Dear Public Utility Commission,

I am writing today to share my concern with the changes you are planning. My family and I value our environment and have made sacrifices financially in order to purchase energy efficient washing machines, refrigerator and dishwasher as well as lightbulbs. I expect that AEP reward us for this effort not punish us. I want to see AEP increase their renewable energy and energy efficiency programs. There is no greater gift to this earth than nature, clean water, animals and the future of our planet. So I say I strongly oppose AEP's plan to more than double our service charges

Thank you for your time,

Erin Zantell-clay
