Subject: Duke hearing yesterday

Hi -- I want to convey my complete dissatisfaction with the hearing yesterday that was public but NOT with the OPSB. It may be your standard procedure to send only staff to these events, but nothing about the central corridor project has been standard. Not enough time was scheduled. People had to wait three or more hours to speak. Many could not stay that long. The option to submit written testimony suggests that this process really doesn't matter. We've been sending letters to the OPSB and Duke for more than a year! This was to be the single opportunity for the OPSB to hear from the public. How can we believe they'll read the transcript? As one speaker asked, what is the purpose of the OPSB if not to listen to the public and protect our interests?

--

COMMENT DESCRIPTION:

The Ohio Power Citing Board needs to understand the hardship that will be involved in the lives

of Ohio citizens if the plan to route the Duke Central Corridor Extension Gas Pipeline through Hamilton County on any of the proposed routes but especially the route thru Evendale and Reading. As President of the Reading City Council, I have been close to the process and understand how this misguided route proposal will affect the Reading businesses, community activities and individual Ohio Citizens and Taxpayers. The concept that the route has had first person observations from anyone with authority at the Ohio Power Citing Board and that the

route continues to be an option is insane and anyone that would propose moving the proposed route forward has no understanding of the effect on so many of our residents. I have a nice house

with extra bedrooms that can be made available for an overnight stay if needed to anyone on the

Citing Board that would like to come to Reading and walk the proposed route with myself and other Readings Administration and City Council members. Take a "selfie" standing on the route

on West Street or Pleasant Street or Market Street or Mechanic Street or Third Street or any of the many businesses and community recreation locations on the route and send your "selfie" to my email and the other Reading Administration and City Council members to prove that any member of the Ohio Power Citing Board has the first person understanding of this situation for the residents of Reading. Then go to your home and imagine a 20" High Pressure Natural Gas Line that same distance from where your spouse and children play, eat and sleep.

COMMENTS: As a resident as well as a Reading businessman, I wanted to voice my objection to the proposed pipeline extension project. This proposed alternate route affects too many residents and businesses along the route. The risks far outweigh the supposed necessity of this pipeline extension. I have a business that will be within a short distance of the pipeline (16 W. Pleasant St) and this area is always highly populated. I value the safety of everyone who would be within the 'safety' zone of this pipeline. We are also very close to the youth athletic fields/stadium and our Community Pool/Field House that's always bustling with activity. I cannot imagine what this pipeline will do to our property values. I foresee a huge decline as this is not a benefit to our homes or businesses. I highly urge you to reconsider another route if this is indeed a necessary pipeline. There are many areas far less populated which could be used as a route.

COMMENTS: I am completely opposed to this pipe line through the City of Reading. We live in a wonderful but congested town. Placing this right in the middle of the city where there are so many families is selfish and sickening. if something happened then the entire city is just gone. The proposed plan goes through less congested areas but of course they have money and money speaks. Reading is middle and lower class so obviously we are the preferred because the proposed route people have money and money usually always wins.
How would you feel if they placed this in your yard by your front porch where your children or grandchildren play?
I guarantee you would be opposed too.

COMMENTS: I could not make the meeting today so I am writing to highly object to the Alternate Route for the proposed Pipeline. As a resident of Reading I'm very upset that this proposal will be so close to the many athletic fields that our youth use on a daily basis throughout the year. It's also way too close to residences for comfort as well. First of all, is this actually necessary? I don't see how it is. Secondly, if this was proposed to be put in your front yard or the area in which you live, would you still be supporting it? I sincerely doubt it. If this is absolutely a necessary addition, please choose an area that doesn't affect residents or businesses. There are many less populated areas to choose. I beg you to please reconsider your options.

Subject: Comments: Central Corridor Extension Gas Pipeline

To Whom It May Concern:

The state and local communities partner with the private sector to invest significant time and resources into retaining and attracting businesses to Ohio, growing the number of jobs in the state, and helping citizens to prosper. These economic development efforts have resulted in huge wins for the state – thousands of jobs and new investment. Ohio's economy, however, holds considerably more growth potential. To continue this momentum of business attraction and expansion it is important for aging infrastructure in Ohio to be repaired, rehabilitated, and/or replaced.

Ohio's infrastructure, such as roads, bridges, pipelines, and sewers are critical to connecting people to jobs, moving goods and services, and supplying energy to businesses and individuals. As the state competes for new investment it is critical that infrastructure investments are made to help us to compete at the highest level.

While the Cincinnati USA Regional Chamber does not have a position on the route and size of the Central Corridor Extension Gas Pipeline, it does recognize the importance of replacing aging infrastructure to economic development. Thank you.

Sincerely,

Jason Kershner

COMPLAINT DESCRIPTION:

Dear Ohio Power Siting Board, I'm writing to you to express my concern for the proposed location of the above referenced project. This location will be going through my hometown of Reading and would be devastating to our small community in many ways. Duke energy wants to install a 20 inch in diameter, high pressure, natural gas pipeline through my City, within feet of vital businesses, Veterans Memorial Stadium (used by our youth for many school sporting and other community events), our community pool, Haffey Fieldhouse, VYO, Reading Youth Football and Reading Youth Soccer Fields. These are core locations in our small community.

This proposed pipeline will also be within feet of homes on West St., Pleasant St., Market St., Mechanic St., and Third St. All of these locations violate Duke's own safety standards and their pledge to keep this potentially dangerous pipe away from residential areas. It is vital to our community that the Ohio Power Siting Board deny Duke's request for this proposed location. Thank you for your consideration to keep our community safe. Sincerely, Traci Smith

To: Puco ContactOPSB <contactopsb@puco.ohio.gov>
Subject: Written comments for Duke Pipeline hearing

I am Matthew Price at 9474 Blue Ash Rd, Cincinnati OH.

I am writing as a person living directly on the eastern proposed route of the pipeline wishing for the project to be denied as it will harm my quality of life. I will be afraid to live in my own house directly adjacent to a high pressure pipeline, and will likely be unable to sell to move away from it as property value will decline without getting anything in return.

I do not see the need for this project. If anything, projects to improve renewable sources of energy should be entertained over extending the influence of fracked gases from the north. Society will benefit greatly from renewables which are not nearly as dangerous to use and transport as a pipeline is.

I love my house and where I live, and cannot imagine being terrified that I might face an explosion at any time, right next door. I have been a loyal customer of Duke Energy and cannot understand why they want to do this to me.

Thank you for hearing these comments and testimonies, please block the project from progressing.

Sincerely,
Matthew Price

Re. Case 16-253-GA-BTX

All the members of this siting board very busy people, running six or so crucial departments in the State of Ohio. I would like to thank the Siting Board Members to be heard on this process.

The average person does not trust government officials today. And, for good reasons. But I do hope siting board members are people we can trust to take our concerns seriously, view all the facts, the environmental effects, safety, and consequences of disrupting our communities here in Southwest Ohio.

This is a 100 million dollar project, right now. Duke Energy is not going to pay for it. Their shareholders aren't going to pay for it. We the consumers in Southwest Ohio are going to pay for it.

This whole thing is ironic. We don't want it. But we are going to pay for it. So, this community relies on you our Ohio State Siting Board, to do the right thing, because for Duke Energy it's 'Damn the torpedoes full speed ahead.'

Thank you for your time.

Thank you for reading my letter. A response and acknowledgement is appreciated.

Sincerely,
Joe Stiles
