CASE_NUMBER: "Icebreaker Wind Project Case no. 16-1871-EL-BGN I

COMMENTS: I am extremely disappointed in the windmills are being considered on any of our Great Lakes, much less the one that we traverse the most. These windmills have to be 200 feet tall and well lighted, or else we will have issues with seeing these, especially at night (there will be lives lost), and our mast being over 60 feet tall (contact with windmill blades will be extremely dangerous). Also, we frequently come into Cleveland's Harbor from multiple directions, depending on whether we spend a night at Peele Island, Leamington, Lorain, Put-In-Bay, Kelley's Island, Cedar Point, Catawba Island, etc., as we always take the most direct course, allowing for proper use of the available wind.

Please keep windmills off the Great Lakes, and especially Lake Erie!

Thank you,
