AEP Case # 16-1852-EL-SSC

PUCO

2017 AUG -7 PM 1:50

RECEIVED-PUCO-11003

Dear PUCO:

I am writing in regards to your proposal to increase upfront, mandatory residential fixed fees. As a family of four on a monthly budget, our energy bills are already one of the highest monthly expenditures we incur. We vehemently oppose these rising prices and increasingly support renewable, sustainable energy sources.

With rising energy costs, our family would have less to invest in energy saving upgrades and take away our ability to make these kinds of investments. We hope that you will hear our opposition and take our concerns into account before raising prices.

Sincerely,

Scott Bentley
7702 Tullymore Drive
Dublin, OH 43016

SUBJECT: AEP Case Number 16-1852-EL-SSO

PUCO,

I am writing to you regarding AEP Case Number 16-1852-EL-SSO.

As a life time Columbus resident and AEP customer, I am concerned about the proposal to significantly increase the customer charge on my bill over the next two years. From my calculations, this would increase my yearly bill by \$120.00 in 2018.

As a family with multiple children in College, this charge, although seemingly small, becomes a factor in the budget that impacts the ability to participate and fund family activities but also to make investments in technologies that drive efficiencies and energy savings.

I would ask that the PUCO spend its resources focused on driving solutions and policies for sustainable and clean energy that over the long term will drive energy savings.

Sincerely,

A handwritten signature in black ink, appearing to read 'Tim Krieger', with a long horizontal line extending to the right.

Tim Krieger
7618 Tullymore Drive
Dublin, Ohio 43016

AEP:16-1852-EL-SSO 7-27-17

Dear Senator,

I am writing today to encourage you to support legislation that moves away from coal & nuclear plants & invest in clean energy. Ohio should be a leader in this effort so we can have a healthy environment for our children.

Thank you,

Jacobi Kucera
7743 Windsor Dr.
Dublin, OH 43016

Public Utility commission staff,

The US is dependant enough on coal as is, without paying more just to bail out companies that remain dependant on non-renewable energy.

AEP case number 16-1852-EL-SSO, ~~that~~ which enables this behavior is a step in the wrong direction. Natural gas and renewable energy is ready to go whenever, they've just refused to invest money in it so they don't have to make a change. Don't allow energy companies to completely unnecessarily make life harder for those that struggle to make their paychecks cover the absurd charges for maintaining a livable lifestyle. Big energy has the options available. Don't let them make one that punishes us all.

Rachel Haysler

6403 Fayborough Ct

Dublin, OH ~~43016~~

43016

I think we should reduce fossil fuels because nowadays people use a lot of cars and motor bikes and that polluting most of the air so pedal bikes aren't really common.

- Noor

Dublin, OH

Case #16-1852-EL-SSO

July 27, 2017

With regards to AEP case number 16-1852-EL-SSO;

AEP should not be able to charge "customer charges." We must speak out against these fixed rate charges. We should be working to conserve energy and efficiently use renewable energy.

Thanks.

Shukla family
1653 Conley Ln
Dublin, OH 43016

We have four people living in our house and I would say we all have a comfortable lifestyle, but having extra money would obviously be beneficial for everyone. Since we are putting so much money aside to pay for this bill, it's harder to enjoy the little things in life, like eating out randomly or buying something I want and not need. My parents come home from such a long day at work, often exhausted and they are working to better my sister and I's future. Having a sister in college, and the fact that I will be attending college in a few years, also gets taken into huge consideration as my family saves money, and it would be nice to know that their hard earned money is going toward something worthwhile.

RE: AEP case number 16-1852-EL-SSO

Dear Public Utilities Commission of Ohio,

I recently was made aware through the Ohio Citizen Action that AEP is planning to increase my family's energy bill about 119%. Please reconsider your decision as it will make our live really difficult. I am disappointed that you would raise energy prices without informing the users and without providing any significant improvement in the quality of services in return.

Also please be aware that I support clean energy choices and that big fixed fees are making it difficult for people like me to make choices. Please make clean energy choices more affordable.

Thank you.

Columbus, OH 43215

AEP Case Number 16-1852-EL-SSO

Dear PUCO Representatives,

I'm writing to express concern and disappointment over AEP's proposal to drastically increase their customers' fixed fee charges to compensate for outdated energy acquisition and dependence.

As an AEP consumer who actively participates in energy efficiency and conservation, it's personally defeating to work to conserve my residential energy and pay more because conservation is becoming more the norm than the exception. Rather than rewarding consumers for decreasing dependence, we're being taken advantage of in a monopolistic system.

