COMMENT DESCRIPTION:

I am wondering if a decision has been made re: the siting of the natural gas pipeline in Hamilton County. The preferred route runs through a very complex area that includes a major hospital, shopping areas, multiple school locations and many communities that are long-established. Madeira, our community, would be negatively affected for many reasons: the project would cut right through Madeira and disrupt access to schools, Jewish Hospital, shopping centers and many places of work and worship. It just doesn't make any sense to site the project down the Kenwood Road area. And we are angry that this is the "preferred route". We pay high property taxes to Hamilton County and it feels like our voice is being ignored. Surely there are other paths that would less impact access and safety. I can't believe that the Kenwood area business community, the City of Madeira, Jewish Hospital and the many schools and even the YMCA have not strenuously objected to this choice. I just don't understand it, and would appreciate an honest response.
