly Economic Review, dated 11 December 2, 2016, long term Treasury bond rates (30-year) are expected to be 12 13 4.2% in 2020. Because Value Line does not forecast the bond rates beyond 2020, this figure is likely conservative in estimating the rates in 2022. I escalated 14 the Value Line rate of 4.2% by 5.5% for two years, and obtained a rate of 15 16 4.674%. To derive a long term forecasted rate for 30-year Treasury bonds, I then averaged the results of these three estimates to derive a rate of 4.47% as shown 17 18 in the Table below. Therefore, in my CAPM calculation, I have utilized the 19 average rate of 4.47%.

20	Data Source	Forecasted Yield
21	Value Line Economic Forecast	4.674%
22	Congressional Budget Office	4.20%
23	U.S. Dept. of Labor	4.537%

1

Q17. Why did you utilize 30-year Treasury bond rates rather than shorter term Treasury bonds?

A17. Common stocks typically are in existence over a very long term for a given
company, and the cash flows to investors from stock ownership therefore last a
long period of time. In my opinion, the longest-term Treasury bond (30-year) is
the most appropriate instrument to utilize in the CAPM as these bonds better
match up with the life of a common stock than do other Treasury bonds with
shorter maturities.

Q18. What were your CAPM results when you revised the calculation to reflect a more appropriate risk free return estimate?

A18. The revised CAPM methodology produces a cost of common equity estimate of
8.73% on Exhibit JGB-4, prior to my size adjustment, and 9.13% after my size
adjustment, which I discuss below.

15 IV. DISCOUNTED CASH FLOW MODEL (DCF)

16 Q19. Please describe your methodology for your DCF analysis?

17 A19. The DCF methodology assumes that the current stock price of a publicly-traded 18 company is equal to the discounted value of future cash flows that investors in 19 that company expect they will receive. The future cash flow is represented by 20 dividends, and the required rate of return on common equity is the internal 21 discount rate associated with the dividend stream of expected dividends over the 22 life of the investment. In calculating my DCF cost of common equity estimate for

1 each comparable company, I utilized the annual average stock price, the sum of 2 the last four quarterly common stock dividends, and estimates of the expected rate of growth of earnings (the DCF model assumes that earnings growth and 3 4 dividend growth are the same). The formula for determining the DCF cost rate is: K = (D/P) + q; Where: 5

- 6 Κ the required rate of return = 7 D the current dividend

Ρ the current stock price 8 =

=

9 the growth rate of earnings g =

10 The stock prices that I used in my analysis were the daily adjusted closing price for the 12-month period April 12, 2016 through April 11, 2017, for which I 11 computed an average price. I also utilized analysts' five-year earnings growth 12 estimates from Yahoo Finance, Zacks, and Value Line as proxies for investors' 13 14 growth expectations.

- Q20. What were your DCF results? 15
- 16 A20. The DCF methodology produces a cost of common equity estimate of 8.49% on 17 Exhibit JGB-5.

18 Q21. How did vou compute your overall of common equity cost 19 recommendation?

A21. I calculated the average of the following: my DCF results, my CAPM results after 20 21 reflecting a size adjustment, and the average ROE awarded for natural gas 22 companies per the December 20, 2016 PUR Utility Regulatory News.

1	Q22.	What cost of common equity estimate did your computation produce?		
2	A22.	The computation produced an unadjusted cost of common equity of 8.94% prior		
3		to my size adjustment for the CAPM, and 9.07% including the size adjustment.		
4	Q23.	Did you make any adjustment to your cost of common equity results for		
5		flotation costs?		
6	A23.	No, I did not reflect an adjustment for flotation costs, which are costs associated		
7		with the sale of new issuances of common stock and may include underwriting		
8		fees as well as costs such as printing and registration. As Ohio Gas is privately		
9		held and the stock of its owner is not publicly traded, it would not be appropriate		
10		to request an adjustment for flotation costs.		
11	Q24.	Did you make any other adjustments to your cost of common equity		
11 12	Q24.	Did you make any other adjustments to your cost of common equity results?		
	Q24. A24.			
12		results?		
12 13		results? I added an additional risk premium to my CAPM results to reflect the higher		
12 13 14	A24.	results? I added an additional risk premium to my CAPM results to reflect the higher business risk that Ohio Gas has, relative to the comparable companies, of 40		
12 13 14 15	A24.	results? I added an additional risk premium to my CAPM results to reflect the higher business risk that Ohio Gas has, relative to the comparable companies, of 40 basis points, as I explain below.		
12 13 14 15 16	A24.	results? I added an additional risk premium to my CAPM results to reflect the higher business risk that Ohio Gas has, relative to the comparable companies, of 40 basis points, as I explain below. What is the basis for your statement that Ohio Gas has a higher business		
12 13 14 15 16 17	A24. Q25.	results? I added an additional risk premium to my CAPM results to reflect the higher business risk that Ohio Gas has, relative to the comparable companies, of 40 basis points, as I explain below. What is the basis for your statement that Ohio Gas has a higher business risk than the comparable companies?		