As a parent of children ages 11 and 14, we're work to instill value in conserving our resources through habit rather than acquiesce to "easy" wasteful attitude sometimes pervasive in society. This proposed increase is really annoying, philosophically, for our family – we're a fortunate one that can afford to absorb this ridiculous increase. However, I recognize many others across the state are not as fortunate and would consider this a severe hardship to their livelihood. My retired parents, on a fixed income, are prime examples.

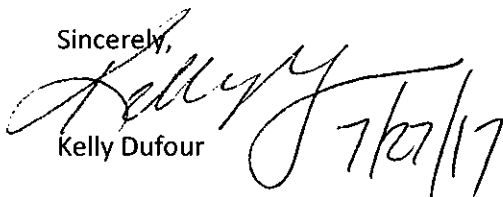

While I haven't looked into this issue in detail yet, I look forward to watching this process unfold in the hopes that the PUCO is pressured not only by the energy giants but by the consumers for which the commission serves.

With a mission of assuring all residential and business consumers access to adequate, safe and reliable utility services at **fair prices**, I'm confident you'll keep AEP in its place in the competitive market.

Let's begin a legacy of embracing new technology and energy sources by actively refusing to subsidize outdated business practices.

Thanks for your thoughtful consideration on behalf of myself and my family.

Sincerely,

Kelly Dufour 7/27/17

Columbus, OH 43215

AEP Case Number 16-1852-EL-SSO

Dear PUCO Representatives,

I'm upset about AEP's proposal to increase our fixed charges. This is not right!

My husband and I have worked hard all our lives and have finally retired. Living now on fixed income, we're starting to feel how tight a budget can be each month. Paying more for AEP's lack of foresight is frustrating. I would like to see customers be rewarding for being loyal and on-time payers. Not be forced to pay more just for simply having access to their source.

I'm counting on this commission to help protect us and all the other retired and low income consumers who rely on energy but aren't the ones using it like crazy.

Thank you for your consideration.

Sincerely,

Dottie Rule

6934 ROBINWOOD CT
DUBLIN OH 43016

Dear Commission,

Please do not increase power costs and please look into alternate energy sources that would reduce overall costs and environmental concerns, as well as benefit our community.

Additional fees and costs make it difficult for all families to budget properly; never truly understanding what the fees actually represent.

Please be responsible and thoughtful regarding case #16-1852-EL-SSC

Mr G Calk

I am writing to oppose the
119% increase in the mandatory
residential fixed fees by AEP.

AEP and other utilities need to
concentrate on finding renewable
energy sources. They can't keep
charging residents for their bad
decisions and reliance on coal.

We have a budget we need to
follow and are trying to save
money to send our child to
college. These extra fees by
AEP will take away from
other day to day living necessities.

Please stop AEP from this
whopping increase in fees!

16-1852-EL-SSO

To whom it may concern:

I understand it is likely that our electric rates will increase significantly in the near future. Obviously, this is not an attractive proposition. However, I'm far more concerned with how that additional money is spent. I'm concerned that it will be spent paying more for electricity generated with coal, thereby continuing to add to an already VERY serious atmospheric contamination. If that's the case, I would rather have that extra money in my discretionary fund to spend on energy-saving appliances or other devices that help reduce our overall contribution to our carbon footprint. If you were going to take that extra charge and really use it to invest in renewable energy resources, I could live with it and be pleased that you're working toward that end.

AEP Case# 16-1852-EL-SSO

To Whom it May Concern:

It's infuriating that as a home owner, I will be receiving an additional customer charge when I am ALREADY a customer paying for a service. Furthermore, paying for a service that I can't just "do without", such as internet or cable. As a sole provider for my household, a utility bill 119% MORE than my current bill will add an additional burden on our already tight budget.

As an advanced civilization, to continue relying on fossil fuels for our energy seems asinine. Why has the additional funds and increased costs over the years not been dedicated to providing research for clean energy that doesn't make us "slaves to the system"?

Please reconsider your detrimental change in service.

Matthew Ray
6259 Wexford Woods
Dublin, OH 43016

Dear Commission,

With the already high demands of the increase in cost of living, I find it another challenge in an already challenging world to afford another expensive utility bill. This will hinder my family from being able to enjoy family time because my husband & I will have to work longer days in order to be able to provide more for our family. Please take it upon yourselves to NOT increase customer charges to our electric bills.

Sincerely,

July 27, 2017

Public Utilities Commission of Ohio
180 East Broad Street
Columbus, OH 43215

AEP case number 16-1852-EL-SSO

AEP's proposal to Increase the customer charge takes away from savings that families can gain by choosing an electric supplier that meets their budget and lifestyle. We don't need more hidden charges on our electric bill. I am fortunate to be able to absorb such fees should they be adopted but other less fortunate low -income residents will be forced to cut their food and other budgets to pay these fees. Fixed fees also absorb the energy savings my household has realized from an energy efficient pool pump, lighting, and appliances. It seems silly to allow AEP to recapture my savings.

