COMMENT DESCRIPTION:

In reference to case # 17-32-EL-AIR -- I urge you to not allow Duke Energy to increase the fixed portion of our electric bills. While I understand that they have fixed costs to maintain coal power plants, electric delivery and other grid improvements, it sends them the wrong message with regard to coal power plants. These are bad for our health and have a disproportionate impact on global warming and therefore the public does not want them. Wind and solar are increasingly more competitive. If PUCO can guarantee and insure that additional funds are only spend on GRID maintenance, improvements, and reliability then okay, fine -- I will be happy to pay for what I am getting. On the other hand, keeping aging and dirty coal power plants, no way -- I don't want any part of it.

Please do not approve the fee for Duke. Most families in OHIO are just barely getting by and are already facing large bills from DUKE>