risk exposure to economic conditions and business cycles and are less able to

21

13

territory growth, its capital intensity, and its size. Smaller companies have more

deal with major events that affect revenue, sales, or earnings. Smaller
 companies also generally have less financial flexibility and are less diverse in
 their operations. Accordingly, a cost of common equity should be authorized in
 this proceeding that reflects Ohio Gas's risk, which includes the impact of its
 relatively smaller size.

Q26. Please explain how Ohio Gas's size affects its business risk compared to the comparable companies?

A26. The average market capitalization of the comparable companies was \$806.4
million as of December 31, 2016.

10 As Ohio Gas does not have publicly traded common stock, I assumed that if it 11 did, its common stock would be selling in the same market-to-book ratio as the average such ratio for the comparable companies, which was 3.04 on December 12 13 31, 2016 as provided on Exhibit JGB-6. For comparison purposes, I estimated 14 Ohio Gas's market capitalization to be \$128.06 million, based on the average market-to-book ratio for the comparable companies. The market capitalization of 15 16 the comparable companies was \$806.4 million as of December 31, 2016, or 6.3 17 times larger than the estimated Ohio Gas market capitalization. Therefore, I 18 made an adjustment to the common equity cost rate to reflect Ohio Gas's 19 relatively smaller size.

20 **Q27.** How did you determine the amount of adjustment to be made to the 21 common equity rate?

1 A27. I utilized data from the 2015 Ibbotson SBBI Yearbook, which publishes size 2 premiums for decile portfolios of companies listed on the New York Stock Exchange, the American Stock Exchange, and the NASDAQ for the period 1926 3 4 to 2014. Ohio Gas's estimated market capitalization would fall in the 10th decile if it had publicly traded stock that sold at the December 31, 2016 average market-5 to-book ratio of 3.04. The comparable companies' average market capitalization 6 would fall in the 4th and 5th deciles. The size premium difference between the 7 comparable companies' deciles and the Ohio Gas deciles is 4.37%. I added a 8 conservative upward adjustment of .40% to my CAPM results to reflect Ohio 9 Gas's greater relative business risk due to its smaller size. 10

11 V. <u>RECOMMENDATION</u>

12 Q28. What is your recommendation?

A28. I recommend that the Commission authorize a return on equity of 9.0% for the
Ohio Gas Company, based on my range of 8.94% to 9.07%, as summarized in
the table below.

16		Without Size Adjustment	With Size Adjustment
17	Nationally	9.60%	9.60%
18	DCF	8.49%	8.49%
19	CAPM	8.73%	9.13%
20	Average	8.94%	9.07%
21			

22 Q29. Does this conclude your prepared direct testimony?

A29. Yes. However, I reserve the right to update this testimony for any outstanding
 discovery responses or additional information that is submitted by other parties in
 this case.

CASES IN WHICH JOSEPH G. BOWSER HAS SUBMITTED TESTIMONY

In the Matter of the Application of The East Ohio Gas Company for Authority to Implement Two New Transportation Services, for Approval of a New Pooling Agreement, and for Approval of a Revised Transportation Migration Rider, Case No. 96-1019-GA-ATA.

In the Matter of the Applications of Columbus Southern Power Company and Ohio Power Company for Approval of Their Electric Transition Plans and for Receipt of Transition Revenues, Case Nos. 99-1729-EL-ETP, et al.

In the Matter of the Commission's Investigation Into the Policies and Procedures of Ohio Power Company, Columbus Southern Power Company, The Cleveland Electric Illuminating Company, Ohio Edison Company, The Toledo Edison Company and Monongahela Power Company Regarding the Installation of New Line Extensions, Case Nos. 01-2708-EL-COI, et al.

In the Matter of the Application of Columbus Southern Power Company to Adjust its Power Acquisition Rider Pursuant to Its Post-Market Development Period Rate Stabilization Plan, Case No. 07-333-EL-UNC.