I encourage you to dismiss AEP's proposal to increase residential fees.

Thanks,

I am strongly against the proposal to increase mandatory residential fixed fees, "customer charge". Government and all big businesses attempt to pass errant projects on to the consumer via taxes or hidden fees. This charge would be another attempt at this. The result of such practices would only add to the disdain for large businesses like AEP. Please refrain from such practices as burdensome charges only offset the benefit of purchasing energy saving products.

To: Public Utilities Commission of Ohio

From: Dr. Nicole Luthy

Re: AEP Case 16-1852-EL-SSO

Subject: Proposed AEP rate hike

Date: July 26, 2017

I am writing to express my opposition to the AEP proposed hike in residential fees. These rate hikes make it more challenging for middle class families to reduce utility costs by investing in energy saving upgrades to their homes, as it would redirect a portion of the family budget to AEP. We manage our monthly utility costs by regulating our usage in order to lower our bill. Fixed fees, applied regardless of how much energy you use, mean that energy saving practices have little if any impact on your bill. Additionally, this increase would unfairly burden low-income customers, many of whom lack the resources to absorb higher monthly fees.

I urge you to consider the negative impact this AEP rate increase would have on Ohio families and vote no.

Thank you.

Columbus, OH 43215

Dear Sirs,

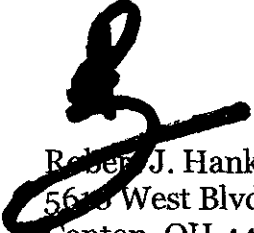

I am writing to ask you to please resist the dramatic increases requested by First Energy for mandatory residential fixed fees or the "customer charge."

Households like mine want to invest in new ways of saving energy, not the old ways. In spite of the gains Ohio has made from cheap oil and gas, it is imperative that the planet finds better ways to generate power in the future. Solar and wind are the way to go. Nuclear is dead. Coal is dying, and America is spending way too much time generating energy only to be wasted by households that are too energy dependent. It is time to tighten our belts and to cut back and the wasteful ways of the past.

So I'm asking you to severely limit the request being made in regards to Case Number 17-0334-EL-ATA. It's time to take a stand for future generations.

I believe that it is not fair at all to increase the power bill of peoples home because that can make very negative effects in that households lives. If the family is on a steady budget that everything is lined up so they have just enough money to pay everything and all of the sudden the bill sky rockets they will have to make changes either by no buying groceries, or you have to sell items and so on. There are a lot more serious situations that could happen so let's prevent that.

To : Ohio Edison

FM: BRIAN ZIMMERMAN

To Whom It May Concern:

I am against fixed rate charges because it will only add to the current U.S. Administration's decision to abandon environmental concerns and turn its back on the Paris Accord. We need to invest now in renewable and pollution free energy. We cannot afford to ignore climate change and continue to think we are not now facing a global threat created by fossil fuels.

Case # 17-0334-EL-ATA
& # 16-1852-EL-ATA

We live in a time where ~~anywhere~~ ^{we want} we go we have a choice. Even when choosing what ^{we want} to drink there's multiple choices. Do we want juice, pop, or water? Then another choice: canned, bottled, or out of a fountain? We have choices everywhere for every little thing.

