Patrick Engineering Inc. (Patrick), on behalf of The Indiana & Ohio Railway, is submitting the following update for the above-referenced project as a follow up to the traffic preemption issues:

Patrick, Progress Rail and IORY have attempted several repairs to the system in February 2018. Wide band shunts with lower frequencies were installed to compensate for the track conditions. At this time, we are evaluating different alternatives with the ORDC and the Railroad to address the signal timing issues and site conditions.

Please feel free to contact me at (614) 354-4933 if you have any questions regarding this submission.

Sincerely,
PATRICK ENGINEERING INC.