In the Matter of the Application of Ohio Edison Company, The Cleveland Electric Illuminating Company and The Toledo Edison Company for Authority to Increase Rates for Distribution Service, Modify Certain Accounting Practices and for Tariff Approvals, Case Nos. 07-551-EL-AIR, et al.

In the Matter of the Application of Columbus Southern Power Company for Approval of its Electric Security Plan; an Amendment to its Corporate Separation Plan, and the Sale or Transfer of Certain Generating Assets, Case Nos. 08-917-EL-SSO, et al., including the remand phase of this proceeding.

In the Matter of the Application of Ohio Edison Company, The Cleveland Electric Illuminating Company, and The Toledo Edison Company for Authority to Establish a Standard Service Offer Pursuant to Section 4928.143, Revised Code, in the Form of an Electric Security Plan, Case No. 08-935-EL-SSO.

In the Matter of the Application of The Dayton Power and Light Company for Approval of Its Electric Security Plan, Case Nos. 08-1094-EL-SSO, et al.

In the Matter of the Commission Review of the Capacity Charges of Ohio Power Company and Columbus Southern Power Company, Case No. 10-2929-EL-UNC.

In the Matter of the Application of Columbus Southern Power Company and Ohio Power Company for Authority to Establish a Standard Service Offer Pursuant to §4928.143, Ohio Rev. Code, in the Form of an Electric Security Plan, Case Nos. 11-346-EL-SSO, et al.

In the Matter of the Application of Akron Thermal, Limited Partnership for an Emergency Increase in its Rates And Charges for Steam and Hot Water Service, Case Nos. 09-453-HT-AEM, et al.

In the Matter of the Application of The Dayton Power and Light Company to Establish a Standard Service Offer in the Form of an Electric Security Plan, Case Nos. 12-426-EL-SSO, et al.

In the Matter of the Fuel Adjustment Clauses for Columbus Southern Power Company and Ohio Power Company and Related Matters for 2010, Case Nos. 10-268-EL-FAC, et al.

In the Matter of the Application of Ohio Power Company for Authority to Establish a Standard Service Offer Pursuant to 4928.143, Revised Code, in the Form of an Electric Security Plan, Case Nos. 13-2385-EL-SSO, et al.

DIRECT TESTIMONY OF KIM WATKINS ON BEHALF OF OHIO GAS COMPANY

1 I. INTRODUCTION

- 2 Q1. State your name and business address.
- 3 A1. My name is Kim Watkins. My business address is 200 West High Street, Bryan,
- 4 Ohio 43506.
- 5 Q2. By whom are you employed and in what capacity?
- 6 A2. I am employed by Ohio Gas Company (or "Company") as the Treasurer and
- 7 Corporate Secretary.
- 8 Q3. Describe your education and professional experience.
- 9 A3. I received a Bachelor of Science in Business Administration from Ashland
- 10 University. After receiving my degree, I have spent over forty years working in
- 11 regulated industries including Columbus and Southern Electric Company, National

C0101962:2

1		Gas and Oil Company, and Ohio Gas Company. I joined Ohio Gas Company in
2		1987 as a Staff Accountant. Since then, I have assumed positions of increasing
3		professional responsibility.
4	Q4.	What are your duties as Treasurer and Corporate Secretary?
5	A4.	I am responsible for several financial areas related to the management of Ohio
6		Gas Company including cash management, federal taxation, and pension plan
7		administration. I am also responsible for the annual financial forecast and matters
8		related to rates and tariffs, corporate records, insurance, and general regulatory
9		matters.
10	Q5.	Have you previously testified before the Public Utilities Commission of Ohio
11		("PUCO" or "Commission")?
12	A5.	No.
13	Q6.	What is the purpose of your testimony in this case?
14	A6.	My testimony includes the following:
15		An overview of Ohio Gas Company and its operations;
16		• Support for the increase in the customer charge;
17		• Support for the request to replace the existing tariff with a new tariff that
18		updates and amends the General Service tariff sheets;
19		• An introduction of the other witnesses and the parts of the Application for
20		which they provide support; and

Testimony in support of other matters in the Application.