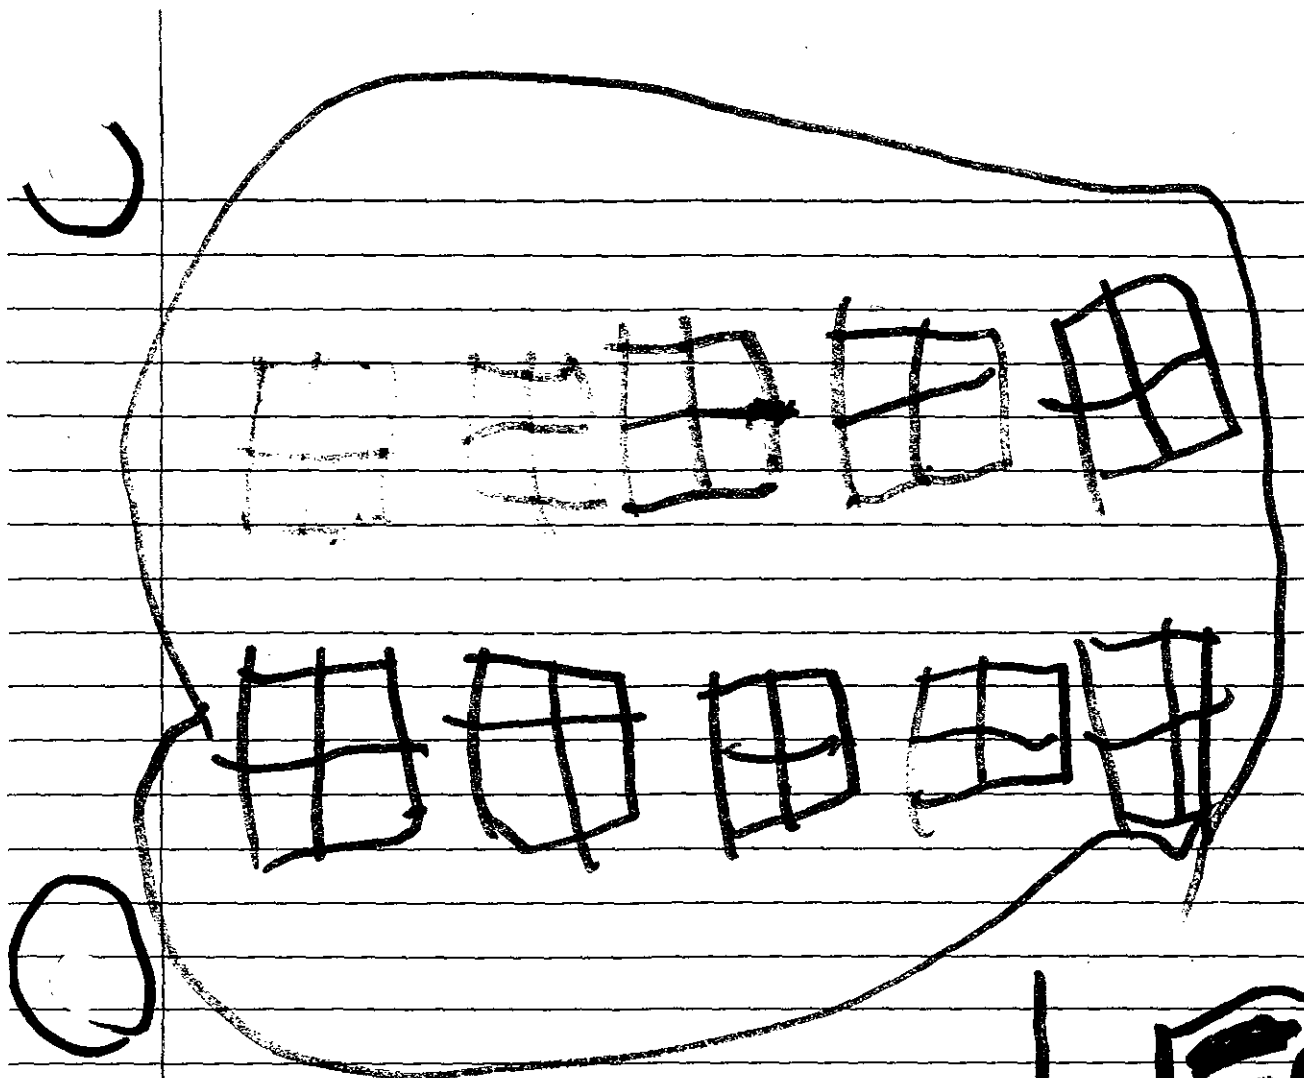

You are taking away our choice to even have the option to use energy efficient items. That's not very American. It's not fair to your customers either. It's rape.

It's 2017. We should all be going towards energy efficient utilities/items. Not only to save money, but to save the earth. I have 2 small children & am a single mom. We maybe get to do one fun thing a month, if we're lucky. We won't even have that if the bills go up even more.

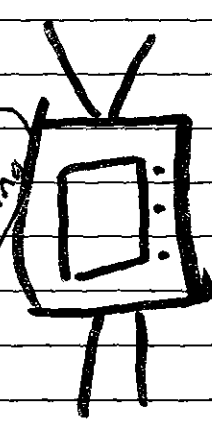

I want clean, energy efficient, affordable utilities. Coal is the past & outdated. One day we will run out of it & we need to start preparing our homes now for when that happens. This increase takes away that opportunity for us to do that too! This isn't fair.

To Whom ever it may Concern,

I am very concerned about the possibility of our AEP customer charge increasing. It is very cost prohibitive and a strain to my family. We are trying to replace 15 year old appliances in our home, as well as making energy efficient improvements. Such customer charge increases would desperately impact our budget and ability to pay for extra improvements. Please do not increase our charges!

