**COMMENT DESCRIPTION:**

Case no. 17-1435-EL-CSS I just received Ohio Edisons response to my complaint. First off, i'm sorry I didn't number paragraphs or complaints. I didn't know they could only read paint by numbers. Now to their first defense, they admit there was a problem in my vicinity. Well I called them, so yes that is a half truth by them. Now later in first defense 1. they lack sufficient information about the double voltage that they sent into my residence, I have a picture of their meter that was hooked up to my meter base pegged out. I will share, I have 4 copies to pass out. As for the appliances and electronics, they don't care about these, they are not living with out them. I have a new dish washer(1) not working at all, my ice maker in my refrigerator and the display lights do not work now(2) , my 2 year old furnace blower motor would not turn on(3)( we had to fix this as it was extremely cold at the beginning of May and I have 3 small children at home, our paper shredder is fried(4) our bedroom tv (5) will not turn on, our garage door opener(6) is fried, our computer photo copier(7) is fried, our home phones(8) were fried, our washing machine (9) is now not working properly, our Keurig machine (10) is toast, My 1 year olds light and sound machine(11) was fried, 2 of our usb charger outlets(12) are burnt, our computer surge protector (13)is burnt, a bunch of light bulbs (14)blown, my 18 volt battery charger(15) was throwing sparks all over my basement and actively smoking while I took it out side, my dryer (16)takes longer to dry clothes than it did on May 2nd, my bathroom gfci (17)blew black smoke out of it. So to them denying

this, I welcome them to come and look. Oh yeah, since they pulled my meter from its base, the base is now coming away from my house. I guess they deny that too though. As for #2 of their first defense, This complaint has just as much to do with you( PUCO) as them (Ohio Edison) How can there be a tariff that enables them to destroy property and not be liable for it????? If I caused property damages, I would have to pay for them! Now for #3-8 of their first defense, I am sure they believe this, but in their words" I do not have sufficient information or lack knowledge to form a belief of their truths for denial. so I deny their denials. I also can not except anything else this company hemhaws around as a truth. The hell with these codes and tariffs that protect this monopoly!!!! Do what is right! Obviously they had a problem that caused damage to my property( luckily not burning it down), They NEED to be liable for this! There is no way that this was not caused by them, therefor they should have to pay! Just like everyone else would!!!