2 II. OHIO GAS COMPANY

3 Q7. Can you provide a summary of the history of Ohio Gas Company?

A7. 4 Yes. Ohio Gas Company was incorporated on May 14, 1914 as the Ohio Gas 5 Light & Coke Company. Ohio Gas Light & Coke Company then merged with the 6 Napoleon & Wauseon Gas Company and with the Bryan & Montpelier Gas 7 The Napoleon & Wauseon Gas Company was incorporated on Company. 8 October 3, 1912 and Bryan & Montpelier Gas Company was a partnership formed 9 in the same year. In 1925, Ohio Gas Light & Coke Company purchased the 10 outstanding stock of the Archbold & Stryker Gas Company. In July 1926, Great 11 Lakes Utilities purchased the stock of Ohio Gas Light & Coke Company, and Ohio 12 Gas Light & Coke Company continued to operate as a separate entity under its 13 own name. Ownership changed again in 1945 when Great Lakes Utilities sold its 14 interest in the Ohio Gas Light & Coke Company to the Lannan and Dempsey 15 families of Chicago. On July 25, 1946, Ohio Gas Light & Coke Company was 16 renamed the Ohio Gas Company.

Ohio Gas Company purchased the natural gas distribution system that served
Paulding, Payne and Antwerp in 1963. Ohio Gas Company acquired the Lyons
Gas Company in 1975.

In 1985, the Lannan and Dempsey families sold their interests in the Ohio Gas
 Company to NWO Resources. Also in 1985, Ohio Gas Company acquired the gas
 distribution assets from The Toledo Edison Company for Defiance and Delta.

1		In 2011, Ohio Gas Company purchased systems that were owned by the Villages
2		of Hamler, Holgate, and Malinta and operated by the Suburban Natural Gas
3		Company.
4	Q8.	What areas are served by Ohio Gas Company?
5	A8.	Ohio Gas Company serves approximately 50,000 customers in the six most
6		northwest counties of Ohio. The service territory includes 28 communities, the
7		largest being the City of Defiance.
8	Q9.	How is Ohio Gas Company managed?
9	A9.	The management structure and practices and policies of Ohio Gas Company are
10		set out in Schedule S-4.1 and S-4.2.
11 12	Q10.	How are Ohio Gas Company, its management, and employees engaged with the communities in the service territory?
	Q10. A10.	
12		the communities in the service territory?
12 13		the communities in the service territory? Ohio Gas Company's service territory is a very rural area with a series of small
12 13 14		the communities in the service territory? Ohio Gas Company's service territory is a very rural area with a series of small towns. Community involvement is very important to Ohio Gas Company and we

Community involvement is very important to Ohio Gas Company and we make monetary contributions and encourage our employees to be involved. Over the years Ohio Gas Company employees have served on numerous Village Councils, Volunteer Fire Departments, Community Industrial Development

Departments, Youth Athletics, Hospice Organizations, Boy Scouts, Cystic Fibrosis
 Foundation, American Cancer Society, American Heart Association, Special
 Olympics and Filing Home of Mercy.

4 Q11. How does Ohio Gas Company interact with its customers?

5 A11. Ohio Gas Company provides several means to assure customer contact and 6 customer satisfaction. It provides customers the opportunity to speak directly with 7 trained company call center employees who can address a wide range of issues. 8 Ohio Gas Company also uses bill inserts to provide to customers important 9 information about their service. The Company also works closely with the 10 communities that participate in the aggregation programs for which I will provide 11 more detail. Additionally, Ohio Gas Company maintains a secure website where 12 customers can read information about safe use of service, acceptable bill paying 13 arrangements, payment assistance programs, and alternative ways to contact the 14 Company for other information. Customers can also make a request to start or 15 stop service, access First Billing, a third party payer, to make a payment to their 16 account and request Ohio Gas Company's no fee Direct Debit service as the 17 method to pay their bill.

18 Q12. What options to pay bills do customers have?

A12. Customers may arrange to pay bills through Ohio Gas Company's no fee Direct
 Debit service, through First Billing Services, online banking services or by mailing
 payment. Ohio Gas Company also can arrange for a customer to participate in
 budget billing or Ohio Gas Company special plans so that the customer can

C0101962:2

manage its natural gas bill over the course of a year. Approximately 25 percent of
 the Company's residential customers have arranged for budget or special plan
 billing.

4

Q13. What kinds of services does Ohio Gas Company provide?