Thank you,

Jessica Kirkland

Dear PUCO,

AEP should not be allowed to raise their Customer Charges. Currently, I am paying exorbitant charges and we have a cooperative. How are people expected to afford these rate hikes without salaries being raised?

If they are doing investing in energy savings upgrades, when will the cost be reduced? Just because they have not invested in their upgrades off of their profits, why should we finance them on our shoulders?

Sincerely,

A handwritten signature in black ink that reads "Avery A. Clement". The signature is written in a cursive, flowing style.

Case # 16-1852-EL-SSO

To whom it may concern:

My family and I very interested in energy efficient appliances and the potential savings solar can provide. By moving to a fixed fee model, the Utilities Commission will in effect take away my choice to invest in technologies that might save me money. I am a responsible user of energy and by moving to a fixed fee, I might be overcharged for energy I may not use. On the contrary, users of energy that are not responsible will be given a free pass to use as much energy as they wish while perhaps not paying their fair share. I vehemently oppose moving to a fixed fee model and believe we should each be responsible for our own usage and thereby allowing us to make decisions on what energy efficient technologies may exist.

Thanks,

case # 16-1852 - EL-SSD
ATTN: Public Utilities Commission of Ohio
180 East Broad Street
Columbus, OH 43215

It is not just the cost of electric bills that are increasing it's all fixed monthly costs across the board that are going up ie; heating, cable, insurance and food. How can AEP expect a family to pay a 60% monthly increase when we can't expect anything more than a yearly 3% increase in our salaries from our employers???

Price gauging needs to stop!!

Traci & Jim Voytus
5359 Anacala Cir
Westerville, OH 43080

I am strongly opposed to AEP's increase in utilities. Recently divorced, it would make it difficult to remain in my home with my already tight budget. I am also an advocate for cleaner coal and renewable energies. Our water and air are important to me and my family. As a Science educator I will make hundreds of kids a year aware of the disservice that AEP is thrusting onto the public and the damage that unclean coal and coal burning plants do to our environment.

Sincerely angry,

K. Antz

Re: Case# 16-1852-EL-SSO

This letter is to inform you that I am against raising the fixed fee or customer charge. A \$10.00/month increase may not sound like a lot but when that increase = a staggering 120% increase. That's just insane. The amount AEP charges in general is at the higher end of the spectrum of energy costs compared to every other state I have lived in. And the service is mediocre at best. There are many ways a business can offset costs (including energy companies) that does not include passing those costs onto their customers. There are many families that cannot afford a \$10:00 a month increase and they would have to go without something else they need (food, medication, etc) if this increase was to pass.

Thank you,

A handwritten signature in black ink, appearing to read "Lisa Minott". The signature is fluid and cursive, with the first name "Lisa" and last name "Minott" clearly distinguishable.

AEP case number 16-1852-EL-SSO

Please make renewable, clean energy
possible by keeping our electric bills

low.

The Thays
5288 Annandale Ct
Westerville, OH 43082

Dear Public Utilities Commission,

Having just been informed not to expect a cost of living raise for the next five years, I do not need the sky high electric bill. Medical decisions are being made very tough being

Recharb AEP 16-1832-
EL-SSO!

Thank you.

D. M. Novak

Westerville, OH 43082

Do not make further
investments into
coal. It is dirty,
unsustainable, and
all around horrible.

Thanks,
Paul Engler.

Case# 161825

EL 850

Do not make further
assessments into
coal. it is a
terrible energy source.
Think renewable

Thanks

Wm Taylor

Case # 161852

EL 550

Please do not
raise rates to pay
for coal. It is
outdated.

Advocate for
renewables.

EL 880

Please do not
raise rates, to
pay for coal.
It is an outdated
way to get
energy.

Please advocate for
renewables.

I AM A SINGLE MOM ON A TIGHT BUDGET
& CAN'T AFFORD A BIG INCREASE IN ANY
UTILITY BILL. PLEASE THINK OF YOUR
CUSTOMERS & THEIR LOYALTY TO YOUR
COMPANY BEFORE YOU INCREASE MONTHLY
CHARGES. THE RICH GET RICHER & THE
POOR GET POORER!

16-1852-EL-550

Hey AEP-

Dn't raise our
current rates
due to your past
bad decisions!

6346 Anselen Dr, Dublin, OH

To Whom It May Concern:

I am opposed to increasing mandatory residential fixed fees, not only because of the 119% increase, but also because it is to cover shortfalls in non-renewable energy costs. Instead, energy solutions should focus on clean, renewable sources to reduce environmental impacts on global climates + pollution.

Thank you,
Kim Maehesky