5 A13. Ohio Gas Company provides distribution and transportation service to ultimate
6 users of natural gas service.

7 To provide this service, Ohio Gas Company has maintained operating franchise 8 agreements with 28 communities. These agreements define how Ohio Gas 9 Company will conduct its operations within the communities' rights-of-way. In 10 addition to operating franchise agreements, Ohio Gas Company and all 28 11 communities have agreed to Community Energy Partnership ("CEP") ordinances 12 and ordinances authorizing contractual arrangements (between Ohio Gas 13 Company and industrial customers within the municipal boundaries) to be filed with 14 the local communities. Contractual arrangements with industrial customers 15 outside of any municipal boundary are filed with the Commission.

The CEP Program is a community based commodity aggregation program of residential and small commercial customers. Each community acts as the agent for the aggregated customers for the purpose of obtaining a natural gas supply and having that supply delivered to Ohio Gas Company. Ohio Gas Company transports that supply to the end user and bills the ultimate customer for that service under its tariff. From the period of 1997 through 2009, all communities and

customers in rural areas adopted the CEP Program. In 2009, Ohio Gas Company
 completely exited the merchant function.

The larger Industrial and Commercial customers on the Ohio Gas Company system obtain their own supply of natural gas and contract for that supply to be delivered to Ohio Gas Company. Ohio Gas Company then transports that supply under contractual authority.

Q14. What kinds of investments has Ohio Gas Company made to its existing distribution system?

A14. Ohio Gas Company is constantly investing in the gas distribution system to assure
that it is safe and reliable. Since the last rate case in 1984, it has maintained and
replaced service lines, extended high pressure facilities to connect to pipelines,
and extended facilities to newly developed areas. This capital investment has
been accomplished within the existing rate structure based on good management
of resources and system growth.

Q15. How do current and proposed rates for service to residential and small
 commercial customers compare to those of similar Ohio natural gas
 companies?

A15. Our rates currently and, as proposed, compare very favorably to similar Ohio natural gas companies. Based on the proposed application, a customer will see adjustments to the base charges that are billed monthly. The proposed customer charge would be \$10.91 per month, an increase of \$5.46 that includes applicable

1 taxes. The Company is not proposing to increase its volumetric charges. The 2 proposed volumetric rates will consist of a volumetric charge of \$0.16613 per Ccf per 3 month for the first 10,000 Ccf per month and \$0.10393 per Ccf per month for all 4 consumption over 10,000 Ccf per month, which are lower than current charges but do 5 not include applicable taxes. When applicable taxes are applied, the volumetric rates 6 are unchanged from current rates. As shown in Figure 1, Ohio Gas Company has and 7 would continue to have the lowest residential and small commercial base rate charges 8 among these similar companies.

				Total
	Average	Residential	Residential	Residential
	Residential	Basic Service	Distribution	Base Rate
	Ccf Usage	Charge	Charge	Average Bill
	Per Month	Per Month	Per Ccf	Per Month
Suburban Gas Company	100	9.71	0.34330	44.04
Waterville Gas Company	100	10.49	0.28019	38.51
Ohio Gas Company	100	5.45	0.16692	22.14
Ohio Gas Company (Proposed)	100	10.91	0.16692	27.60

Rates include all riders and taxes for Ohio Gas, Suburban, Waterville - PUCO Tariffs (As of 3/31/2017)

10

11 III. RATE CASE APPLICATION

12 Q16. Why is Ohio Gas Company seeking an increase in the customer charge now?

- 13 **A16.** As indicated in the Application and supporting testimony, a just and reasonable
- 14 rate of return for Ohio Gas Company is 9%. While Ohio Gas Company has avoided
- 15 the need for a rate case since its last Commission case in 1984 through effective
- 16 management of its revenue and capital expenditures, the costs of providing safe

C0101962:2

1 and reliable service continue to increase. Additionally, Ohio Gas Company has 2 made significant investments since 1984. Ohio Gas has also suffered revenue 3 erosion because of the increased BTU content of the natural gas that it delivers to 4 customers. As a result, the 2017 test year revenue and expenses will produce a 5 return of 1.57% based on the December 31, 2016 date certain rate base. The 6 increase in revenue to produce a just and reasonable rate of return is \$3,237,346. 7 Based on this analysis, Ohio Gas Company determined that it was necessary to seek an increase in the customer charge to assure that it has the opportunity to 8 9 achieve a reasonable rate of return as provided by Ohio law.

Q17. How does the earned rate of return affect Ohio Gas Company's ability to provide safe, adequate, and reliable service?

A17. Ohio Gas Company's ability to provide safe, adequate, and reliable service
 depends on an adequate level of earnings. The revenue it receives must be
 sufficient to provide the opportunity for the Company to compensate its investor
 and to cover operating expenses.

16 Q18. What factors are driving the current revenue deficiency?

A18. As I noted above, increases in costs and additional investment are driving this request. Additionally, Ohio Gas Company has experienced an erosion in revenue because of an increase in the BTU content of the natural gas it receives from interstate pipelines and redelivers to ultimate consumers. Our data show that MCF sales have been reduced by 4% to 5% from 2013-2016.

C0101962:2

1	Q19.	How has Ohio Gas Company supported its Application to increase rates?
2	A19.	The Application to increase rates is supported by Schedules as required by the
3		Commission rules setting out the Standard Filing Requirements ("SFRs").
4	Q20.	Did you prepare or assist in the preparation of the Schedules?
5	A20.	Except as noted on the Schedules, I prepared or assisted in the preparation of the
6		Schedules.
7	Q21.	On what did you rely for the preparation of the B Schedules?
8	A21.	The Schedule B Schedules are based on the property records of Ohio Gas
9		Company. These records contain the original cost of the plant and depreciation
10		reserves as of December 31, 2016. The amounts are adjusted to conform to the
11		results of the Cost of Service Study that is contained in Schedule E-3.2.
12	Q22.	The Company has not filed a lead-lag study to support its request for working
13		capital as a part of its rate base as required by the SFRs. Why is that?
14	A22.	The Company has received a waiver of that requirement and filed a request for
15		working capital that is based in part on the traditional formula approach. The
16		reasons for seeking the waiver were set out in the Company's request for the
17		waiver.
18	Q23.	On what did you rely for the preparation of the C Schedules?
19	A23.	The C Schedules were prepared based on a twelve-month budget for 2017, again

adjusted to conform to the results of the Cost of Service Study. These costs 20

C0101962:2

1	represent the cost of the utility to render service for the test period, January 1 to
2	December 31, 2017.

3 **Q24.** Did you prepare the D Schedules?

4 A24. Yes, with the assistance of Joseph Bowser. I provided Company information
5 contained in the schedules and performed the necessary calculations to complete
6 the schedules. Mr. Bowser provided his determination of the fair and reasonable
7 rate of return that supports the calculation of the revenue requirement.

- Q25. You noted earlier that the Company is wholly owned. The Company has not
 filed parent-consolidated financial information as required by the SFRs. Why
 is that?
- A25. The Company has received a waiver of that requirement. The reasons for seeking
 the waiver were set out in the Company's request for the waiver.
- 13 Q26. Did you prepare the E Schedules?

A26. Yes, with the assistance of David Berg and other Company management and employees. Mr. Berg prepared the Cost of Service Study in Schedule E-3.2. The tariff in Schedule E-1, the bill rationale in Schedule E-3.1, and the rationale for the tariff changes in Schedule E-3 were prepared under my direction. I prepared the various E-4 Schedules and the E-5 Schedule.

- 19 Q27. Did you prepare the A Schedules?
- 20 A27. Yes.

C0101962:2

Q28. What steps did you take to prepare the A Schedules?

A28. The A Schedules summarize the information from the other schedules and other
 Company-specific information. I prepared the Schedules in accordance with the
 SFRs to determine the revenue requirement.

5 Q29. What is the increase in revenue that the Company is recommending?

A29. Based on a date certain of December 31, 2016 and a test year of January 1, 2017
to December 31, 2017, Ohio Gas Company expects current operating income to
be \$428,640. This would produce a rate of return of 1.57% on the jurisdictional
rate base. The Company is requesting that the revenue requirement be set so that
it has the opportunity to earn a return on equity of 9%. Current rates produce an
operating income deficiency of \$2,035,158. As permitted by R.C. 4909.15, Ohio
Gas Company requests an increase in revenue of \$3,237,346.

Q30. Based on your review of Company records, does the information contained
 in the Schedules fairly and accurately represent the financial condition of the
 Company?

16 **A30.** Yes.

Q31. Is the amount that the Company is seeking to increase its revenue just and reasonable?

19 **A31.** Based on my review of the records and my professional experience, it is.

C0101962:2

1 IV. RATE RECOMMENDATIONS

Q32. If the Commission increases the revenue that Ohio Gas Company is authorized to collect, does the Company have a recommendation regarding how its charges should be adjusted?

A32. Yes. Ohio Gas Company currently has a customer charge of \$5.45 per month per account. The Company recommends that the increase in revenue be collected through the monthly customer charge. The volumetric charges in the base distribution and transportation rates would remain unchanged. Based on the revenue recommendation the Company has presented, the customer charge would increase to \$10.91 per month per account.

Q33. Why does the Company recommend an increase in the customer charge as opposed to the volumetric rates?

13 A33. There are several reasons. First, collecting the increase through the customer 14 charge is consistent with principles of cost causation. The distribution service the 15 Company provides is largely tied to fixed costs associated with plant and labor that 16 are insensitive to variations in the volume of gas delivered to the customer. These 17 costs are better recovered through a fixed charge rather than a charge that is 18 volumetrically sensitive. Second, the increase is less sensitive to erosion. As 19 appliances become more efficient, they still need the plant and labor provided by 20 Ohio Gas Company, but the amount of gas decreases. Having a portion of the 21 revenue requirement collected through volumetric rates, as proposed here, retains 22 a sensitivity to energy efficiency goals, but placing the increase in the customer 1 charge recognizes, again, that these costs will be incurred regardless of the energy 2 efficiency gains a customer may achieve. Further, those efficiency gains will still 3 be recognized through overall bill reductions for the lower gas usage. Lower 4 erosion in revenue also reduces the need for additional rate cases. I also note that 5 a substantial portion of residential customers already take service through budget 6 billing. In a very real sense, these customers are effectively taking service through 7 annually fixed rates. Finally, the collection of the increase through the customer 8 charge is consistent with Commission support for a move toward a straight fixed-9 variable rate design.

Q34. Do you believe that the requested increase in the customer charge is just and reasonable?

12 A34. Based on the reasons I have stated, it is.

Q35. Ohio Gas Company has proposed reductions to the volumetric rate in the
 General and Transportation Service Tariffs. What is the reason for these
 reductions?

A35. The Company is proposing reductions in the volumetric rates to reflect that it is also seeking authorization of a separate rider, the Gross Receipts Tax Rider. The purpose of the new rider is so that the Company will be able to adjust a single rate rather than make multiple adjustments if the Ohio gross receipts tax is changed. Because a portion of the volumetric rates accounts for gross receipts tax expense, the Company is proposing a reduction in the volumetric rates. The effect on

1		customer bills is that there would be no change in the effective volumetric rate that
2		the customer pays based on the current gross receipts tax rate.
3	V.	INTRODUCTION OF WITNESSES SUPPORTING THE APPLICATION
4	Q36.	Who are the witnesses that are supporting the Application?
5	A36.	The Application is supported by the testimony of David Berg, Joseph Bowser, and
6		me. In compliance with Commission rules, the Index of Major Issues is the
7		Attachment to my testimony.
8	Q37.	For which schedules are you the supporting witness?
9	A37.	I am the supporting witness for the A, B, C, E, and S schedules with the exception
10		of schedules that relate to allocations. Additionally, I provided information to both
11		David Berg and Joseph Bowser. As I will discuss in a moment, I am also the
12		witness that supports the Application to adjust the depreciation accounts.
13	Q38.	For what schedule or schedules is Mr. Berg the supporting witness?
14	A38.	Mr. Berg was responsible for preparing the Cost of Service study that is included
15		as Schedule E-3.2 and the schedules that are linked to the study.
16	Q39.	For what schedule or schedules is Mr. Bowser the supporting witness?
17	A39.	Mr. Bowser provides support for the return on equity proposed in the Application
18		and supports the D Schedules with me.

C0101962:2

1 VI. GENERAL SERVICE TARIFF MODIFICATIONS

2 Q40. Is Ohio Gas Company seeking authorization to file a new tariff?

3 **A40.** Yes.

4 Q41. What changes necessitated the filing of a new tariff?

A41. In 2015, Ohio Gas Company initiated a review of its existing tariff. With the
exception of changes to accommodate Commission orders and the
implementation of the CEP, the General Service provisions of the tariff were largely
unchanged since 1984. Because the environment in which Ohio Gas Company
operates has changed, however, it has become clear that the General Service tariff
sheets needed to be updated.

11 The review process to update the tariffs consisted of a detailed review of 12 Commission-approved general service tariff provisions for other natural gas 13 companies and Company practices. In some instances, no change in the existing 14 tariff was needed. In other instances, provisions were substantially revised or new 15 tariff provisions were added. One new proposed provision, discussed previously, 16 is the Gross Receipts Tax Rider. There were also substantial deletions of 17 provisions that no longer serve any purpose. Another change was the imposition 18 of a more detailed organizational structure. The proposed changes are explained 19 in detail in Schedule E-3.

1 As part of the review process, Ohio Gas Company also addressed the costs 2 associated with several activities it undertakes to address situations in which the 3 customer may be delinquent or in which the Company incurs costs due to a customer claim that the system is not functioning properly that proves unfounded. 4 5 The costs of these activities should not be borne by other customers. То 6 compensate Ohio Gas Company for these activities, Ohio Gas Company seeks 7 authorization for either new miscellaneous charges or increases in the amount of 8 existing miscellaneous charges. The charges that Ohio Gas Company seeks to 9 address in this application are:

Charge	New or Existing	Current Rate	Proposed Rate
Reconnection	Existing	Varies	Varies
Field Collection	Existing	\$3	\$15
Bad Check	Existing	\$10	\$20
Tie-in	New	N/A	Actual cost
Investigation	New	N/A	Actual cost
Meter Test	New	N/A	\$40
Meter Location	New	N/A	Actual cost
Excess Flow Valve	New	N/A	Actual cost

Based on the cost information provided in Schedule E-3.2, the fixed rate charges listed above are just and reasonable. The charges based on actual cost similarly assure that these costs are properly assigned and likewise are just and reasonable.

1 The result of Ohio Gas Company's review process was a set of general service 2 tariff provisions that addresses more completely the common customer and utility 3 interactions based on the existing Company operating procedures and 4 Commission rules. Because the changes were substantial, however, simply 5 redlining the existing tariff, PUCO No. 1, would have been confusing. Instead, 6 Ohio Gas Company is recommending that the Commission authorize the filing of 7 a new tariff, PUCO No. 2.

8 VII. APPLICATION TO ADJUST CERTAIN ACCOUNTS

- 9 Q42. Is Ohio Gas Company seeking to adjust certain plant depreciation reserve
 10 accounts?
- 11 A42. Yes.

12 Q43. Why has Ohio Gas Company made this request?

13 A43. In 2016, Ohio Gas Company met with the Staff of the Commission and reviewed 14 its depreciation rates and expenses in anticipation that it might seek to increase 15 rates. During that review process, the Company determined that several accounts 16 had been over-depreciated while others are under-depreciated. In several 17 instances, over-depreciated accounts show a negative balance. As a result of 18 discussions with Commission Staff, it was agreed that Ohio Gas Company would 19 seek to address the negative balances if it filed an application to increase rates.

20 Q44. What adjustments is Ohio Gas Company seeking?

C0101962:2

1 **A44.** Ohio Gas Company seeks authorization to adjust depreciation reserves for certain 2 plant accounts, as suggested by Staff during our 2016 Depreciation Study. Ohio 3 Gas Company seeks authority to adjust depreciation reserves of those accounts 4 with negative net book plant balances (\$1,488 for PA 305000, \$100,887 for PA 5 391100, \$466,320 for PA 391200, \$59,268 for PA 394000, \$75 for PA 395000) so 6 that the adjustments will result in net plant balances of zero. The adjustments to 7 the related net plant amounts that are currently negative are proposed to be offset 8 with adjustments or transfers of the excess depreciation to the accumulated 9 depreciation reserves of plant accounts that are under-accrued (PA 369000, PA 10 380000, PA 381000, PA 383000, and PA 390000).

Q45. Would the reallocation of depreciation reserves have any effect on the total net plant that is deemed used and useful as of the date certain?

A45. No. The proposed reallocation of depreciation reserves revision will have no effect
on the total net plant that is used and useful as of the date certain.

15 VIII. CONCLUSION

Q46. Based on your review of the Application and the supporting schedules and
 testimony, would authorization of increases in rates, new tariff provisions,
 and the adjustment of the depreciation reserve accounts be just and
 reasonable?

A46. Yes. On behalf of Ohio Gas Company, I am recommending that the Commission
approve the Application because the relief being requested is just and reasonable.

```
C0101962:2
```

- 1 Q47. Does this conclude your testimony?
- 2 **A47.** Yes.

Case No(s). 17-1139-GA-AIR, 17-1140-GA-ATA, 17-1141-GA-AAM

Summary: Application Part V (Section S and Testimony) - Ohio Gas Company's Application for an Increase in Rates, Tariff Approval and Approval of Accounting Authority electronically filed by Ms. Vicki L. Leach-Payne on behalf of Darr, Frank P. Mr.
